Fire Chief Shingle Roll Roofing

Makes Fire Resisting Roofs

90 POUNDS

GUARANTEED 17 YEARS

Approved by Underwriters

"You Can Lay it Yourself"

LOOKS LIKE PAINTED RED OR GREEN WOOD SHINGLES, but costs about half as much. Wears practically twice as long and does not catch fire from flying sparks. Fire-Chief Shingle Roll Roofing does not have the defects, such as curled or warped shingles, so often found in wood shingle roofs. Made of heavy roofing felt, **imported** asphalt and genuine crushed slate.

THE PATTERN is made of real red or sea green crushed slate (your choice of color), with black shaded lines inlaid between shingles, a treatment that is permanent and beautiful. Needs no painting.

RESISTS FIRE. Fire-Chief Shingle Roll Roofing actually resists fire, whereas wood shingles when dry will catch fire easily from sparks.

EXCLUDES SNOW AND WATER BETTER THAN WOOD SHINGLES. Fire-Chief Shingle Roll Roofing is air-tight and watertight.

WARMER THAN WOOD SHINGLES and helps make a house warmer in Winter. Can be used over old shingles, giving double roof protection.

GUARANTEED FOR SEVENTEEN YEARS. The formula and process for making Fire-Chief Shingle Roll Roofing has been in use for years. It has been put to the most severe tests. Roofing laid sixteen years ago is practically as good as the day it was laid.

THIS SHINGLE ROOFING IS FURNISHED IN ROLLS containing 108 square feet, 36 inches wide, with 8 square feet extra allowed for 2-inch laps, and will cover 100 square feet. All in one piece. **CEMENT AND GALVANIZED RUSTPROOF 1-INCH NAILS INCLUDED.**

48C3320 Red

48C3321 Sea Green

$3.60 PER ROLL

108 Square Feet.

Shipped from CHICAGO, ILL., PHILADELPHIA, PENNA., ALBANY, N. Y., ST. PAUL, MINN., KANSAS CITY, MO., ATLANTA, GA., or SOUTHERN OHIO.

MADE OF IMPORTED ASPHALT

Be sure to ask for "long nails" if this roofing is to be used over old shingles and allow 10 cents per roll extra.

THIS BINDING GUARANTEE PROTECTS YOU FULLY IN ORDERING A PORTABLE BUILDING.

BOND OF INDEMNITY

WE GUARANTEE that every building illustrated in this book will be exactly as represented.

WE GUARANTEE the lumber used in Simplex Portable Buildings is a selected No. 1 grade. The woods generally used are Southern yellow pine and Washington fir. Both woods have a world wide reputation for their lasting qualities.

WE GUARANTEE every Simplex Building to be practically and rigidly constructed and to give entire satisfaction for the purpose for which it is intended.

WE GUARANTEE that after shipment has been examined, if the material does not come up to the purchaser's expectations in every respect, by notifying us in writing it can be shipped back AT OUR EXPENSE and we will promptly RETURN THE ENTIRE PURCHASE PRICE and freight charges that may have been paid by the purchaser.

WE GUARANTEE to replace any item that may be damaged in transit or otherwise considered unsatisfactory, or to return the price of such items, as the purchaser may direct, upon receipt of the paid freight expense bill with a notation by the freight agent showing the damage incurred.

WE GUARANTEE to furnish free with every order plain, simple working plans, and that every Simplex building will assemble perfectly.

SUPPLY WAREHOUSE

We would like you to know that when you send us an order for a Simplex Sectional Building of any kind, we are prepared to handle it promptly and to furnish the building perfectly manufactured of high grade material.

Our object in showing you these pictures is to convince you that we are prepared in every way to take care of your interests. In our new Sectional Building Factory, equipped with the latest machinery, we have skilled workmen who thoroughly understand the construction of Simplex Sectional Buildings. From the time the material is cut and fitted for the uniform sections until the completed building is ready to leave the factory, the closest inspection is regularly and systematically taking place. We make sure that every section fits perfectly, and we carry in stock quite a number of all sections required in the building of all our Sectional Houses and Garages, to enable us to assemble the complete order and make shipment without unnecessary delay.

We know that when you order a Simplex Sectional Building from this book you are getting the results of years of practical and painstaking experience and that we can give you a building that can be put together in the least time, with the least trouble and at the least expense.

Simplex Portable Buildings

Just One Moment, Please—

Do You Want a Permanent Home?

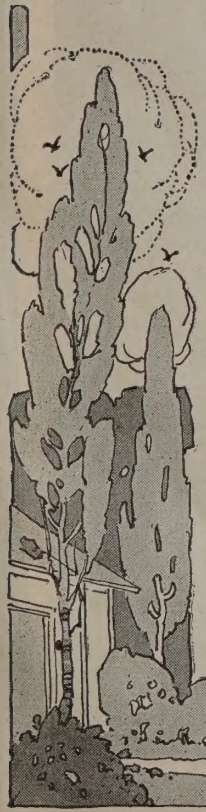
Investigate Our "Honor Bilt" Modern Homes

In addition to the Simplex Portable Buildings described in this book, we also supply a complete line of ALREADY CUT AND NOT CUT "HONOR BILT" MODERN HOMES at prices ranging from $700.00 to $6,000.00. "Honor Bilt" Modern Homes are constructed in an extra substantial manner—double floors, double walls; 2x4-inch studdings placed 14⅜ inches apart; 2x8-inch joists or heavier, 14⅜ inches apart; high grade wood sheathing, extra heavy building paper between sheathing and siding; three coats of paint for the outside.

SIMPLEX Portable Houses are furnished in sections like illustrations on pages 6 and 7. This type of house is designed for Summer or Winter resort cottages, seashore cottages, tenant houses, real estate offices or for temporary industrial houses which are wanted on short notice.

Please do not confuse our Simplex Sectional Buildings with our "Honor Bilt" Modern Homes. If you want a larger and more permanent home than Simplex Portable Buildings are designed to be, turn to the last page in this book; also look at the sample page on the inside back cover of this book, taken from our Book of "Honor Bilt" Modern Homes, and send for our Book of Modern Homes No. 596RMB today.

Read the Following About Simplex Sectional Buildings



Easy to Erect.

This catalog illustrates our complete line of bungalows, garages, churches, schoolhouses, gun club houses, etc. These buildings are shipped in sections and can easily and quickly be put together by the ordinary handy man. The only tools necessary are a screwdriver, hammer and wrench.

Turn to pages 31 to 36 in this catalog and see how two men can erect a three-room house in 8 hours, and a garage in 5 hours and 45 minutes.

Careful Construction.

Simplex Portable Buildings are made in our own electrically driven factory, especially designed, equipped and manned for this particular kind of work. Our Portable Buildings are constructed by experts in this system. They devote their entire time to this work and you are, therefore, assured of neat, accurate and durable craftsmanship.

Quality Material.

The material used in our Simplex Portable Buildings is carefully selected for strength, wear and adaptability to paint.

Uniform Sections.

The sections are 3 feet in width and 8 feet high, securely nailed with rustproof cement coated nails. They are interchangeable and a convenient size to handle, which makes it very easy to erect a Simplex Portable Building. No sections are too large for two men to handle. WE FURNISH CLEAR, EASILY UNDERSTOOD INSTRUCTIONS AND WORKING PLANS free of charge to our customers.

Prompt Shipments.

We can ship any design shown in this catalog within 48 working hours from the time the factory receives the order. Each design is inspected before being shipped, to make sure that all parts fit perfectly and that there will be no mistake or confusion when the building gets to destination. Sections are securely crated with steel strapping and we guarantee safe delivery.

Satisfaction Guaranteed.

You have a chance to inspect your building before we get our money. Read our liberal terms on the order blank in the back of this book. Our low cash prices will save you money.

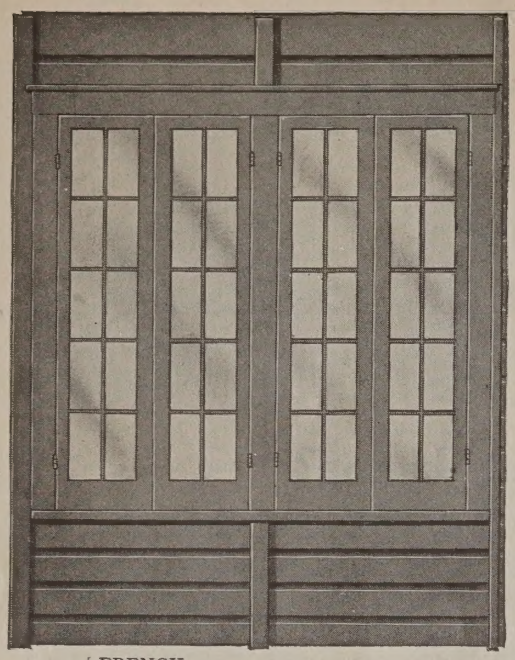
Prices.

The prices quoted in the body of this book are F. O. B. our factories and are subject to market changes, but we will always give our customers the benefit of the lowest quotations at the time the order is received.

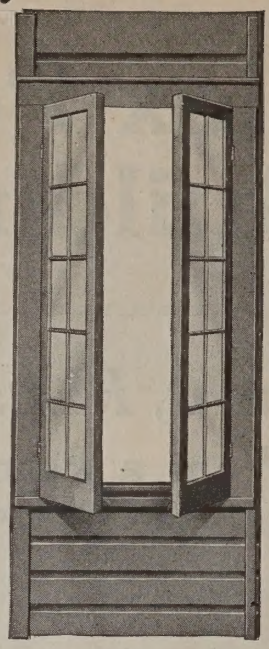
Easy Payments.

Our Easy Payment Terms are so liberal that anyone of moderate means can purchase the house or garage of his choice on easy monthly or quarterly payments, like rent. We require a payment of 25 per cent with the order. Turn to the order blank in the back of this book.

Here's How Simplex Buildings Come

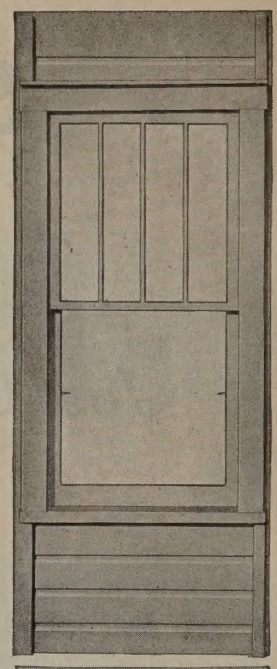


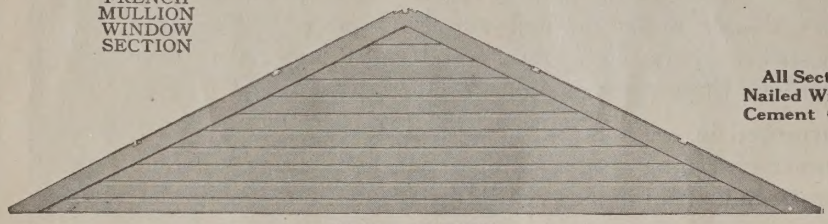
FRENCH MULLION WINDOW SECTION



FRENCH WINDOW SECTION

COLONIAL WINDOW SECTION





GABLE SECTION

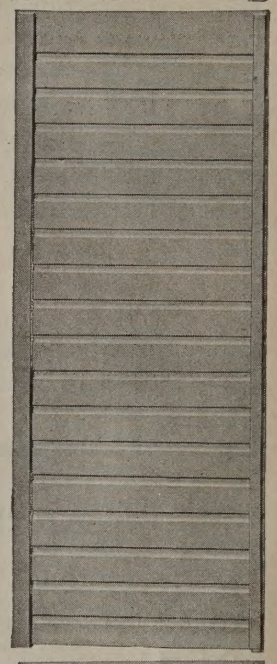
All Sections Securely Nailed With Rustproof Cement Coated Nails.

On this and the opposite page we illustrate the different sections for our Simplex Sectional Buildings as specified throughout this catalog. All sections are uniform in size, being 3 feet wide by 8 feet high, except in the case of such sections as double door sections, which are 6 feet wide by 8 feet high. The dimensions of gable sections are governed by the width of the building.

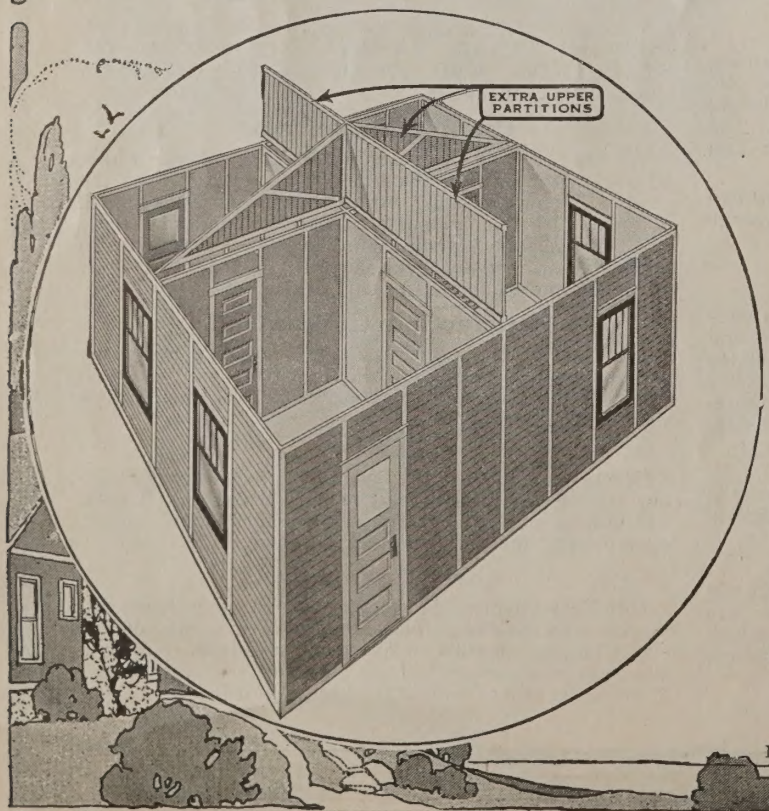
The picture in the circle below shows how simple and easy is the construction of our Sectional Buildings furnished in sections, such as we illustrate on these two pages. They fit together by means of tongued and grooved joints and are bolted solidly together at the sills and plates.

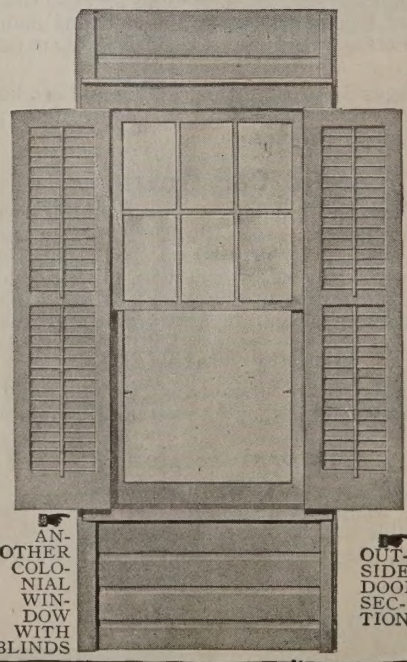
For actual length of time required to put up a three-room house see page 31.

NOTE—While we specify Green Fire-Chief Shingle Roll Roofing for most of our Sectional Buildings, you can have this roofing dark red in color if you prefer, or you can have Roma-Tile Roofing in either red or green. **Be sure to mention choice.**

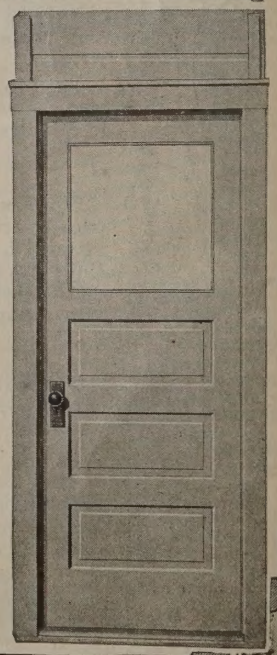


OUTSIDE WALL SECTION



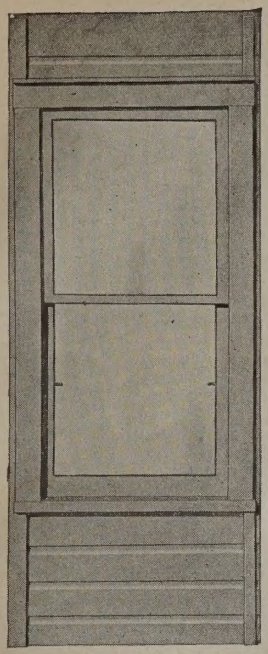


ANOTHER COLONIAL WINDOW WITH BLINDS

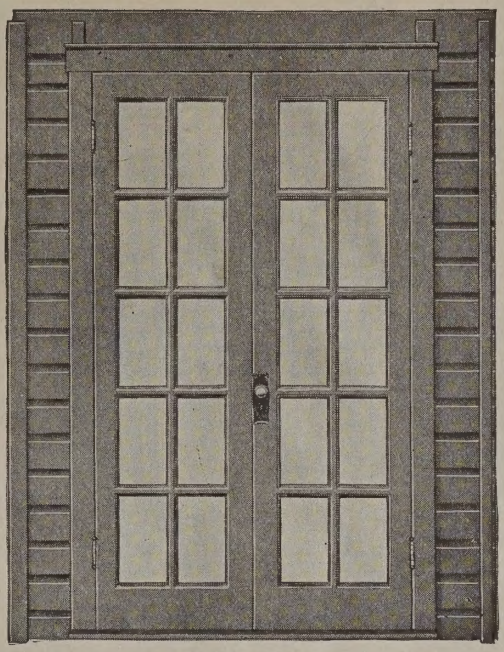


OUTSIDE DOOR SECTION

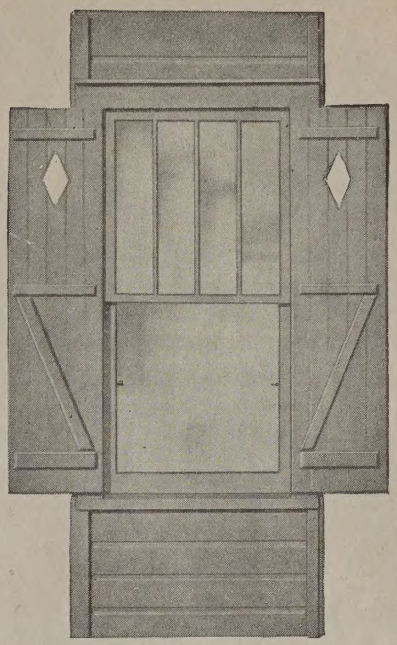
Ready to be Put Together



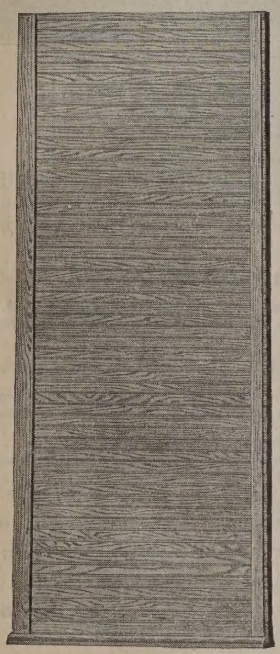
TWO-LIGHT WINDOW SECTION



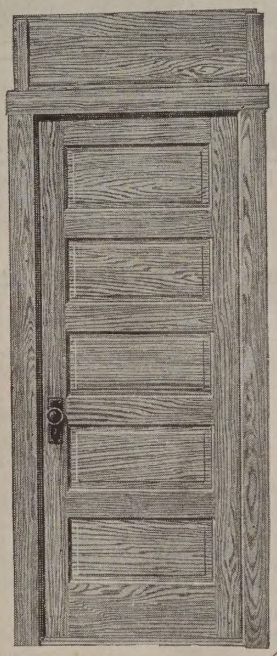
FRENCH DOOR SECTION



COLONIAL WINDOW SECTION WITH SHUTTERS



INSIDE PARTITION SECTION



INSIDE DOOR SECTION

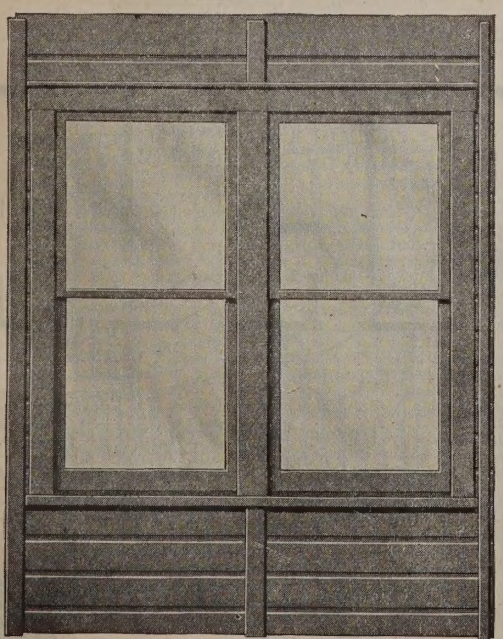
The picture in the circle below shows how by applying wall board to the interior of your Sectional Building you get **double wall construction.** This is what many of our customers regularly do. You will find some of their letters throughout this book.

In the small circle we also illustrate the actual thickness of the wall board itself, and in the upper left hand corner we show the construction of the wall board, illustrating how the three sheets of heavy fiber board are firmly cemented together by damp resisting and heat retaining asphalt.

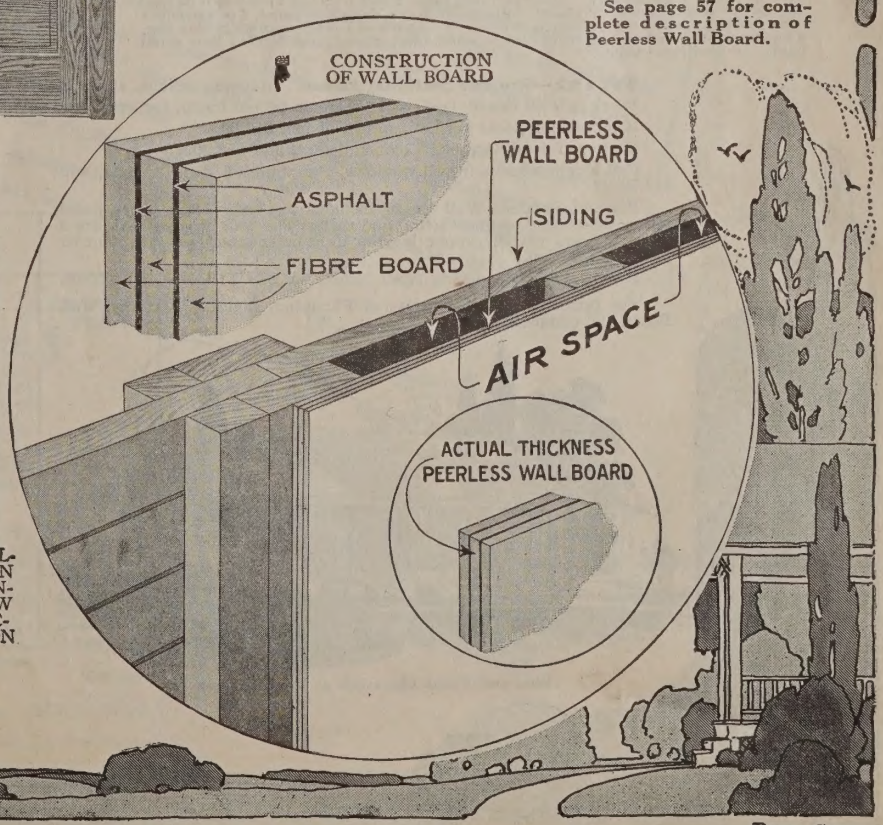
Please bear in mind that all of these sections come to you complete, just as illustrated, the windows and doors being already installed. You have no hinges or locks to put in place. We do all of that for you at our factory.

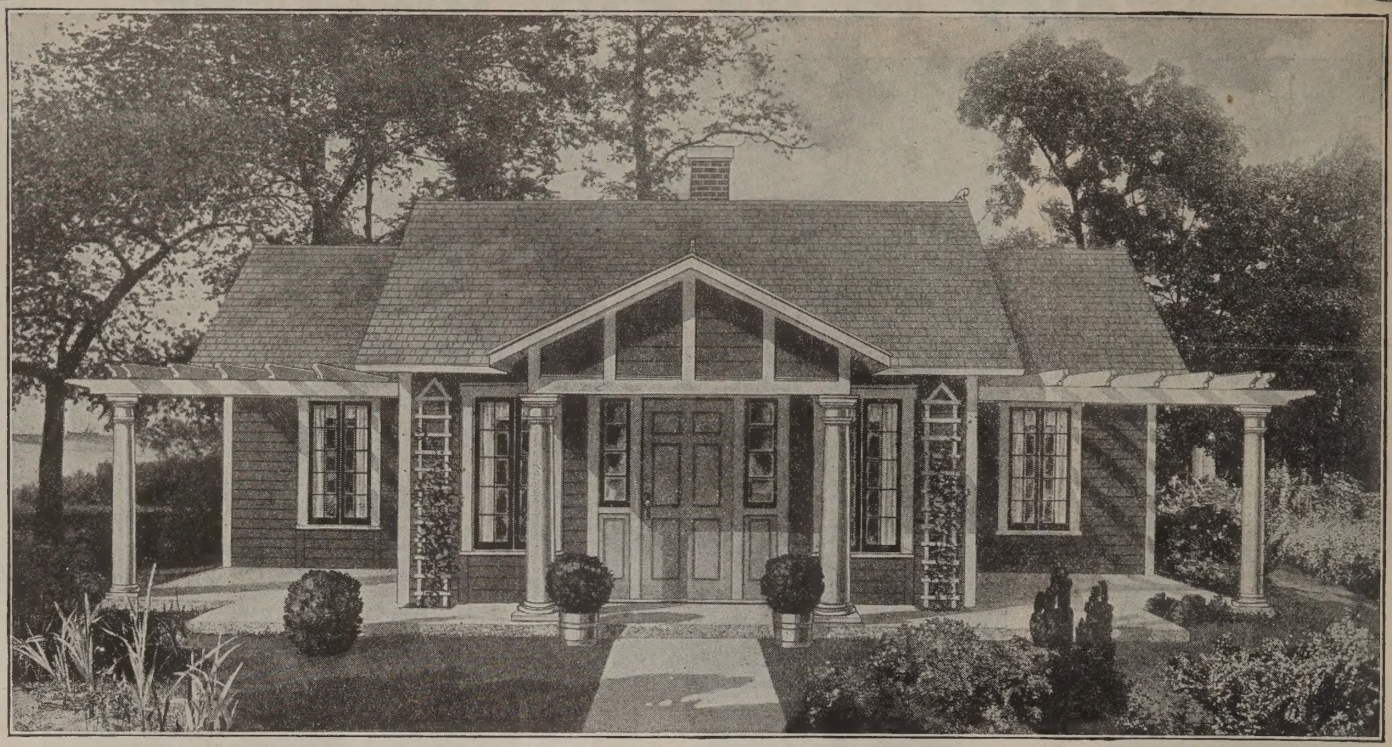
Also, please remember that when you order wall board for your Sectional Building you do not need the extra upper partitions illustrated on the opposite page, because when the rooms are ceiled the space above is closed from view. With the wall board we furnish ceiling joists, nailing strips, panel strips, baseboard, quarter round molding and nails.

See page 57 for complete description of Peerless Wall Board.



MULLION WINDOW SECTION





The ADIRONDACKS

Four-Room Sectional House With Porch and Bathroom. 55C192 Price, **$1,095.00**

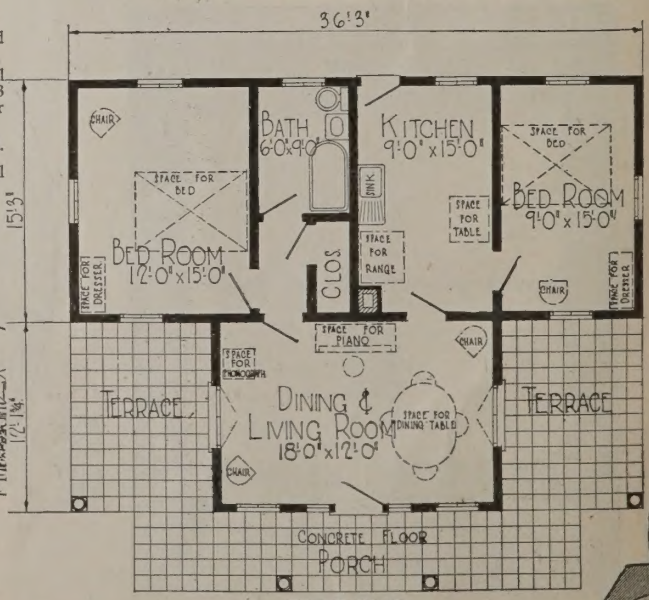
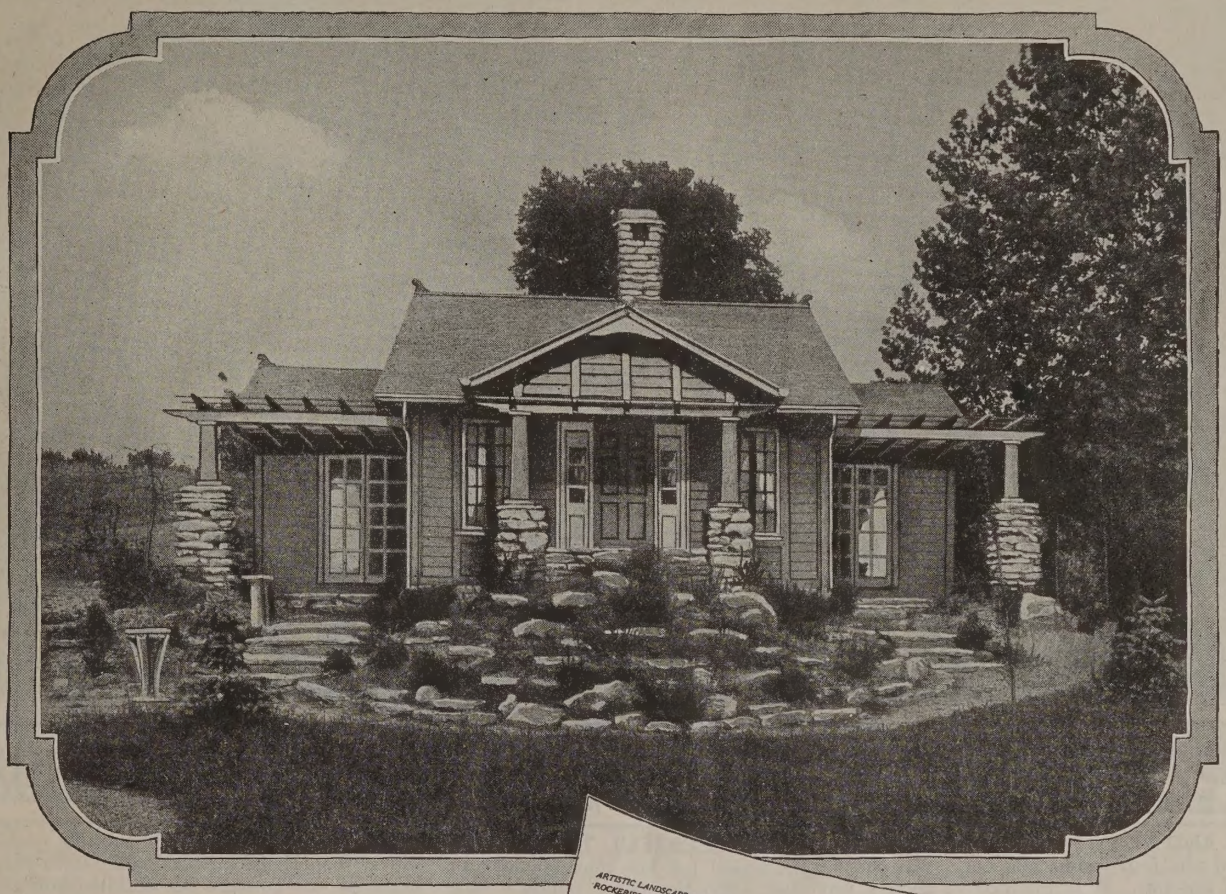
Side and Front Elevation of the Adirondacks.



FLOOR PLAN.



Here is a view of one of the many Adirondacks Portable Buildings we have sold, reproduced from an actual photograph. This gives you an idea of the wonderful possibilities offered you by our designs for making a unique and cozy place at the sea shore, lake or at your country site.

Our Simplex Portable Buildings are used for many purposes other than Summer homes. Here is a man in the landscape gardening business who put up our Adirondacks for an office. Many real estate men do this too.

The Adirondacks, while one of our newest designs, is already very popular. Its popularity is well understood when you have studied the unusually fine arrangement of the floor plan on the opposite page and noted the artistic appearance of this bungalow.

CINCINNATI, O. June 25 1921

Gentlemen;

You will recollect that four years ago when we were in need of an office for the carrying on of our business, after looking over several propositions we decided upon one of your sectional houses.

This spring we sold our former place and moved to another and larger location. Our satisfaction with the sectional houses and we are glad to state that it too has been satisfactory in every way.

the former building prompted us to erect another of your

Very truly yours

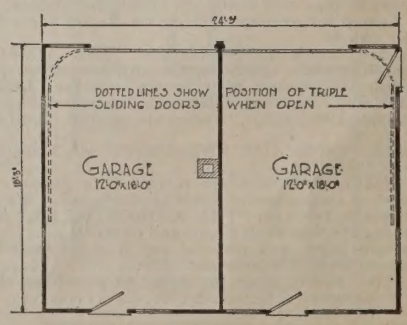
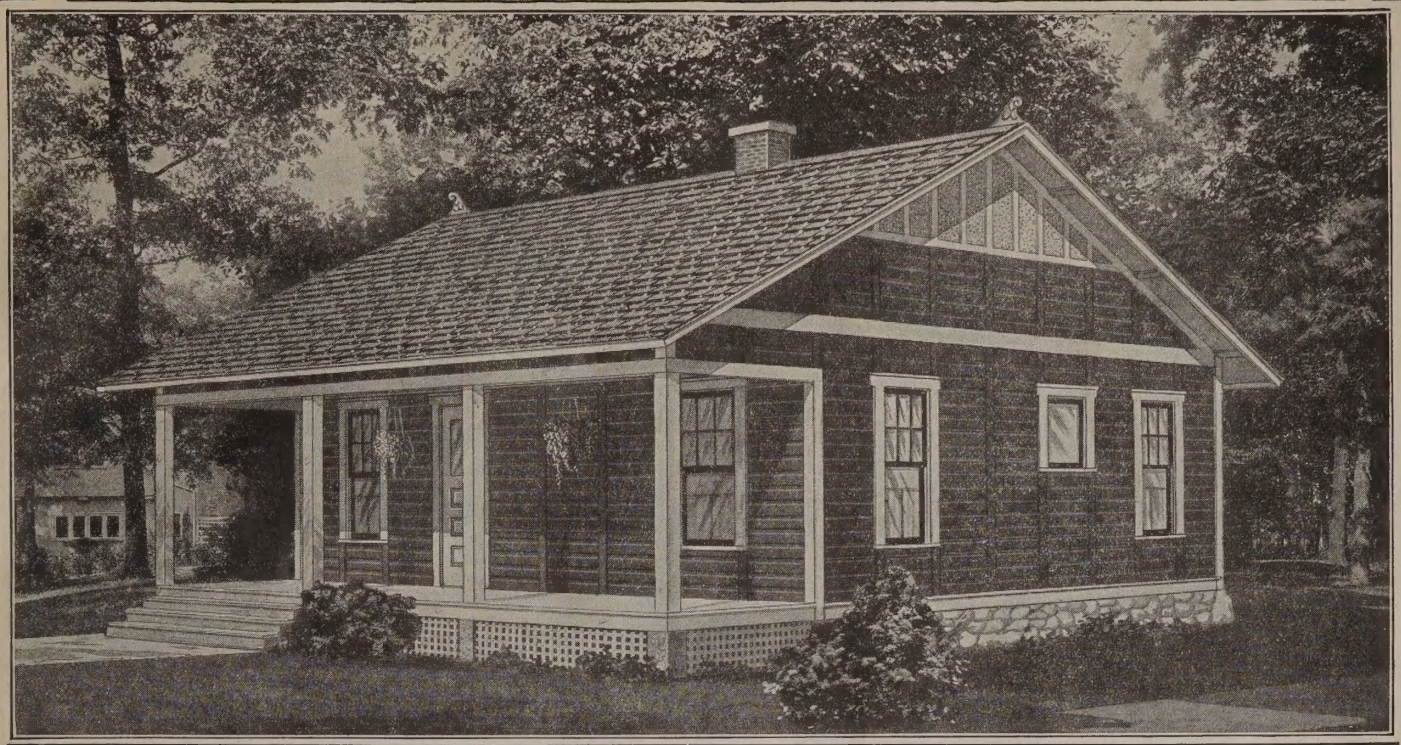
NOTE that there are now two sets of triple sliding doors arranged to slide inward close to side walls.



Floor Plan of Building as Two-Car Garage.



The ORIOLE

Four-Room Sectional House With Bath-room, Two Porches and Breakfast Alcove. **55C132** **Price, $927.00**

The Oriole is a handsome four-room dwelling. It has a good size living room, well lighted by three windows and a glazed door. Conveniently located within easy reach of the living room are two bedrooms, each provided with a separate clothes closet. The kitchen is of convenient size. The two roomy closets afford plenty of space for clothes and trunks. The pantry, big enough to allow for an ice box, and a good size bathroom in which a complete outfit of fixtures can be installed without crowding, are two more very desirable features.

This cottage can be made into an ideal Summer home by screening the large porch. The additional cost for this is only $75.00, including screen frames covered with wire screen ready to fit into place and a screen entrance door complete with hinges, latch and spring.

When the house is used as an all the year around dwelling, the walls should be covered with our Peerless Wall Board, as this retains the heat in the Winter and excludes it in the Summer quite as effectively.

Specifications for Four-Room Sectional House 55C132

SIZE OF HOUSE (Inside)—27 feet wide by 24 feet deep.
PORCH (Front)—27 feet wide by 6 feet deep. Rear porch, 6x8 feet.

The Mt. Vernon

The above are views of the Mt. Vernon Simplex Sectional Building reproduced from actual camera pictures. They show the Mt. Vernon as yours will look when it is completed.

The Mt. Vernon has proved to be one of our most popular Simplex Sectional Buildings. Its beauty and dignity, combined with comfort and economy, seem to be appreciated in every section of the country.

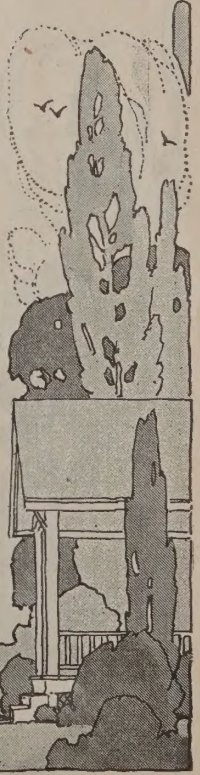
Our customers have sent us photographs of the Mt. Vernon built as a Winter resort in Florida and Alabama. We have many snap shots of this distinctive bungalow providing a restful retreat at the lakes in Wisconsin, Michigan and Ohio, at the seashore and in the hills.

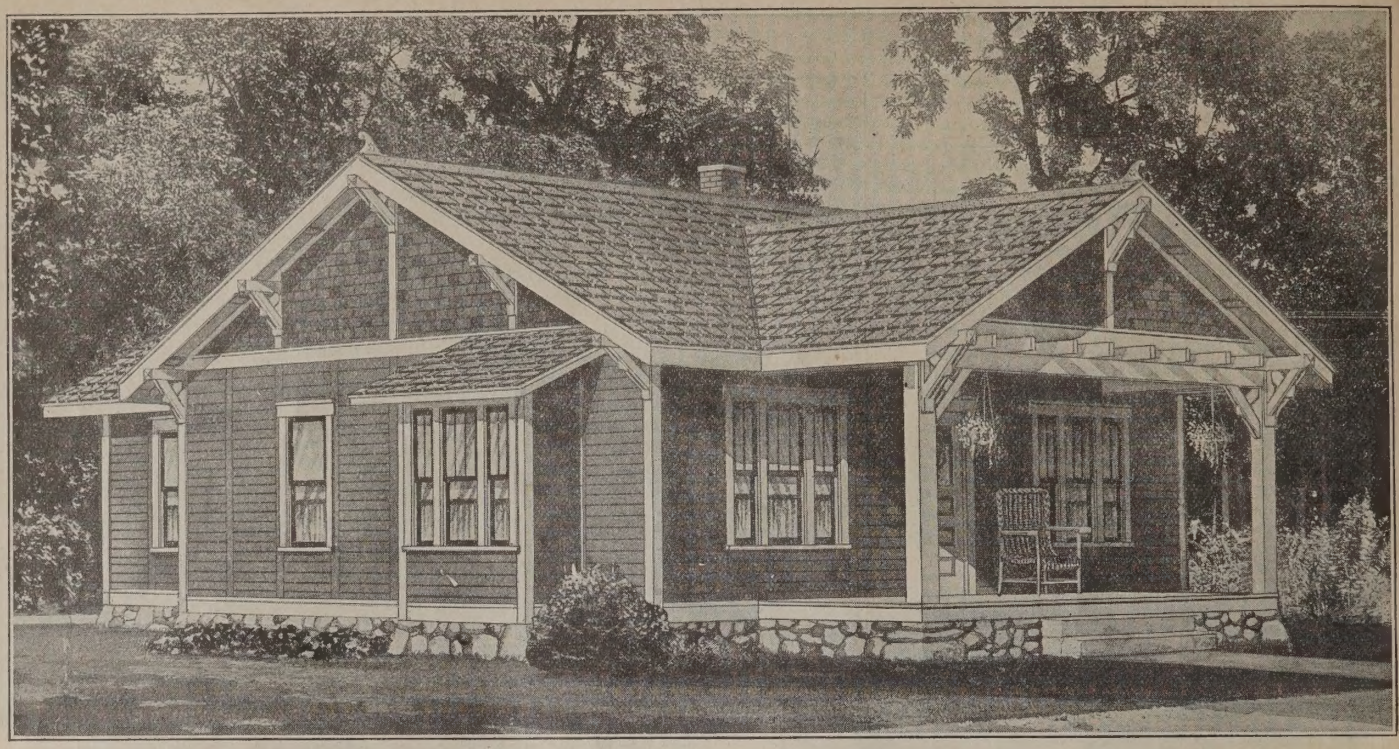
418 W. 25th St., Care of Art Color Co.,
Sears, Roebuck and Co. New York, N. Y.

Gentlemen:—I am sending you a picture of our new Mt. Vernon Sectional House. I can certainly recommend these buildings to anyone. We are nice and warm and cozy in this one during the worst weather. Your Hercules furnace is ideal with the Mt. Vernon, as it keeps the house perfectly warm, no matter what the thermometer reads. I appreciate your square dealings.

A. EHLENBERG.

Building experts and engineers have pronounced our Simplex Sectional Building the most rigid and best type of sectional building construction on the market.





The STRAND

Five-Room Sectional House With Large Front Porch 55C187 Price, $1,058.00

The Strand is built for solid comfort and is a design that will make a very beautiful Summer cottage. The living room has a large bay window at one end, then there is a large cased opening between the living room and dining room. With this arrangement these two rooms can be combined, making one long room running clear across the front of the house. Another excellent feature of these rooms is the generous number of windows. You will like this idea. The bedrooms are the convenient size. Equipped with clothes closets. The kitchen gives easy access to the dining room and has a pantry which is one of the most useful features in connection with this room. You will like the Strand with its large front porch, square columns, pergola rafters and wide overhanging eaves.

We submit this house as a leader in quality, design and price. Note the large Colonial windows. The roof is covered with our Sea Green Fire-Chief Shingle Roll Roofing, guaranteed not to leak or to lose its rich color during seventeen years' service. The gables are shingled with red cedar shingles, which are stained brown.

Peerless Wall Board, described on page 57, may be used for lining, making double wall construction, and the cost will be kept low by the big saving in labor expense. A complete house with walls, floor and roof in sections can be bolted together at a surprisingly small outlay.

Chappaqua, N. Y.

Sears, Roebuck and Co.

Dear Sirs:—The ready made buildings you sent me have proved very satisfactory; in fact, I have been so well pleased with them that I have gone to the extra expense of putting cellars underneath.

Yours truly,

MRS. M. H. WITHERYCOMB,
Supt. of Children's Aid Society.

You will see by the floor plan that after the proper space has been allowed for furniture, there is plenty of room in the Strand.

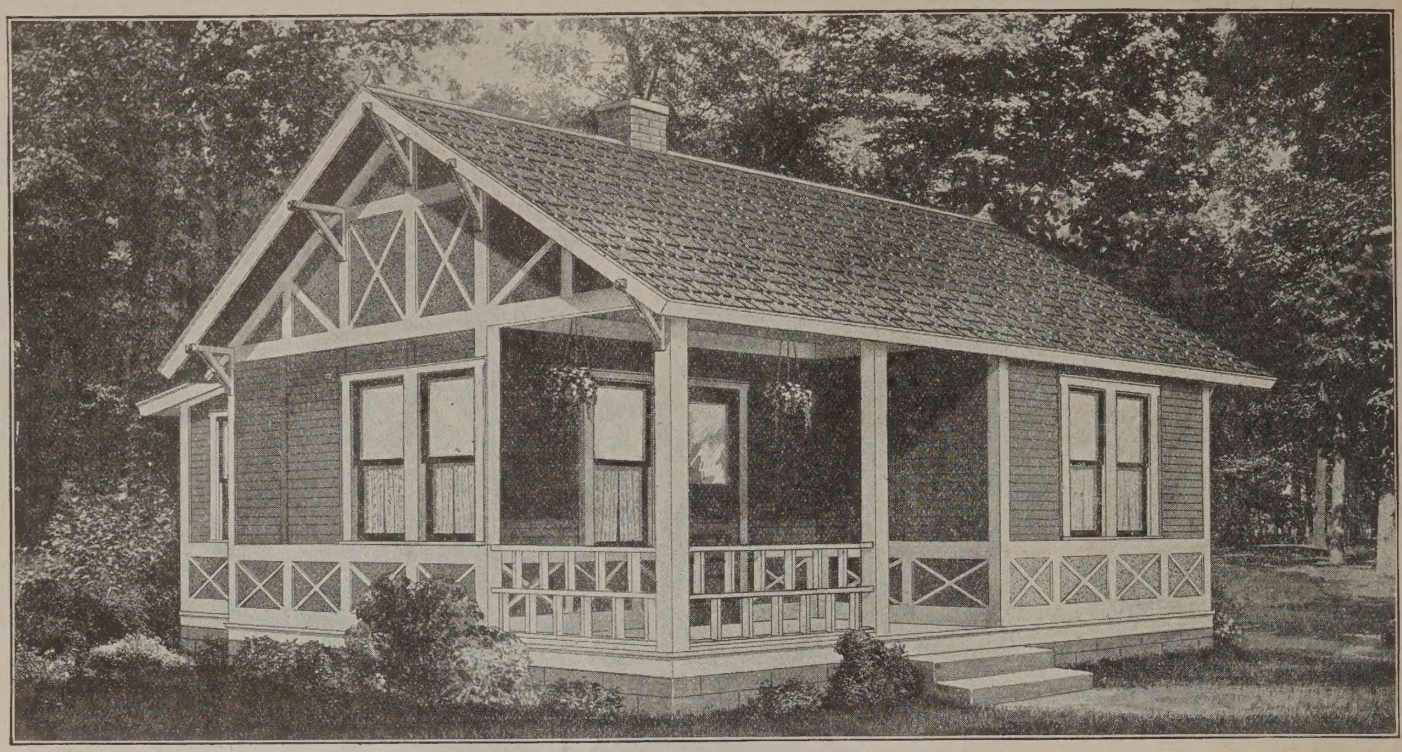
THE FRONT PORCH OF STRAND, SCREENED



The YELLOWSTONE

Four-Room Sectional House With Porch and Bathroom 55C205 Price, $795.00

In the Yellowstone Sectional House 55C205 we have provided a design that can be used for many years. The bathroom is a new feature in sectional buildings, so that living arrangements can be made perfectly modern. Cost of bathroom fixtures not included in price.

With a house of this kind erected in a farming country, among the hills, on the seashore or lakeside, all the pleasures of modern life can be enjoyed. The material is first class in every respect. The design is artistic, with Fire-Chief Shingle Roll Slate Surfaced Roof, Sea Green Slate Surfaced Siding, which gives the appearance of stucco finish for upper and lower panels, and spacious front porch. If, desired, the rear portion, consisting of kitchen, bathroom and closet, can be omitted and one of the bedrooms used as a kitchen. If wanted in this way, we will furnish Sectional House 55C207 for $613.00. The rear addition slopes from 8 feet to 7 feet 6 inches.

"Back to the land" is the cry now heard on every side. No one questions the desirability of the movement to relieve the congestion of the cities and utilize the vast areas that still remain unoccupied. Hundreds of thousands of people would like to enjoy the pure country air and to get the benefit of the fruits of the earth. It has been demonstrated that even on one acre of land within riding distance from the centers of trade, a large family can be supplied with vegetables and fruits practically free from expense during the entire season. The chief difficulty that presents itself to the man who is anxious to move his family to the country is the cost of putting up a permanent residence. In this case the sectional house solves the problem. It is low in cost and can be put up by any handy person.

Reading Center, N. Y.

Sears, Roebuck and Co.

Gentlemen:—The portable house I purchased of you in 1910 has given entire satisfaction. Have made it my home on a farm since that time and have found it very comfortable. Of course, to increase the warmth I sealed it with ⅜-inch ceiling in connection with building paper. As the Winters are quite severe here, found it necessary to do this, although I think in a milder climate it would have been unnecessary.

Very truly yours,
C. H. CONKLIN.

Remember, our Simplex Houses are SECTIONAL—not merely ready cut. They come in sections, ready to be bolted together. No nailing necessary.

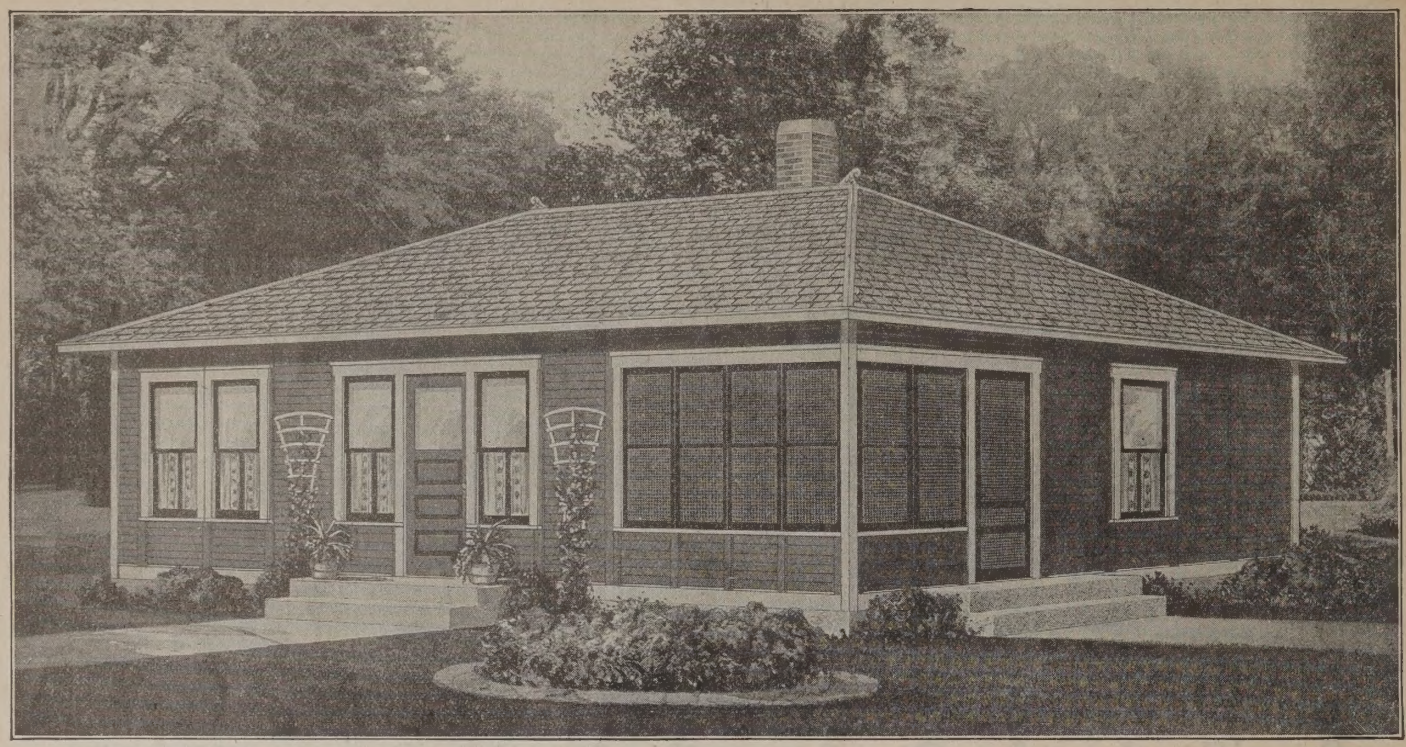
House shipped complete from factory in SOUTHERN ILLINOIS.



The WASHINGTON

Four-Room Sectional House With Screened Porch. 55C136 Price, $798.00

The U. S. Department of Agriculture has prepared a scientific design of house of a size consistent with the needs and convenience of the average family. Realizing the importance of this proposition and knowing that it will be of interest to thousands of builders everywhere, Sears, Roebuck and Co. have decided to furnish the material for this model farm house at their usual money saving prices. As the cost of labor is practically cut out, our price for the materials for this model farm house represents about the total cost for the house complete.

Our Sectional Farm House 55C136, modified so as to be better adapted to the Sectional type of construction, is arranged for the greatest economy of floor space. Not a square foot of area is wasted. Allowance is made for every necessary article of furniture, so situated in relation to door and window openings as to take up the least amount of room possible. The cost has been kept remarkably low by omitting such projections as bay windows, gables and dormers, and by choosing a four-cornered practical looking structure, which is made neat and tasteful in appearance by a careful grouping of the doors and windows, instead of by adding expensive and useless decorations.

This is really a five-room house, as the screened porch can be used as a play room, sleeping porch or work room. This size dwelling house at $798.00 represents unusually high value for the money.

There is an entrance by way of the screened porch, from which one door leads directly into the living room and dining room; the other door leads into the kitchen. This arrangement permits the men to wash and leave their raincoats, boots, etc., within the porch, from which they can pass into the dining room and living room without disturbing the women in the kitchen.

In the Summer the screened porch is one of the most pleasant and livable nooks in the house. Much of the kitchen work, such as washing or ironing, can be done there. It is practically out of doors, but well sheltered from the sun. There is room enough for an ice box, churn, brooms, mops and pails.

The kitchen is pleasantly located at one corner of the building and commands a view of the road, garden, barns and lawn. It is so ventilated that the fumes and heat from the cook stove will blow directly out of doors and not pass through the rest of the house. The stove is within 6 feet of the most distant fixture in the kitchen and but little farther from the dining table. Close to the kitchen door is a good location for a dust trap for kitchen sweepings. This could lead under the floor through a chute and could be emptied from the outside. A work table may be placed directly in front of the window, with a fuel box underneath. The sink and cupboard are within easy reach of one another, being separated only by a good size window.

The living room and dining room are combined as one large room. The windows at both ends of the living and dining room may be opened wide, giving a cool breeze through the house in the Summertime.

The alcove bedroom is entered from the living room side by a large cased opening, in which portieres may be hung. The other bedroom is entered from the dining room side. Being situated at the corners of the house, these bedrooms command a view in two directions. Two closets are provided, one for each bedroom.

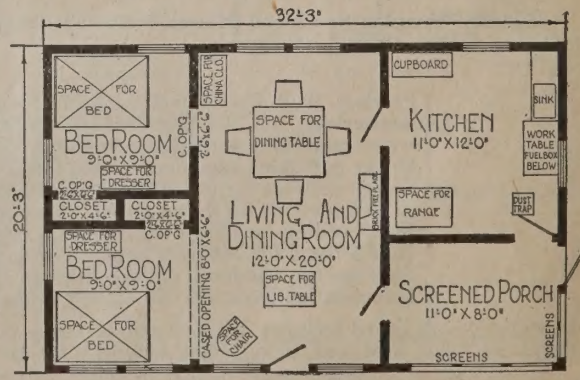
The various articles have been shown on the floor plan as a guide in furnishing the house and are not included in the price.

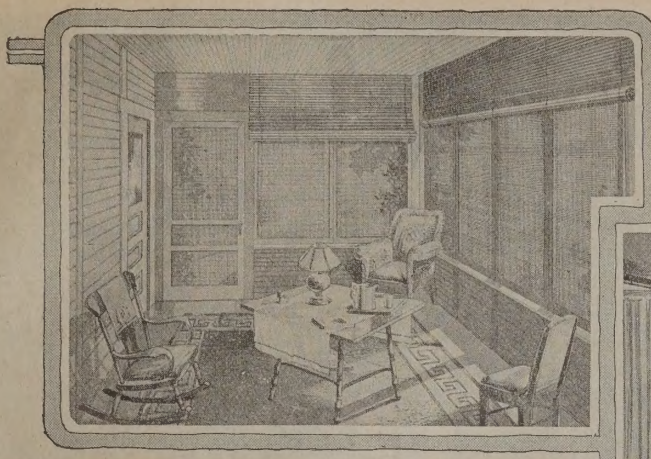
160 Greenwich St., New York, N. Y.

Sears, Roebuck and Co.

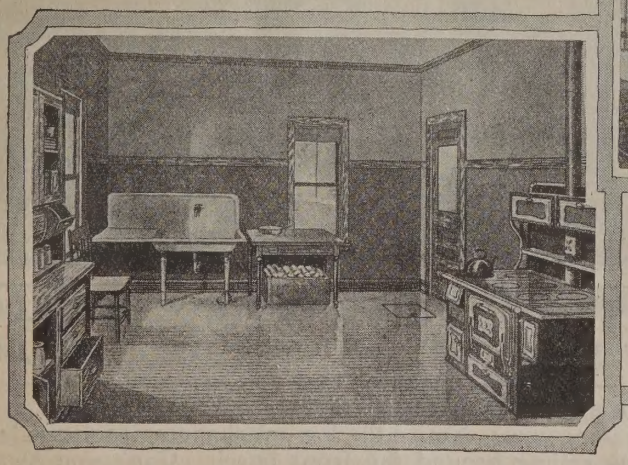
Gentlemen:—I have found your portable house which I bought two years ago of great service to me and I have had it in several places within that time. I would be very much interested in a new catalog of what you now offer. Yours very truly,

F. MITCHELL.





THE SCREENED PORCH
IS A FINE PLACE TO ENTERTAIN YOUR COMPANY
ON WARM SUMMER EVENINGS.



THE COMBINED LIVING AND DINING ROOM
IS AN EXCELLENT FEATURE.

THE KITCHEN IS CONVENIENTLY ARRANGED.

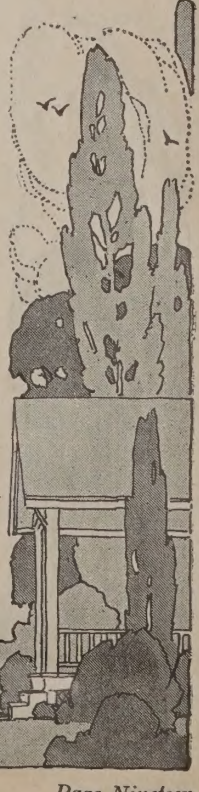
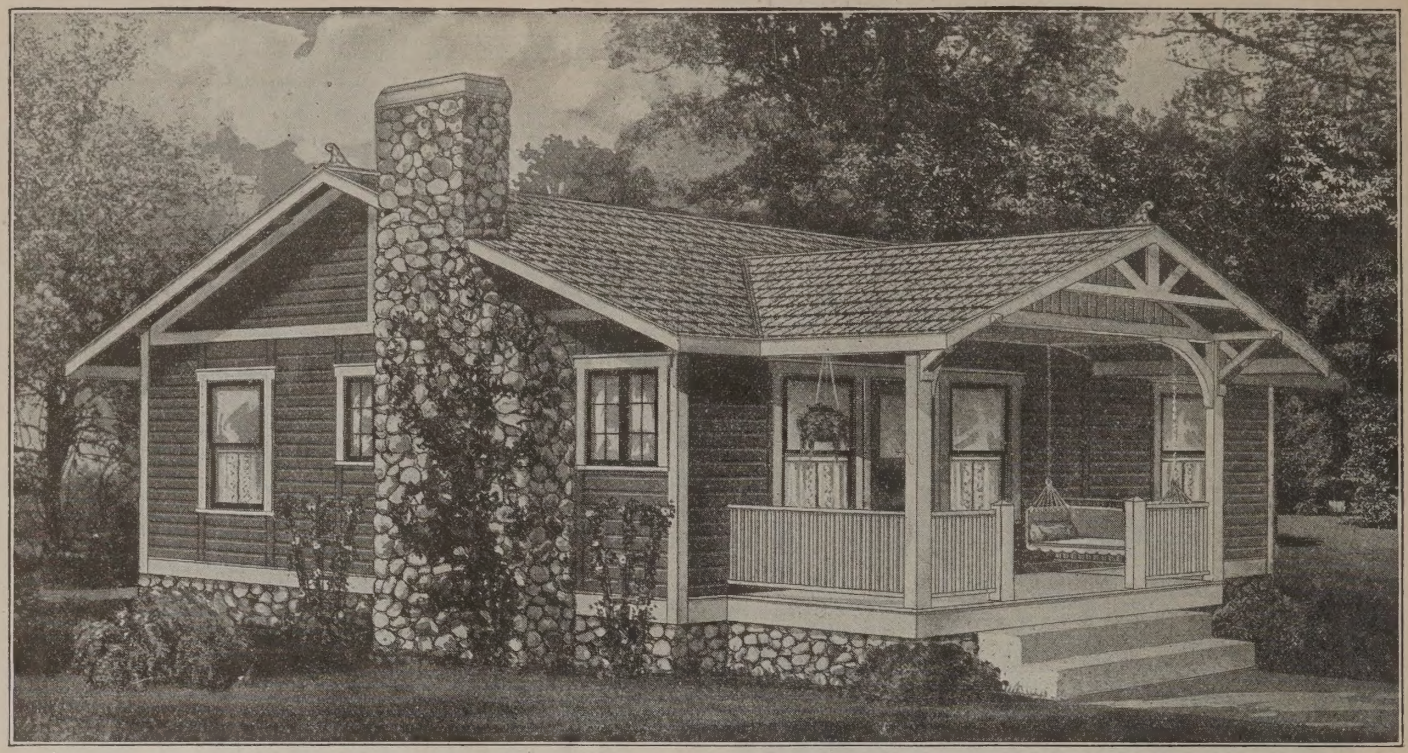
House shipped complete from factory in SOUTHERN ILLINOIS.





The ALPS

55C188—Five-Room Sectional House With Porch. Size, 27 feet 3 inches by 21 feet 3 inches. Price..... **$748.00**

55C337—Five-Room Sectional House With Bath and Porch. Size, 30 feet 3 inches by 21 feet 3 inches. Price.... **951.00**

Chimney, brick, stone and cement work not included in above price.

The Alps is a cozy, substantial, conveniently arranged bungalow. Notice the low overhanging roof, the large square columns, the plain Colonial porch brackets, and the railing around the front porch. Can't you picture to yourself the happiness of living in a bungalow like the Alps? The Alps can be furnished in either of the two floor plans shown on this page.

The Alps, 55C337.

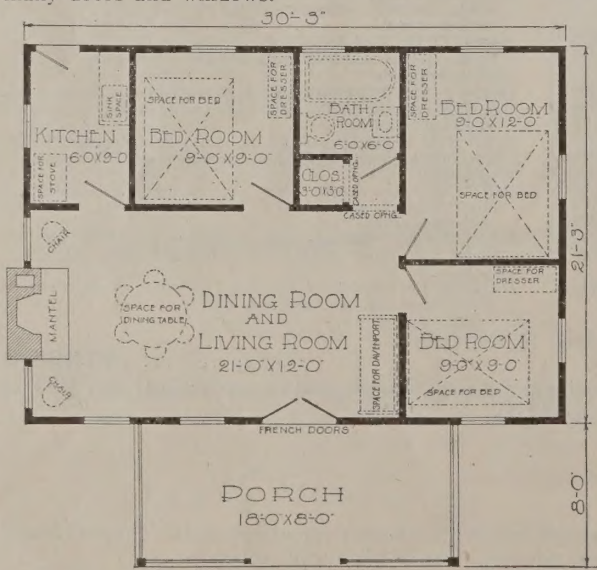
You will like THE ALPS, 55C337, with larger porch, big living room and dining room, and three bedrooms instead of two as provided in THE ALPS, 55C188.

The bathroom is also an added feature and the kitchen is just a convenient size for a Summer bungalow.

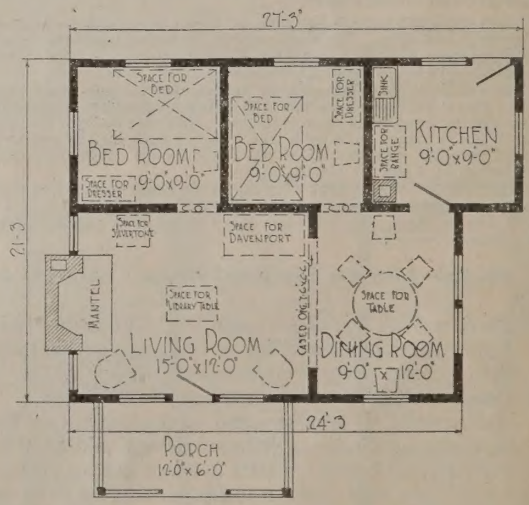
Plenty of fresh air and light is insured by the many doors and windows.

The Alps, 55C188.

When you enter the front door into the living room you will notice a large cased opening, 8 feet by 6 feet 6 inches high, connecting living and dining room. Then, as you look around through the other rooms in the Alps, you will see that they are all well lighted and ventilated. The entrances to the two bedrooms are cased openings, 2 feet 6 inches wide by 6 feet 6 inches high, and look very attractive when closed with portieres. If doors are wanted for these openings, the extra charge will be only $5.00 each, including hardware fitted in place.



Floor Plan of 55C337. Price, **$951.00.**



Floor Plan of 55C188. Price, **$748.00.**

Remember, our Simplex Houses are Sectional —not merely ready cut. They come in sections ready to be bolted together. No nailing necessary.

THE LIVING ROOM HAS A CHEERY HOMELIKE APPEARANCE.

Price of wall board includes 2x4-inch ceiling joists, panel strips, baseboard, quarter round and nails. The wall board is furnished in plain brown finish for lining and ceiling, making double wall construction. The sheets are 3 feet wide and cut in proper lengths to fit ceiling, any window, door or plain wall section. (See page 57.)

House shipped complete from factory in SOUTHERN ILLINOIS.

When screened porch is furnished, columns are not necessary. (See screened porch illustration on page 15.)

The SILVERHORN

Four-Room Sectional House With Two Porches. 55C186 Price, $678.00

You'll like the arrangement of the Silverhorn, it is simple, compact, convenient and homelike in every respect.

This cottage presents a very fine appearance. The walls are made attractive with panel work and brackets, which may be painted to match the door and window casings, thus forming a pleasing contrast with the body color of the building. The gable is finished with Sea Green Slate Surfaced Roofing and fitted with three four-light windows. (See illustration.)

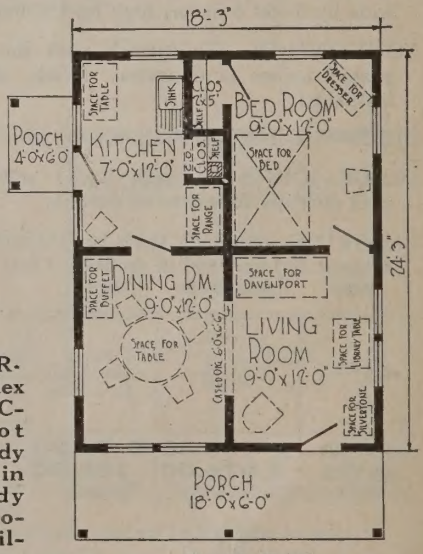
Our seventeen-year guaranteed Fire-Chief Shingle Roll Slate Surfaced Roofing on the roof, the side walls painted gray, and the corner brackets along the base make this a very handsome dwelling house.

The front porch is handsomely decorated with square posts and a solid spandrel along the top. The small side porch is a new feature in Sectional Buildings and a very convenient one, giving easy access to the kitchen without having to walk clear around to the rear of the house.

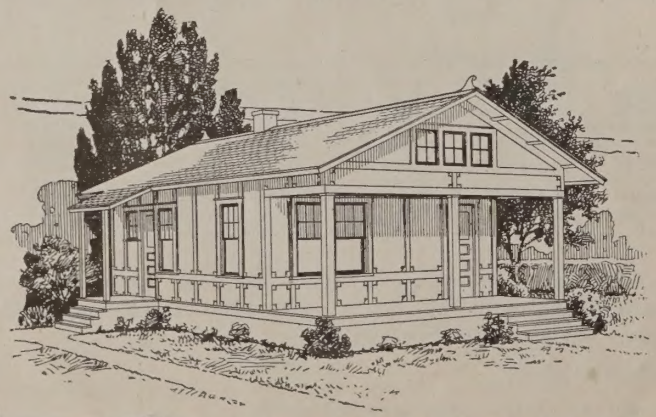
The large windows have the upper half divided into six lights. The dining room has a double window in front and a single window on the side. Living room has a double window on the right side, providing splendid ventilation for both rooms.

A four-room cottage of such neat design and at so low a price is well worth having and represents unusually big value for the money invested. (See illustration showing floor plan.)

During Summer the large front porch may be screened and used as an extra sleeping room. The cost of screening porch, 55C186, is only $60.00 extra. This price includes screen sections covered with 16-mesh wire screening, and ready to fit in place; also the screen door for entrance, including hinges, latch and spring.

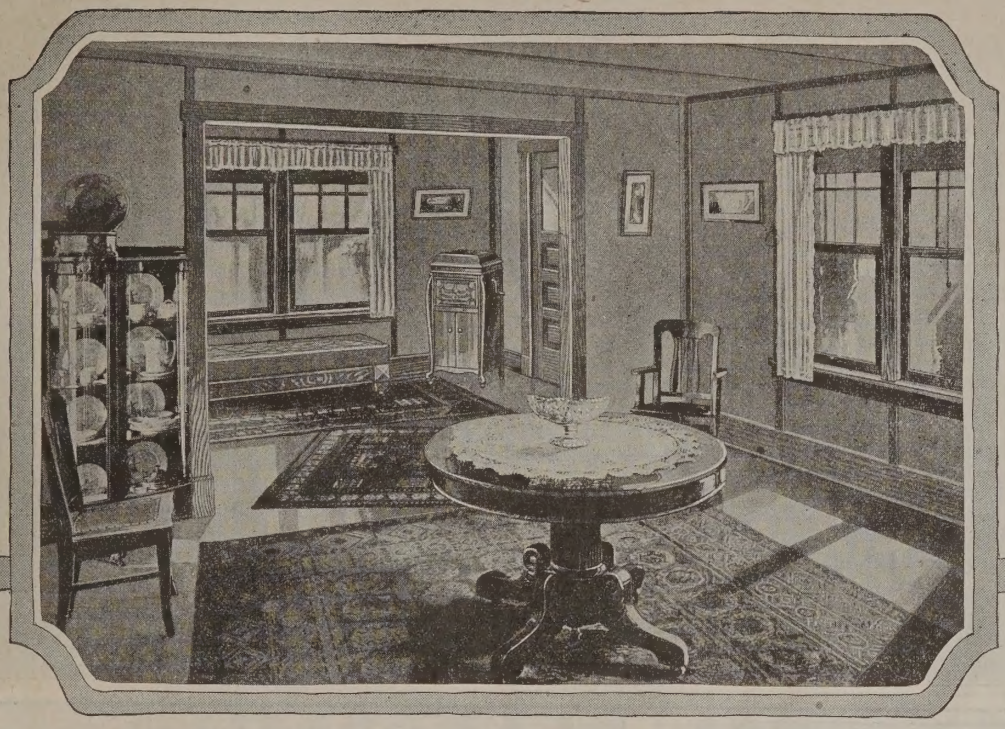


FLOOR PLAN



THE SILVERHORN Simplex House is SECTIONAL — not merely ready cut. It comes in sections, ready to be bolted together. No nailing necessary.

Simplex Sectional Buildings must satisfy you. Read our liberal offer on the order blanks in the back of this book.



THE LIVING ROOM AND DINING ROOM.

THIS PICTURE SHOWS YOU HOW ATTRACTIVE THE ROOMS CAN BE MADE WHEN LINED WITH OUR PEERLESS WALL BOARD AND PAINTED.

Shipping weight of Wall Board and accessories, about 2,000 pounds.

House shipped complete from factory in SOUTHERN ILLINOIS.

The BOWER

Five-Room Sectional House With Large Porch and Bathroom. 55C189 Price, $1,089.00

The Bower is built on the square plan. For economy, attractive and convenient arrangement of rooms the square type affords less waste space than any other design. This is only one of the many good features in favor of this attractive bungalow. There is a large front porch extending the entire width of the house, supported with large Colonial columns. Then see how the dormer puts artistic taste into the Bower. You will like the arrangement of this house. The rooms are all well lighted and ventilated. You can see when you enter through the front door the interior is practical and homelike. Not a single thing has been forgotten. The bedrooms are provided with clothes closets.

Specifications for Sectional Suburban Home 55C189, Constructed of High Grade Materials.

SIZE OF HOUSE (INSIDE)—24 feet wide by 30 feet deep.

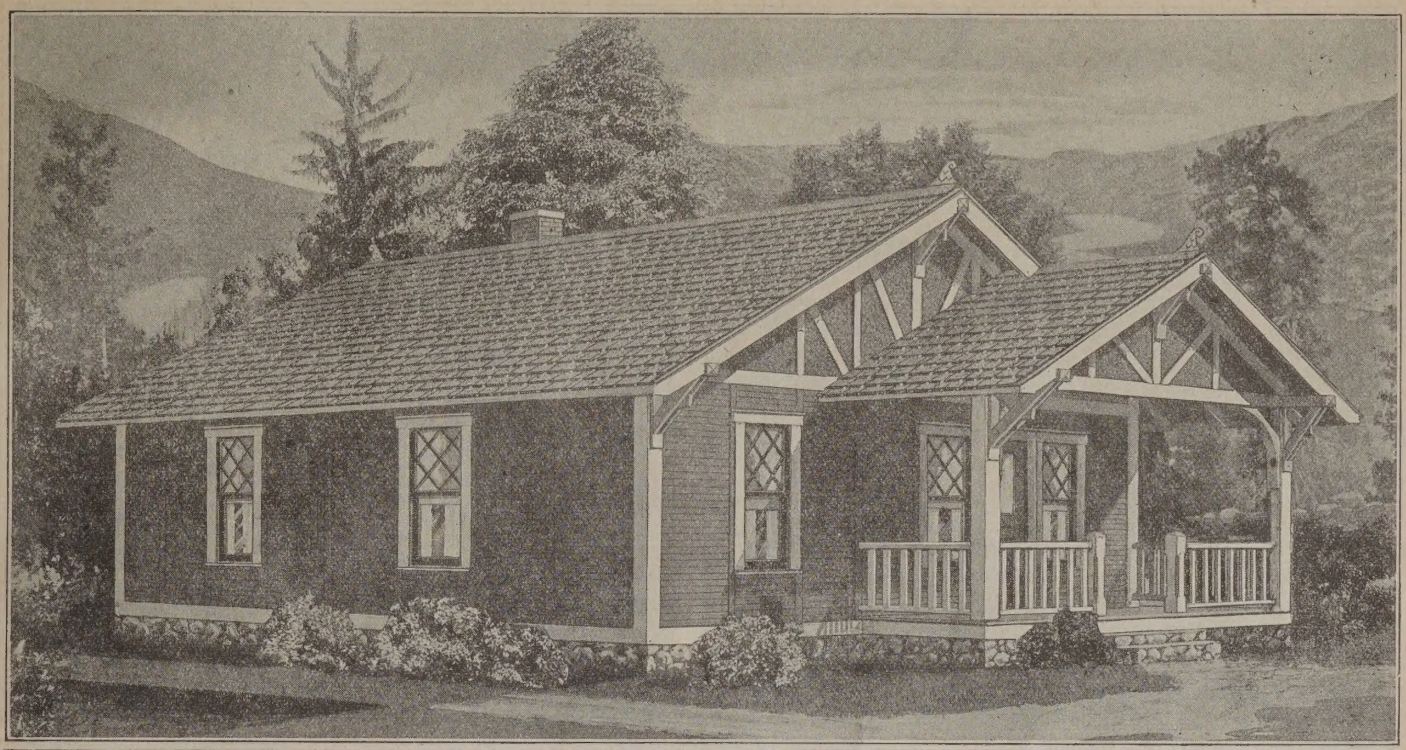
FLOOR PLAN.



The CLOVER

Four-Room Sectional House With Porch 55C190 Price, $835.00

Isn't the Clover a beauty with its wide overhanging eaves and artistic paneled gables—covered with gray Oriental Slate Surfaced Roofing which has a close resemblance to stucco? Can't you imagine the Clover on the shore of a beautiful lake with the water stretching out before it? Notice the floor plan. There is a living room, kitchen, two bedrooms and a front porch, which is made very attractive by the brackets and porch railing. Just the right size Summer cottage for the average family. The Clover is a typical design of Simplex Sectional construction and quality. Erect your own Summer cottage. The sections are shipped to you plainly numbered. All you have to do is to assemble them according to the simple instructions and plans which we furnish.

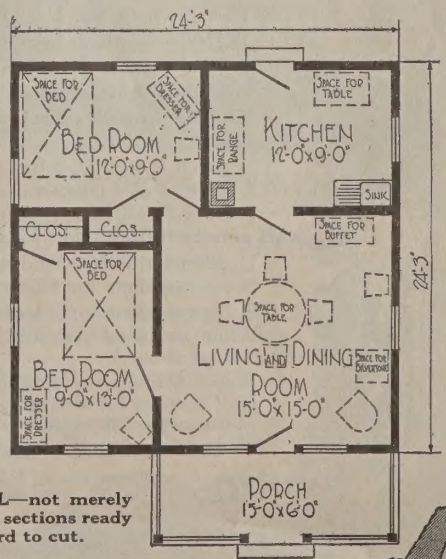
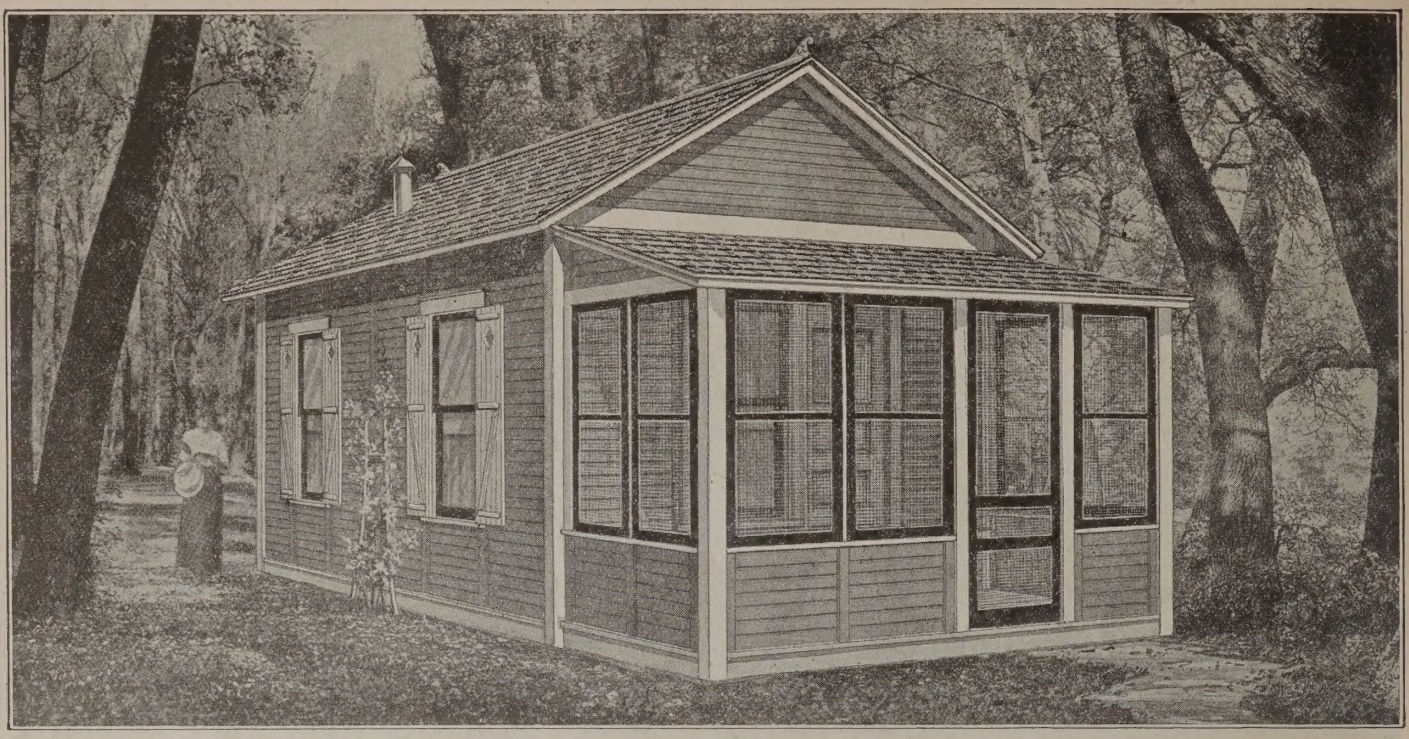
House shipped complete from factory in SOUTHERN ILLINOIS.

The Clover was built at Iowa City, Iowa (see picture to left), by Walter J. Coppock. He says:

Gentlemen:—We have now lived in our home (your 55C190) for more than a year and are thoroughly satisfied with it. Last Winter was very cold and stormy, with thermometer indicating at times as low as 28 degrees below zero, but we burned less than $30.00 worth of coal. I paid out less than $20.00 for work on my house, and except that for a day and a half's work for two of us I built and finished it myself.



THE CLOVER Simplex Bungalow is SECTIONAL—not merely ready cut. The floors, walls, roof and partitions come in sections ready to be bolted together. No nailing necessary—not a board to cut.



The DELLS

Two-Room Sectional House With Porch **55C121** **Price, $348.00**

Window shutters and porch screens are not included in above price.

You will find THE DELLS a very desirable investment. In addition to the living room and kitchen an ideal sleeping room can be arranged for a small additional sum by screening in the front porch, as illustrated above. At small cost you can add to the appearance and insure privacy by providing shutters for the windows. Yourself and a friend can erect this Simplex house, ready for occupancy in a day or two.

Specifications for Simplex Sectional House 55C121

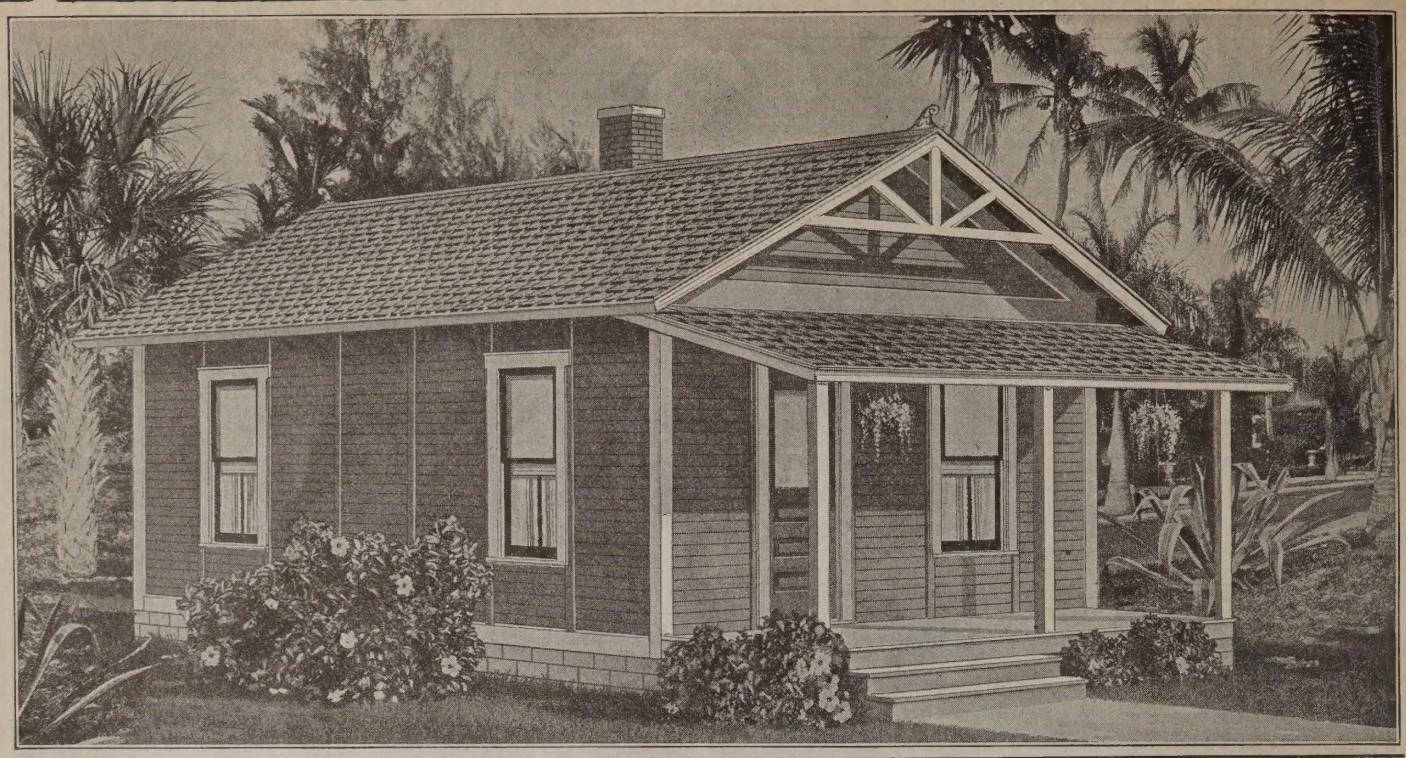
Price.....**$221.00**
Other sizes on request.

The buildings illlustrated on this page are made of the same high grade materials as our larger and more expensive houses. If Peerless Wall Board is desired, we will be glad to quote prices for lining any of these buildings. We can ship promptly and guarantee safe delivery.

Sectional Playhouse 55C129, Sectional Hunters' Cabin 55C1 and Sectional Photograph Studio 55C126 are furnished with floors at the prices quoted. For floors for other buildings write for prices.

NOTE—Sectional Boathouse 55C115 has a platform 3 feet wide extending along the sides and rear. Sectional Photograph Studio 55C126 has a darkroom 3 feet by 6 feet with shelf. Sectional Stable 55C134 has two stalls, each 5 feet by 8 feet, and a feed room 5 feet by 6 feet.

Sectional Building prices shown on this page include cedar foundation posts. If foundation posts are not wanted, deduct $6.00 from the price of the building you order.



The GOLDENROD

Three-Room With Porch. Sectional 55C122 House Price, $462.00

The Goldenrod is one of our most popular cottages. It will make a delightful Summer cottage for a small family. This design house is also preferred for use in coal mining districts and industrial centers in general. Turn to page 31 and you will see how quick and easy it is to erect a Simplex Sectional Building like the Goldenrod. Simplex houses are carefully made, their quality is guaranteed and always an exceptional value for the money.

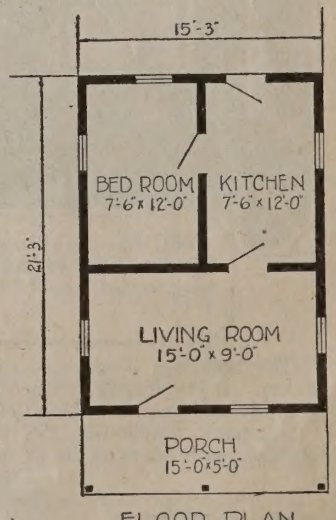
House shipped complete from factory in SOUTHERN ILLINOIS.

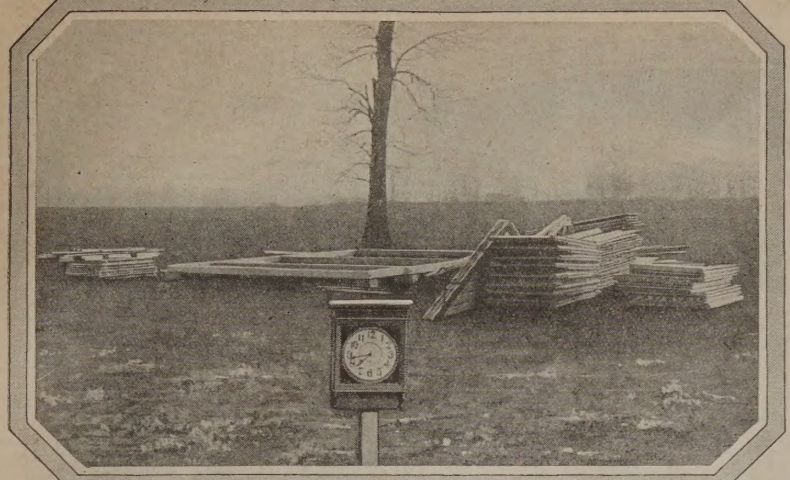


FLOOR PLAN.

This House Was Put up in Eight Hours only Two Men Required

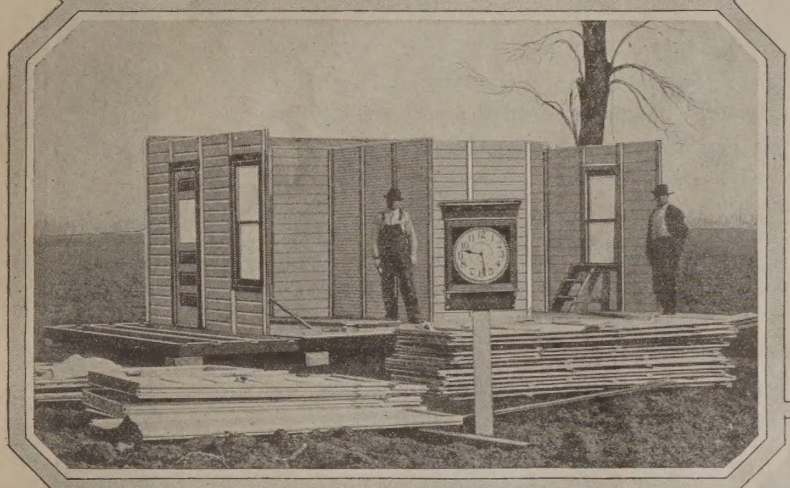
See Affidavit on Page 32

If you want a house in a hurry, at small cost, here's your chance.



Eight o'Clock.

The first picture shows all the sections on the ground ready for erection. They include the floor, walls and roof sections of our three-room Sectional House 55C122 shown on page 30.



Half Past Nine.

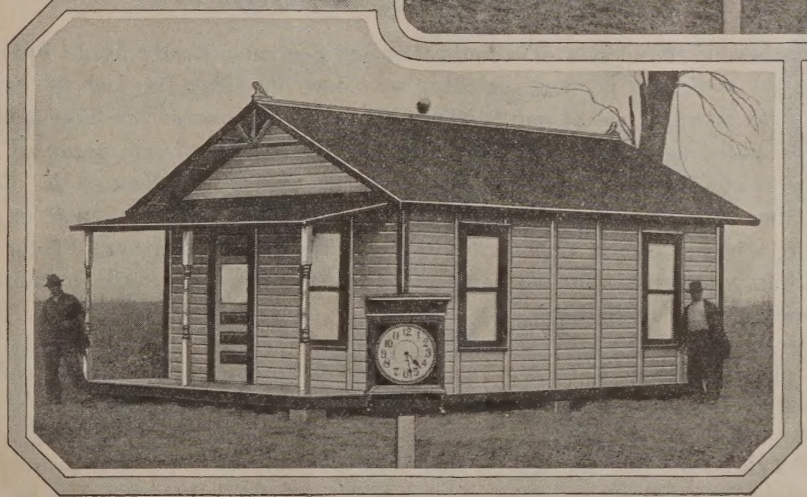
The next picture, taken an hour and a half after work was started, shows three sides of the building in position, part of the interior partitions and most of the floor sections set in place.

Eleven o'Clock

By 11 o'clock the entire wall and interior partition sections have been put in position and all the doors and windows hung in their frames.

You Can Do This and Reduce Your Building Costs

Read the Letters on Page 49



Four Thirty.

This picture shows the house completed and the men ready to go home, having completed the job in about eight hours. This proves the great economy of our Simplex Sectional Buildings and illustrates how easily the parts are assembled.

AFFIDAVIT of Kennedy

SHORT GENERAL AFFIDAVIT Form 155 B E. Y. Horder, Printer, Chicago

State of ILLINOIS } ss.
County of ALEXANDER }

E. A. KENNEDY

of the City of CAIRO County of ALEXANDER

and State of ILLINOIS. being duly sworn, doth depose and say that

On the 22nd day of January, 1914 the Ready-Made House shown in the accompanying photographs was erected by two men in 8 hours and 33 minutes, during which time the men quit work 30 minutes for lunch. Deponent further says, that the Ready-Made Garage also shown in the photographs was erected by two men on the same day in 6 hours and 15 minutes, 30 minutes of this time being devoted to lunch. The clock placed opposite the buildings faithfully records the exact progress.

And further this deponent says not.

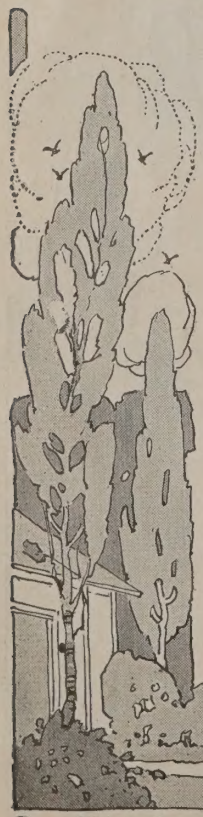
E A Kennedy (1)

L. L. COMINGS NOTARY PUBLIC ALEXANDER CO. ILL.

Subscribed and sworn to before me this 31st day of January A. D. 1914.

E. E. Comings (2)
Notary Public

(1) This line is for signature of affiant.
(2) These two lines are for signatures and title of officer administering oath.



Convincing Proof

In order to prove beyond the shadow of a doubt that our Sectional Ready Made Buildings are easy to erect and that the work can be done quickly, we show on pages 31 and 36 reproductions of actual photographs taken while one of our Sectional Garages and one of our Sectional Houses were being put up. The clock, shown in the foreground, records the exact time occupied in putting up these two buildings ready for occupancy. Not satisfied with this, we supplement the pictures showing the time in which these buildings were erected with a photographed reproduction of an affidavit signed and sworn to before a notary public, thus legally establishing the absolute truth of our claim that the Sectional Garage was put together in five hours and forty-five minutes and the Sectional Three-Room House in eight hours and three minutes.

This series of photographs and affidavit furnish absolute proof of the EASE and RAPIDITY with which Simplex Sectional Buildings can be erected. Turn to pages 31 and 36.

The houses and garages in this book are sold on terms that insure complete satisfaction. Acquaint yourself with these liberal terms by referring to order blanks in back of this book.

FACTORIES AT DAYTON & CHICAGO

Sears, Roebuck & Co.,
Chicago, Ill.

Gentlemen:

This is to certify that we have purchased some twenty of your portable houses during the past three months and we are pleased to report that they have come to us as represented in every particular.

We are handing your representative some photographs showing the cottages after having been erected, which we trust may be satisfactory.

Yours very truly,

THE DAYTON ENGINEERING LABORATORIES CO.

G. B. McCann,

Secretary & Treasurer.

GBM/B.

Testimony Worth Having

Throughout this book you will find letters from people who have purchased our Sectional Houses and who speak with experience after having lived in them for a considerable length of time. We take particular pleasure, however, in reproducing the letter to the left and in submitting to you on the following pages pictures reproduced from actual photographs. Here we show you our Sectional Houses as actual Summer residences, occupied by people whose judgment in selecting our Sectional Buildings in preference to others is about the best endorsement you could ask for. The Dayton Engineering Laboratories Co. is a firm well and favorably known to all manufacturers of automobiles and automobile supplies as well as to all owners of automobiles. We ask this question: If the Dayton Engineering Laboratories Co. have found our Sectional Buildings satisfactory in design, quality and price, is it not reasonable to suppose that Simplex Houses and Garages represent the biggest value anyone could desire? Look over our line. We have a house suitable for every requirement. We have a garage that will provide protection for any style or design of machine.

Read the letters on page 49.

Sears, Roebuck and Co.

Gentlemen:—We are all pleased with the portable garage you recently shipped to Mr. Richard H. Parry, Woodbridge St., Cambridge. Friends who see it admire it very much and when we tell them the price, they hardly believe it. I sincerely hope you will sell many more in this locality and believe you have made many good friends hereabouts.

Yours respectfully,
W. ALLEN PARRY.

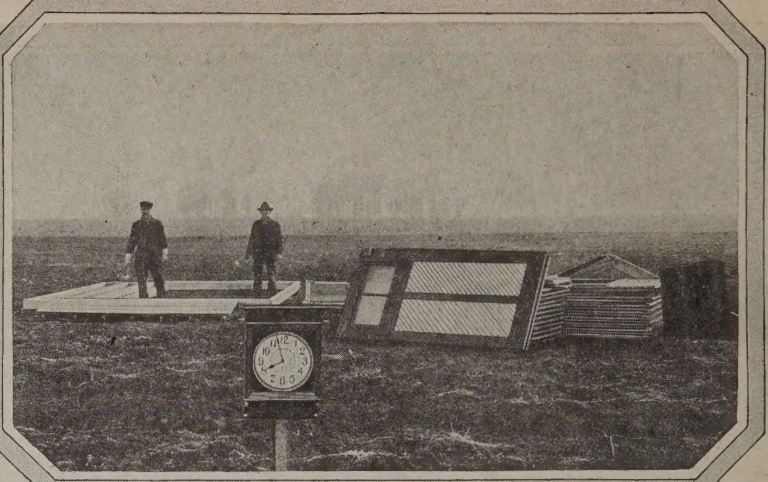
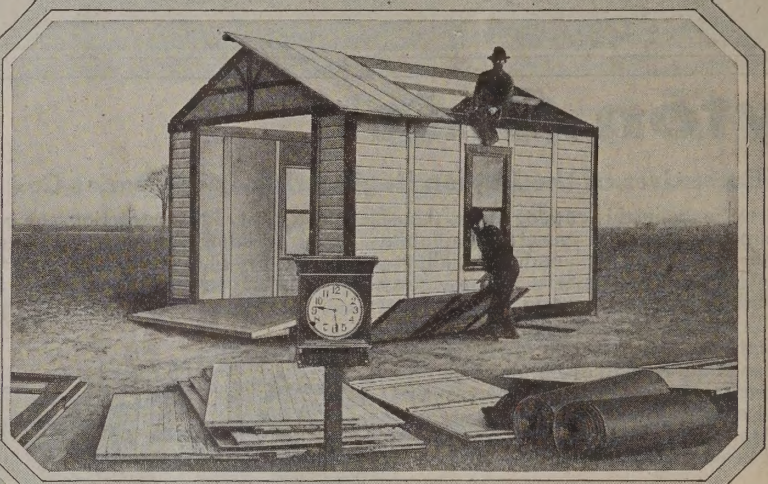
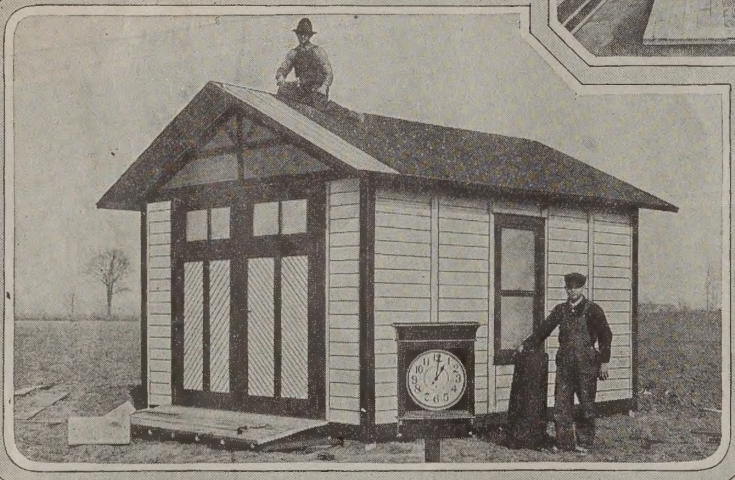
This Garage Was Put up in Five Hours and Forty-Five Minutes

See Affidavit on Page 32





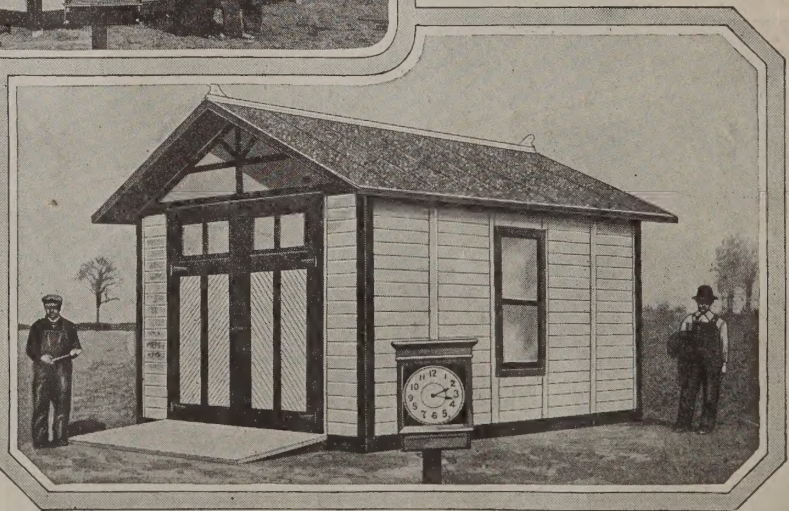


Eight o'Clock.

The first picture, taken a few minutes before eight o'clock, shows the sections of Sectional Garage 55C17 on the ground ready for erection. For a complete description of this Sectional Garage 55C17 see page 37.

Half Past Nine.

The next picture, taken an hour and thirty minutes later, shows the garage well under way. Sills have been bolted at the corners and the joists hung in the steel joist hangers. The floor and wall sections have been assembled and the triangular gable pieces of the roof connected by ridge pole and roof supports. Two of the roof sections are in position and the third is being raised.



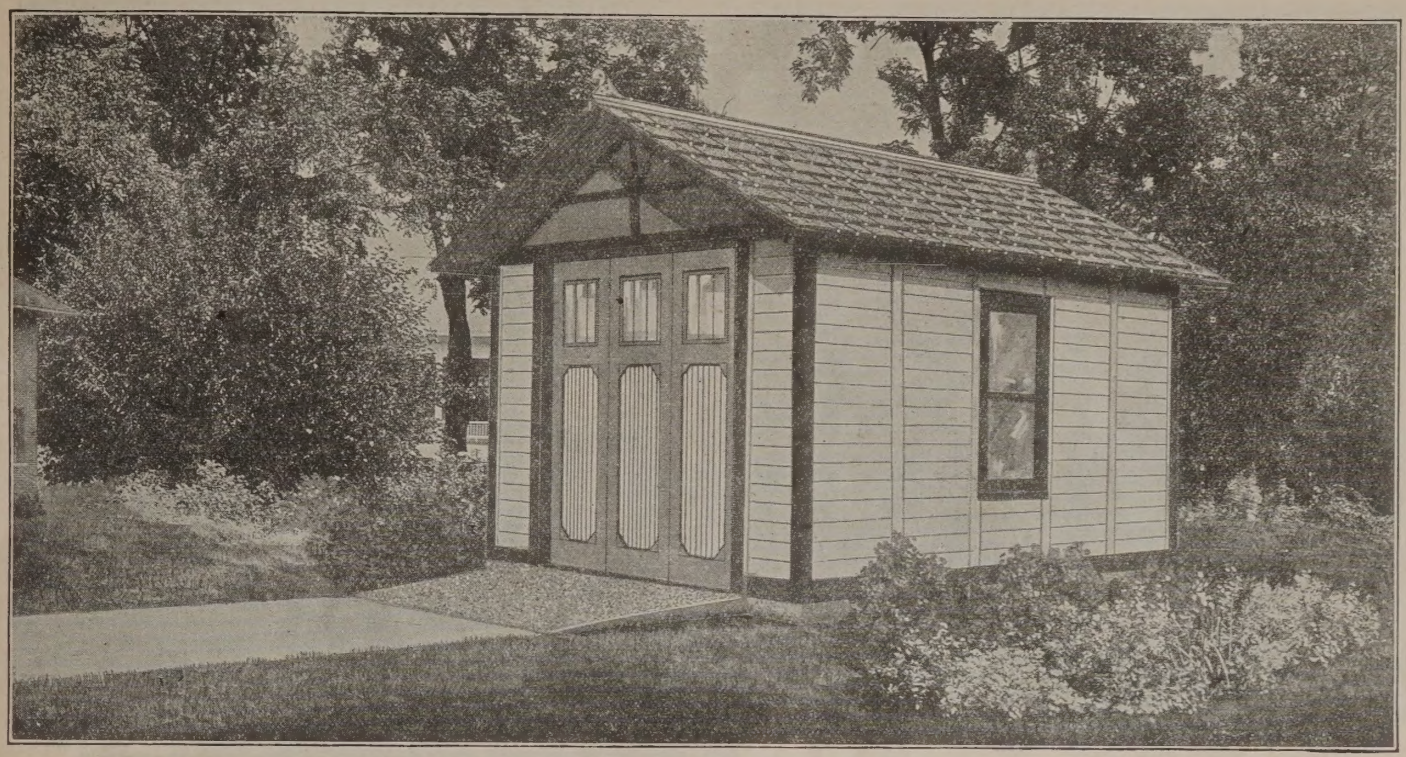
One o'Clock.

By one o'clock the main part of the building has been completed. The doors have been put on their hinges, all of the roof sections in place and part of the roofing tacked on.

Read the Affidavit on Page 32

Quarter Past Two.

The last picture, taken after five hours and forty-five minutes of work, shows the garage completed ready for use. The roofing has been applied, the ridge roll has been fastened along peak and finished at ends with fancy ridge finials.



The PARKWAY

Sectional Frame Garage 55C17 Price, $168.00

Little more than a year's garage rent will pay for Simplex Garage 55C17. This design has proved a winner and has been instrumental in selling others in every town where one has been used. You cannot beat it the world over at the price. Made of only the most select lumber, a far better grade than is used for ordinary building purposes.

If you are paying $10.00 to $15.00 a month for the care of your automobile in a public garage, you can easily see that our Sectional Garage 55C17 will soon pay for itself.

Specifications for Sectional Garage 55C17

The SECURITY

Sectional Frame Garage 55C171 Price, $119.00

For high grade workmanship, careful selection of material and low price, garage 55C171 is an unequaled bargain as a frame building. People who have limited space in which to put up a garage will find this 9-foot wide building just what they want. It has a standard 8x8-foot door entrance, large enough for a standard size automobile to enter with top raised.

This inexpensive, neat appearing garage is substantially constructed of well seasoned lumber, guaranteed to give good satisfaction.

Save money by taking prompt advantage of these special low prices.

Specifications for Sectional Frame Garage 55C171

SIZE—Width, 9 feet; length, 12 feet. Other sizes quoted below. Height of walls, 8 feet.

DOUBLE DOORS—Hinged double doors, plain panels with cross braces; standard opening, 8x8 feet.

WINDOW—Hinged sash, glazed, 4 lights 10x12 inches; window opening size, 2 feet 1 inch by 2 feet 6 inches.

SILLS—Size, 3x6 inches, grooved to receive wall sections.

WALL SECTIONS—No. 1 yellow pine drop siding, ¾ inch thick.

ROOF SECTIONS—No. 1 yellow pine roof boards, ⅝ inch thick, beaded on the under side.

ROOFING—Sea Green Fire-Chief Shingle Roll Roofing, with nails and cement. Guaranteed seventeen years.

HARDWARE—Hinges, hasp, bolts, screws and metal clips furnished.

PAINTING—Outside of garage painted one coat of gray paint.

FLOOR—When floor is ordered we furnish No. 1 yellow pine flooring in sections $^{13}/_{16}$ inch thick, 2x6-inch joists, steel joist hangers and wood incline for entrance.

FOUNDATION—We furnish with the garage cedar foundation posts, 6 inches in diameter. Brick, stone or cement are not furnished.

55C174 garage is furnished for two cars. Front entrance is equipped with two sets of triple sliding doors (see illustration lower left hand corner of page 42). Opening size for each car 8 feet wide by 8 feet high. The construction and quality of material in 55C174 is the same as used in 55C171. This will make you a substantial and attractive two-car garage for a small outlay of money.

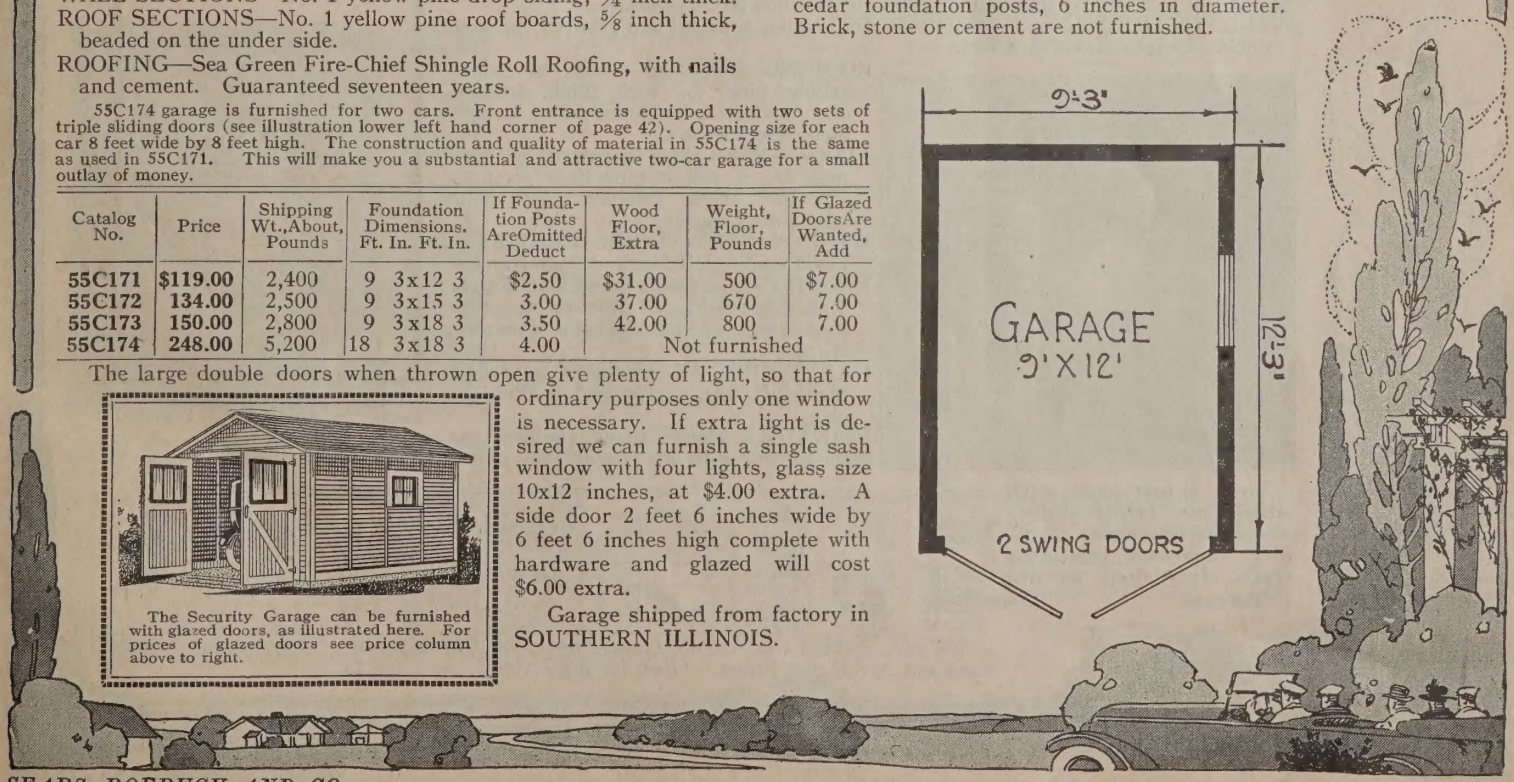
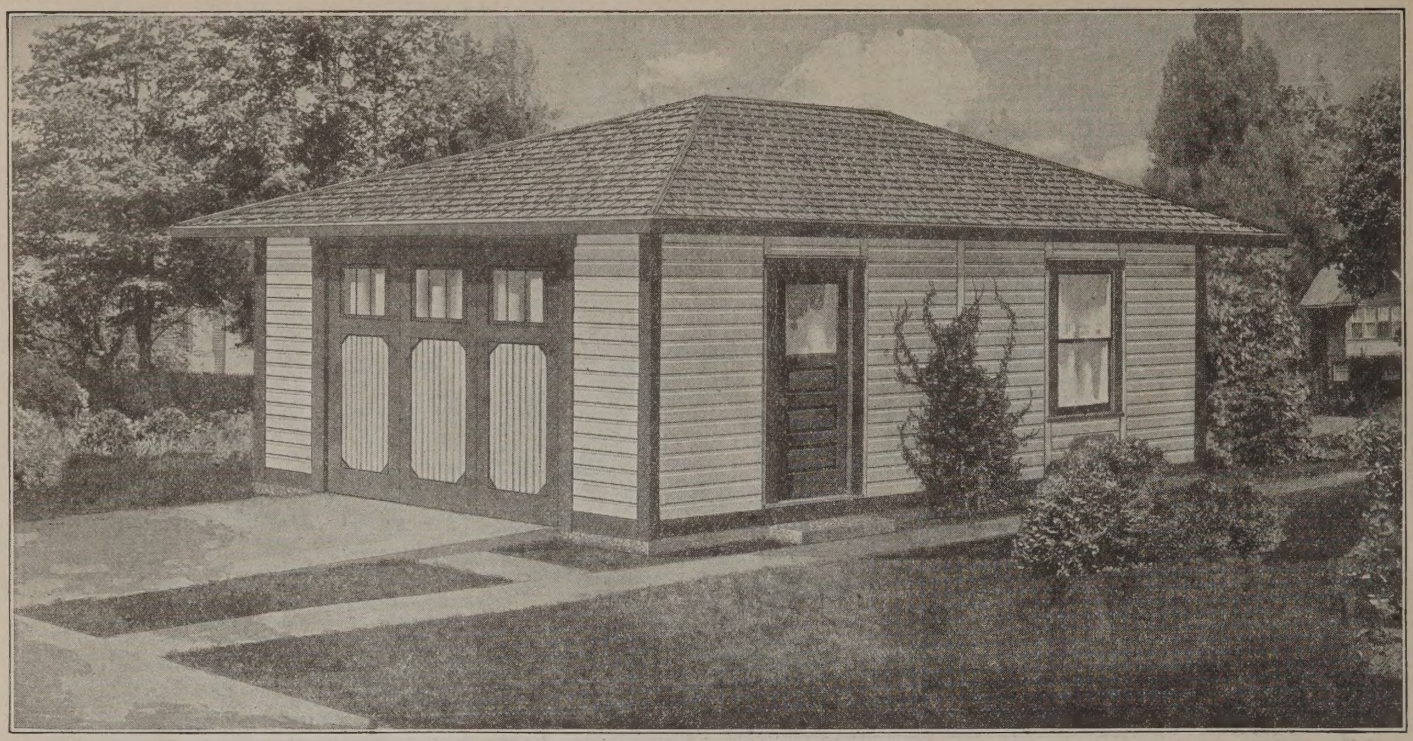
The Security Garage can be furnished with glazed doors, as illustrated here. For prices of glazed doors see price column above to right.

The large double doors when thrown open give plenty of light, so that for ordinary purposes only one window is necessary. If extra light is desired we can furnish a single sash window with four lights, glass size 10x12 inches, at $4.00 extra. A side door 2 feet 6 inches wide by 6 feet 6 inches high complete with hardware and glazed will cost $6.00 extra.

Garage shipped from factory in SOUTHERN ILLINOIS.





The AVENUE

Sectional Frame Garage 55C19 Price, $210.00

This garage will pay for itself in about twelve months. The illustration gives a good general idea of this substantially built and nicely designed Simplex Garage. Note the massive doors, with fancy windows, and also the real Sea Green Fire-Chief Shingle Roll Slate Surfaced Roofing, which will last longer than shingles.

This garage can also be furnished for three or four cars. Each extra addition is equipped with triple doors like illustrated above and the price for each addition is quoted below.

The MANOR

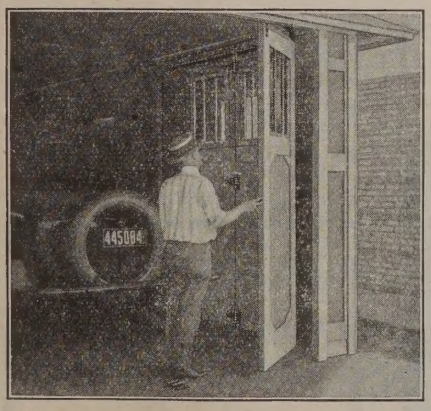
Sectional Frame Garage 55C110 Price, $316.00

This garage will pay for itself in a short time. Our Simplex Garage 55C110 is substantially built of only high grade material for permanent and satisfactory service; it is worth much more than we ask; it is roofed with Sea Green Fire-Chief Shingle Roll Slate Surfaced Roofing. The sides are made of tongued and grooved lumber covered on the outside with Oriental Slate Surfaced Siding guaranteed to wear and retain its color for fifteen years. This construction is a protection against fire, makes the garage warmer in the Winter, cooler in the Summer and greatly reduces the cost of upkeep, as slate surfaced siding needs no painting. This garage can also be furnished for two, three or four cars. Each extra addition is equipped with triple sliding doors, like illustrated above, and the price for each addition is quoted below.

Specifications for Sectional Frame Garage 55C110

SIZE INSIDE—15 feet wide by 18 feet and 21 feet deep.

TRIPLE SLIDING DOORS — Opening, 8x8 feet. Five glazed windows, glass size 24x26 inches, opening size 2 feet 4⅛ inches wide by 4 feet 10 inches long. Top sash divided as illustrated. One glazed door, size 2 feet 6 inches by 6 feet 6 inches, 1⅜ inches thick, for entrance from your house. Triple doors are glazed with divided lights to match windows.



View shows ease with which our triple sliding doors are operated. Complete hardware, including track, furnished at our prices.

FOUNDATION —Garage rests on 6-inch diameter cedar posts, which we furnish.

SILLS — Which rest on posts are 3x6-inch dressed No. 1 yellow pine. Joists, 2x6 inches.

WALL SECTIONS—Sheathed with No. 1 yellow pine dressed siding, beaded on the inside. Sheathing is covered with Oriental Sea Green Slate Surfaced Roofing, which is guaranteed to wear at least fifteen years and retain its color. Height of walls, 8 feet.

ROOFING BOARDS—Made of No. 1 yellow pine, ⅝ inch thick, dressed and beaded on the under side. In sections 3 feet wide.

WINDOW AND DOOR FRAMES—Good grade window and door frames.

ROOFING—Sea Green Fire-Chief Shingle Roll Slate Surfaced Roofing, guaranteed to wear at least seventeen years without leaking or changing color.

FLOOR—When floor is ordered we furnish No. 1 yellow pine floor sections 13/16 inch thick, 2x6-inch joists, and steel joist hangers.

HARDWARE—All necessary hardware is furnished with garage and is fitted in place.

PAINTING—All exterior woodwork is furnished with one coat of gray paint.

Brighton Station, Cincinnati, Ohio.

Sears, Roebuck and Co.

Gentlemen:—The portable nouse bought in June, 1910, has been used as a garage and has proved satisfactory in every way. Two men erected it in one day and we have not had occasion to take it down since. Have been well satisfied with it and believe it to be as good in every way as any house I could have built for double the cost.

Very truly yours,
W. B. STEPHENS.

The SPEEDWAY — **Sectional Frame Garage 55C18 Price, $376.00**

Low cost of upkeep is the big feature in the SPEEDWAY garage. It has double wall construction; the inner layer is tongue and groove material and the outer layer is Oriental Green Slate Surfaced Siding, which is guaranteed to wear fifteen years and retain its color. You effect a large saving in upkeep by purchasing a garage like the SPEEDWAY, as it is not necessary to paint the walls of the garage. The exterior walls are also made very attractive by the paneling. This also strengthens the sections, making a rigid and substantial garage.

This garage can also be furnished for three or four cars. Each extra addition is equipped with triple doors like illustrated above and the price for each addition is quoted below.

The MONITOR Sectional Fireproof Steel Garage 55C193 Price, **$110.00 and Up**

All steel garage. Guaranteed new "open-hearth" steel, No. 26-gauge, heavily galvanized. Fireproof, stormproof. Practically indestructible. Easy to put up. Simple construction, interchangeable parts. Bolted joints and uniform sections. No experts needed. One of the biggest bargains we have ever offered. Complete instructions furnished. Saves time, worry and expense.

High Grade All Steel Garages. Especially recommended for fireproof quality, service, reliability and low cost.

In order to make this $110.00 price on a garage, originally intended to sell for a great deal more, these buildings are made in tremendous quantities with steel that was purchased from the big rolling mills when the cost was low.

Simplex Fireproof Garages are substantially constructed of materials which will give perfect satisfaction. By curving the corrugated roof sections they are given greater supporting power than in the usual type of steel garages. This shape of roof also adds to the attractive appearance of the building, making it one of the neatest designs on the market.

You cannot afford to do without a garage when we offer them at such low prices. By saving you the annoyance and expense of storing your car in a public garage these private auto shelters will pay for themselves in a few months.

Specifications for Sectional Portable All Steel Fireproof Garage 55C193

SIZE—Outside sill measurements, 9 feet 4¾ inches by 12 feet 7⅞ inches. Other sizes quoted below. Height of all garages, 8 feet to eaves and 10 feet to top of roof.

DOUBLE DOORS—Size of opening, 8x8 feet. Hinged double doors made of 26-gauge galvanized sheet steel, glazed at the top with wire reinforced glass.

WALLS—Wall sections made up of 26-gauge galvanized sheet steel. Size of sections, 2 feet 6 inches by 8 feet; at the base they fasten to angle iron sills. At the top they bolt to a heavy steel wall plate.

TWO 14-gauge solid steel braces are provided in each of the four corners, which make the corners of the garage very rigid. The brace in each corner also **serves as a shelf** which is very handy for your tools, oil can, etc.

ROOF—Sections of roof are curved to give greater strength. Made of 26-gauge corrugated galvanized steel. Sections fasten to heavy galvanized steel wall plates by bolts.

HARDWARE—All necessary hardware furnished for erecting the garage, including hinges, hasp, bolts and screws.

55C193—Simplex Fireproof Garage, as illustrated and described. Size, 9 feet 4¾ inches by 12 feet 7⅞ inches. Shipping weight, 1,100 pounds. Price..... **$110.00**

55C194—Simplex Fireproof Garage, same as 55C193, but size is 9 feet 4¾ inches by 15 feet 1⅞ inches. Shipping weight, 1,215 pounds. Price..... **$130.00**

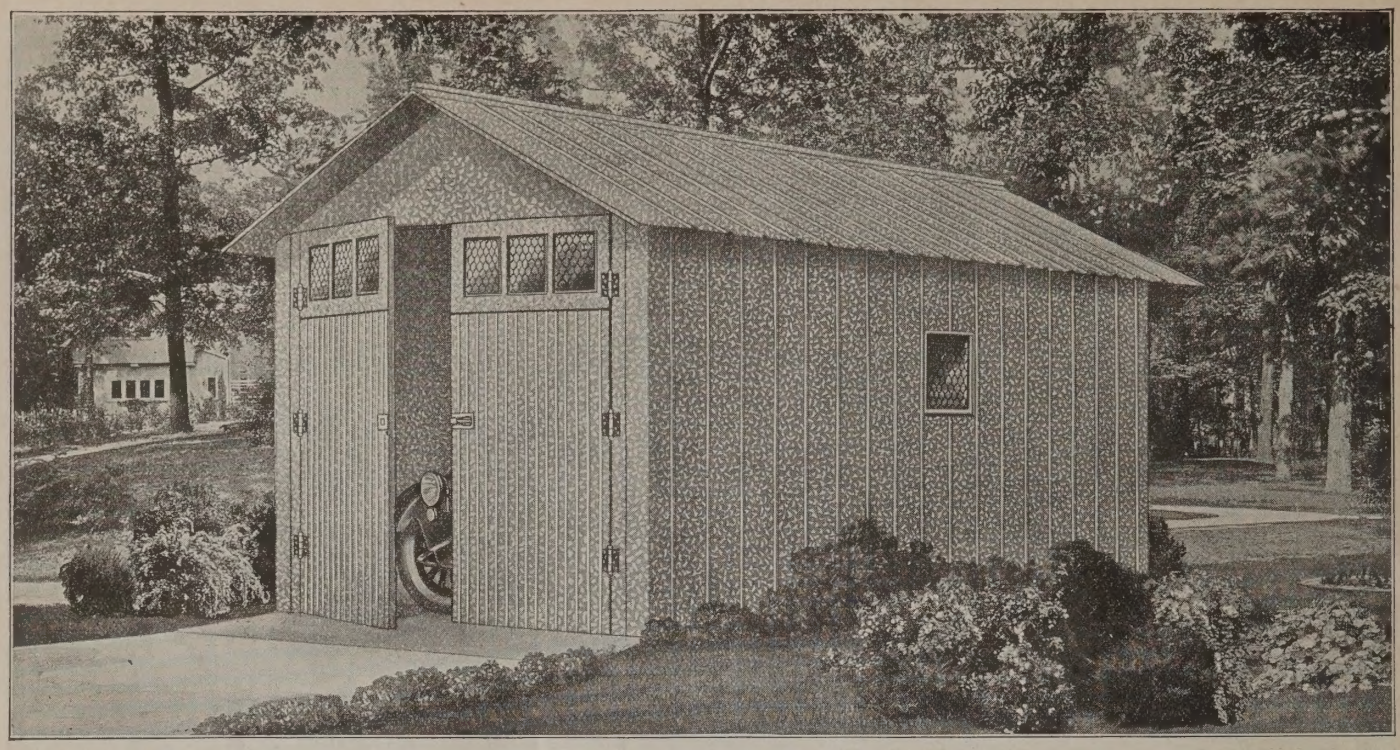
55C195—Simplex Fireproof Garage, same as 55C193, but size is 9 feet 4¾ inches by 17 feet 7⅞ inches. Shipping weight, 1,325 pounds. Price..... **$140.00**

55C196—Simplex Fireproof Garage, same as 55C193, but size is 9 feet 4¾ inches by 20 feet 1⅞ inches. Shipping weight, 1,440 pounds. Price..... **$154.00**

The above prices do not include floor, as fireproof garages should have concrete, cinder or gravel floors.

The glazed doors give sufficient light for ordinary purposes, but if extra windows are required in side or rear walls they can be furnished at $6.00 each, including steel frame, hinged at top and glazed with wire reinforced glass 16x20 inches. A side door 2 feet by 6 feet, complete with hardware, can be furnished with the garage for $12.00 extra.

All steel garages are shipped from the factory in OHIO.



This Steel Garage has a gable roof supported by angle iron trusses. The wall and roof sections are bolted to the heavy galvanized steel plate, making a perfectly tight joint. No soldering, riveting or machine work of any kind is necessary. All parts come to you cut to the proper size, with all bolt holes bored and bolts furnished ready for easy assembling. There are two 14-gauge solid steel braces provided in each of the four corners which make the corners of the garage very rigid. The brace in each corner also SERVES AS A SHELF, which is very handy for your tools, oil can, etc.

The MERRIMAC **Strong and Rigid Galvanized Steel Garage 55C197** **$122.00 AND UP**

Specifications for Sectional All Steel Fireproof Garage 55C197

SIZE—Outside sill measurements, 10 feet 2¾ inches by 12 feet 7⅞ inches. Other sizes quoted below. Height of garage, 8 feet to eaves and 11 feet to ridge of roof.

DOUBLE DOORS—Size of opening, 8x8 feet. Hinged double doors made of 26-gauge galvanized sheet steel, stoutly braced.

WALLS—Wall sections made of 26-gauge galvanized sheet steel. Size of sections, 2 feet 6 inches by 8 feet. At the base the sections fasten to angle iron sills; at the top they bolt to heavy galvanized wall plates.

ROOF—Roof sections made of 26-gauge galvanized sheet steel which overlap and bolt together making a good weather tight joint. A metal cap is furnished to cover the ends of the roof sections where they meet at the ridge.

HARDWARE—All necessary hardware furnished, including hinges, latches, bolts, clips and screws.

WINDOWS—One window furnished; fireproof window frame and sash made of 26-gauge galvanized steel glazed with wire reinforced glass; sash hinged to frame at top. Shipped from factory in OHIO.

Prices of All Steel Fireproof Garages.

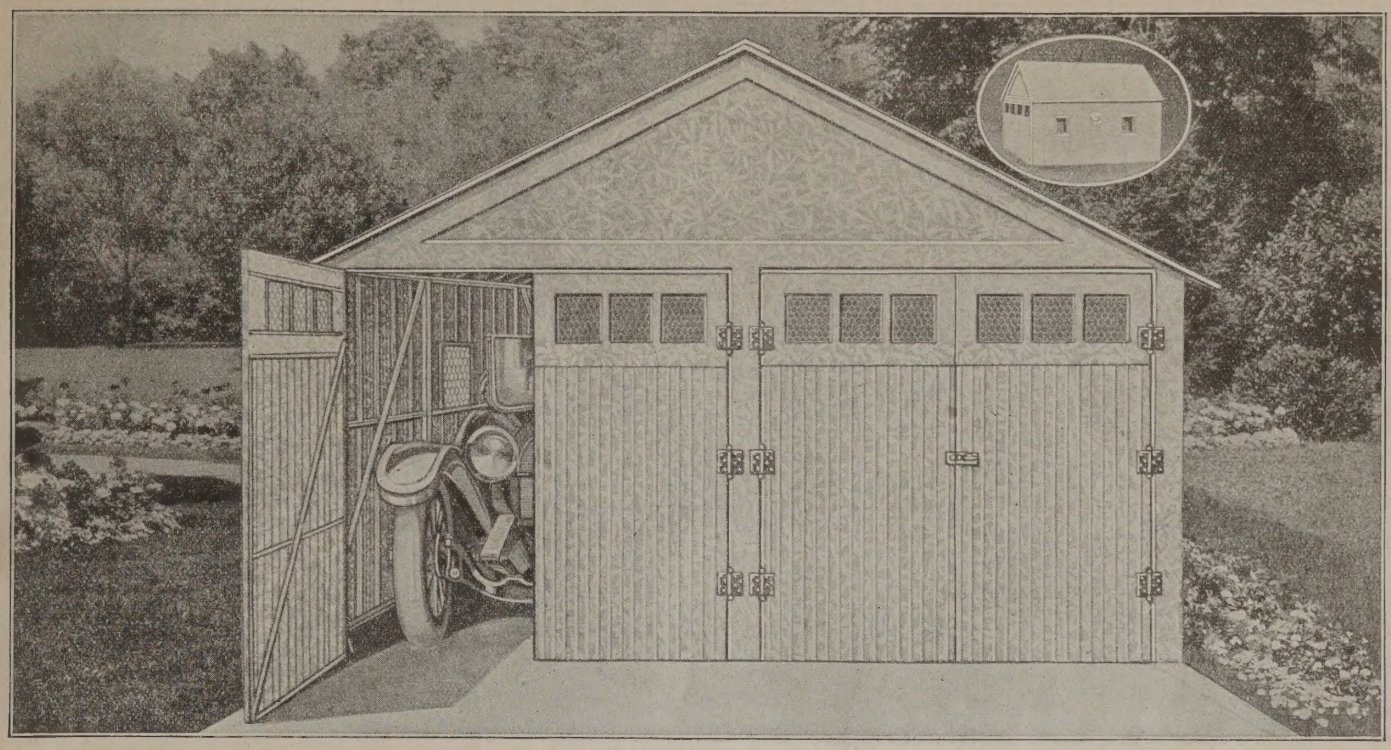
The above prices do not include floors, since fireproof garages should have concrete or gravel floors. We do not furnish concrete materials. If extra windows are required in the side or rear walls they can be furnished at $6.00 each, including steel frame glazed with wire reinforced glass 16x20 inches. Side door, 2x6 feet, complete with hardware, can be furnished with the garage at $12.00 extra. The double doors are glazed at the top with wire reinforced glass.



The IRONSIDES Sectional Steel Double Garage. 55C159—Price, $345.00 And Up

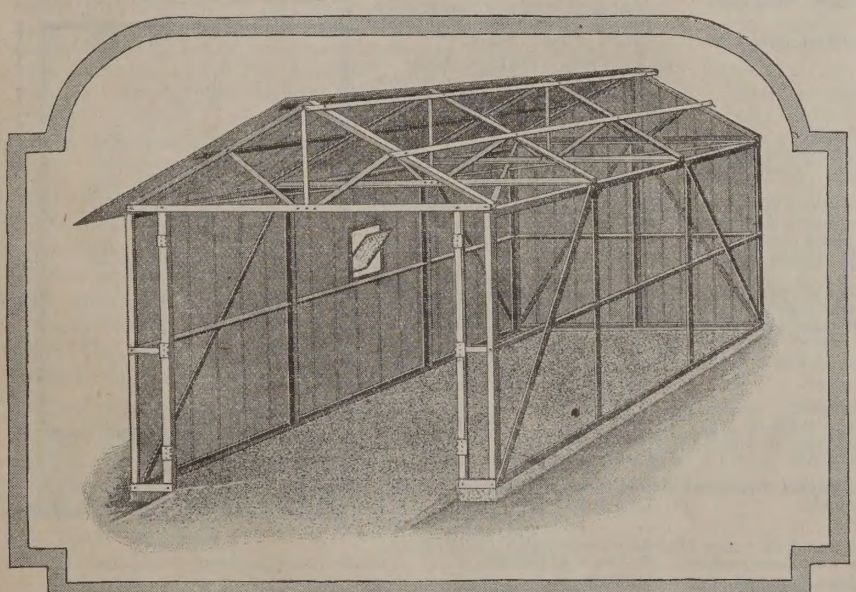
Size, 18 feet 6 inches wide by 17 feet 8 inches deep.	Shipping weight, 2,520 pounds.	Price **$345.00**
Size, 20 feet 2 inches wide by 20 feet 2 inches deep.	Shipping weight, 3,050 pounds.	Price **425.00**
Size, 23 feet 6 inches wide by 20 feet 2 inches deep.	Shipping weight, 3,550 pounds.	Price **509.00**

Prices include two sets glazed double doors, four windows and one rear entrance door. Extra windows may be furnished at $6.00 each, including steel frame hinged at top and glazed with wire reinforced glass. Extra steel doors, 2x6 feet, with hinges and latch, can be furnished at $12.00. If fewer windows are preferred, deduct $6.00 for each window omitted; deduct $12.00 if rear 2x6-foot door is not wanted. Floors not included, as fireproof garages should have concrete or gravel floors.

All Steel Double Garage for Two Cars

Our Galvanized Steel Double Garages are guaranteed to give perfect satisfaction, and therefore high grade materials are used throughout—heavily galvanized 26-gauge steel for roof and sides, rolled steel angles for the framework, wire reinforced glass for doors and windows, sturdy double doors in well braced frames. These fireproof, windproof, rustproof buildings represent exceptional bargains at our remarkably low prices.

They are very easy to erect. No riveting, soldering or machine work of any kind is necessary. Sections bolt together, making stormproof joints. The steel angles are cut to exact size, bored with bolt holes and furnished with bolts. Many of the sections and framing parts are interchangeable, thus simplifying the work of erecting.



THIS PICTURE CLEARLY ILLUSTRATES THE ANGLE IRON FRAME OF THE TWO-CAR GARAGES.

We are in a position to furnish large steel warehouses, public garages, etc., up to 48 feet in width and 200 feet in length, and longer. Write for prices.

We advise you to place your order without delay so as to take advantage of our present low quotations.

Specifications for Steel Garage 55C159

SIZE—18 feet 6 inches wide by 17 feet 8 inches deep. Other sizes quoted above. Height of walls, 8 feet to eaves and 12 feet to ridge of roof.

DOUBLE DOORS—Two pairs hinged double doors, glazed with wire reinforced glass.

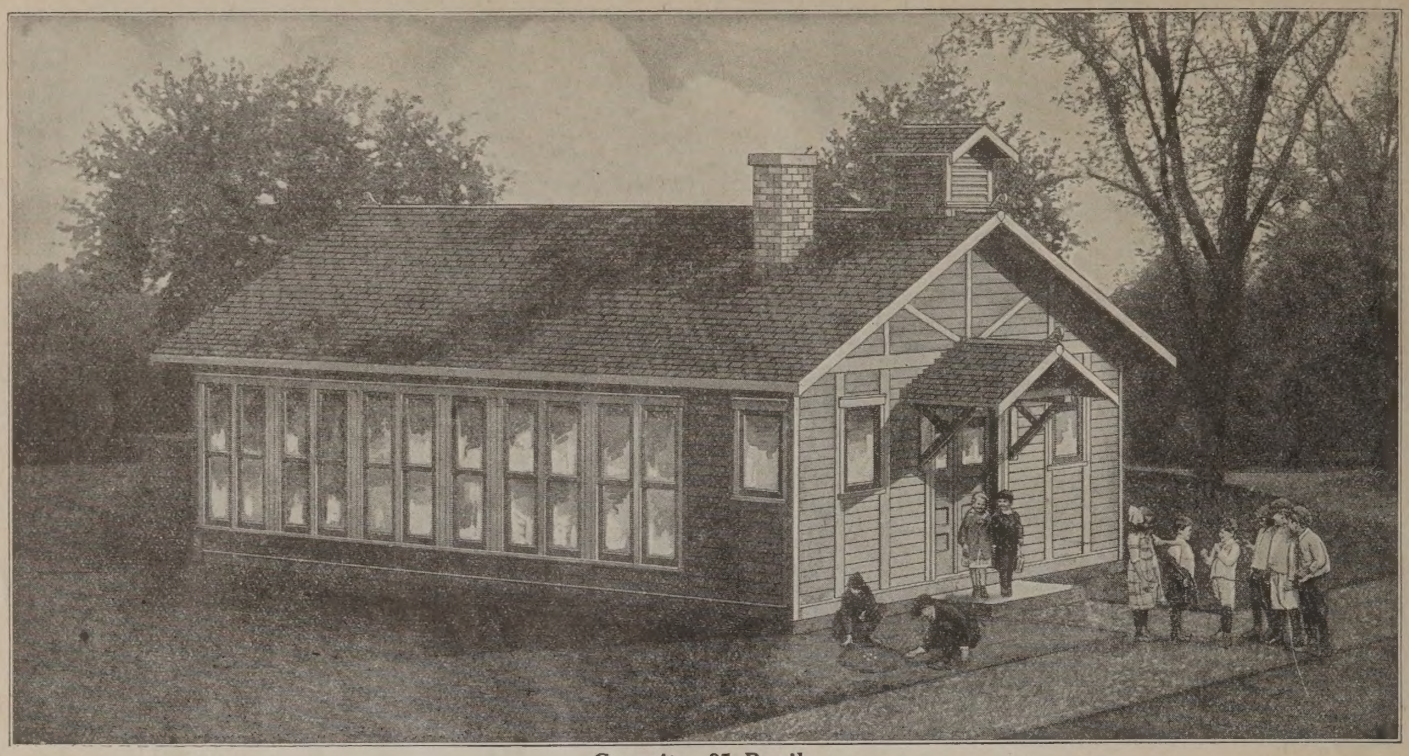
WALLS—Wall sections, 2½ feet wide by 8 feet high. Sections have weatherproof joints formed by the rolled edges of the sheets.

ROOF—Roof sections have lap joints which bolt together; metal cap furnished for covering ridge.

FRAMEWORK—The sills, wall plates, stringers and uprights are 1½x1½x⅛-inch angle irons; the roof trusses and door frames are 1x1x⅛-inch angle irons; the diagonal braces are 1x⅛-inch steel bars. The roof purlins are 1½x⅛-inch steel bars.

WINDOWS AND DOORS—Four windows, two on each side, with steel frames pivoted at the center and glazed with wire reinforced glass, size, 16x20 inches. One rear entrance door 2x6 feet, complete with hinges and latch.

HARDWARE—All necessary hardware furnished, including hinges, latches, bolts, screws and clips. Shipped from factory in OHIO.



Capacity, 35 Pupils.

Sectional Schoolhouse 55C208 $871.00

In designing this one-room schoolhouse, great care has been taken to meet all the requirements of a comfortable, sanitary school home for the children. This school is scientifically lighted, ventilated and proper sanitation provided.

The illustration and floor plan of the SIMPLEX SECTIONAL SCHOOLHOUSE shown on this page feature the requirements of a one-room standard school. You will notice by the dimensions of the classroom that proper floor space and air space have been allowed per pupil. The scientific arrangement of the windows is a very important feature. In this classroom, the glass surface is one-fifth the floor space and the seating of the pupils is such that none of the children are facing the light.

In the one-room schools which pupils of all ages attend, five different size desks are required to accommodate the different ages. The numbers shown on the desks in the floor plan represent the different size desks that are required: No. 2—ages, 13 to 14 years; No. 3—ages, 11 to 12 years; No. 6—ages, 5 to 6 years; No. 5—ages, 7 to 8 years; No. 4—ages, 9 to 10 years.

One of the best and most practical arrangements that can be installed for supplying fresh air and taking foul air from the room is provided by making a chimney with a double flue, one flue for smoke and one for foul air. By this construction the hot smoke heats the air in the foul air flue, causing it to arise and thus creating a circulation that will draw the foul air from the room. The foul air register should be placed right at the floor. The fresh air intake ducts are usually installed under the floor of the room with one opening through the outside wall of the building. The interior opening is directly under the heater. The outer opening should be covered with a wire screen and the opening in the room should have a cast iron register plate.

Specifications for Sectional Schoolhouse 55C208

SIZE OF SCHOOLHOUSE (INSIDE)—24 feet wide by 39 feet deep.

SCHOOLROOM—24 feet wide by 33 feet deep.

GIRLS' COAT ROOM—Size, 9 feet wide by 6 feet deep; equipped with three shelves, 12 inches wide by 4 feet long for dinner pails.

BOYS' COAT ROOM—Size, 6 feet wide by 6 feet deep; equipped with three shelves, 12 inches wide by 3 feet long for dinner pails.

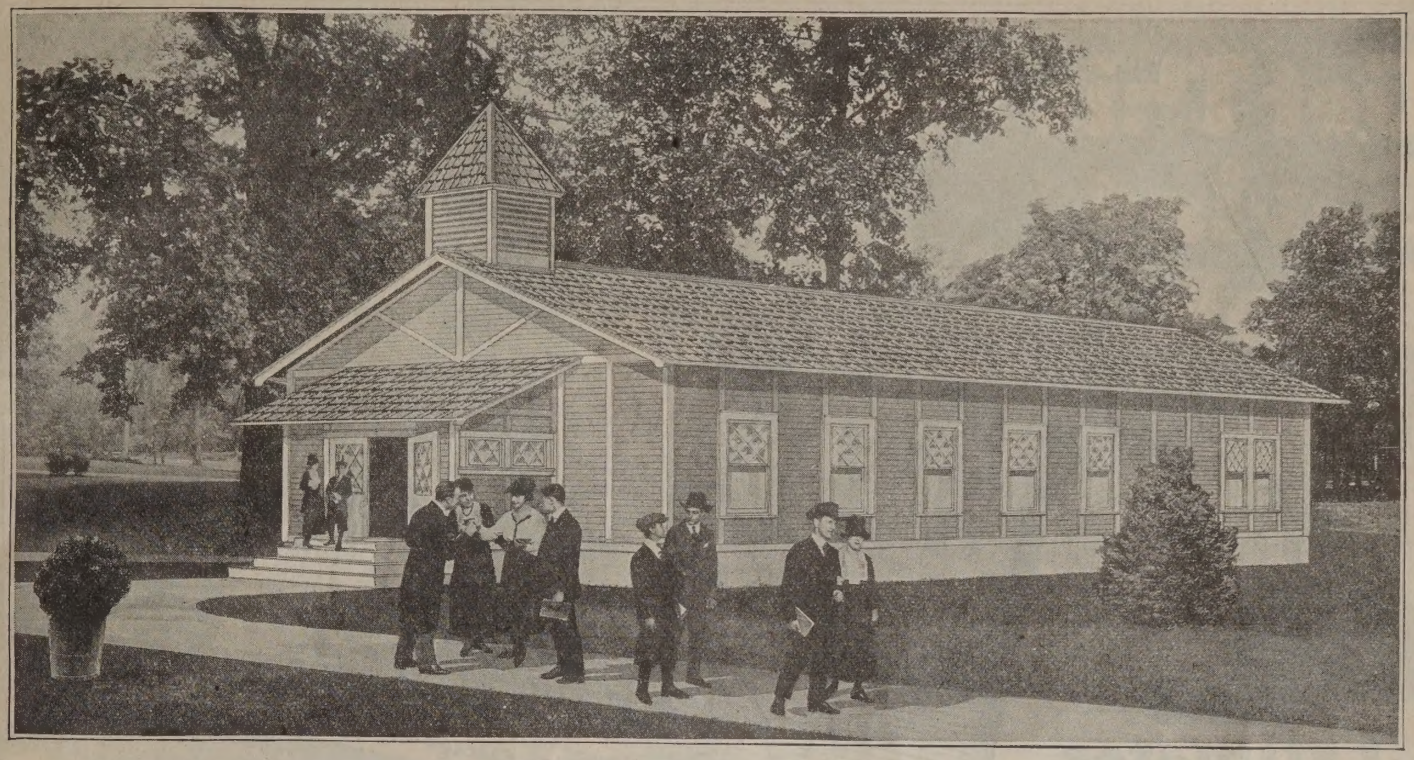
Price of wall board includes 2x4-inch ceiling joists, panel strips, baseboard, quarter round and nails. The wall board sheets are 3 feet wide and cut in proper lengths to fit ceiling, any window, door or plain wall section.

Schoolhouses shipped complete from factory in SOUTHERN ILLINOIS.

Front View Schoolhouse 55C208



Sectional Church 55C124

Our Simplex Sectional Church 55C124 costs a great deal less than a similar structure built in the usual way. Consequently it is possible for congregations to provide themselves with a suitable meeting house at small expense, while if the church were built in the usual and more elaborate way the cost might be more than the community could afford. These buildings serve the purpose quite as well, being attractive, serviceable and conveniently arranged.

At church camp meetings held in the Summertime a Sectional Building of this kind fills all requirements, as it can be put up or taken down at small expense. This makes it possible to economically move the church to new locations, so that when a permanent church is built this Sectional Building can be made useful over and over again in other districts.

This building is also suitable for a town hall, lecture room, or as a place to hold banquets, entertainments or church fairs. Every town or village requires at least one building of this kind, and it can be most quickly provided by purchasing it Sectional, avoiding the usual delay and expense of putting up a permanent structure. Steps not included, but prices will be furnished on request.

Specifications for Sectional Church 55C124

SIZE OF CHURCH (INSIDE)—24 feet wide by 48 feet deep.

VESTIBULE—12 feet wide by 6 feet deep.

AUDITORIUM—24 feet wide by 36 feet deep.

SUNDAY SCHOOL ROOM—24 feet wide by 12 feet deep.

WINDOWS AND DOORS—Seventeen glazed two-light windows, top sash divided diamond shape; glass size, 24x36 inches; window opening size, 2 feet 4⅛ inches by 6 feet 6 inches. Four hinged single sash windows in vestibule. Entrance doors are double; size, 2 feet 6 inches by 6 feet 6 inches, 1⅜ inches thick. Double doors to vestibule and two doors leading to Sunday school room have five panels. All No. 1 quality. Rear door, 3 feet 6 inches wide by 6 feet 6 inches high by 1⅜ inches thick.

FOUNDATION—As a church has frequent and large crowds, we would recommend solid concrete, brick, cement block or stone piers. We do not furnish brick, stone or cement.

SILLS—3x10-inch No. 1 yellow pine, which rest on the foundation.

FLOOR JOISTS—2x8-inch No. 1 yellow pine.

FLOORING—$^{13}/_{16}$ inch thick by 3¼-inch face No. 1 yellow pine, dressed and matched.

WALL SECTIONS—Made of No. 1 yellow pine drop siding, dressed smooth on the inside. Height of walls, 9 feet.

PARTITION WALLS—Made of No. 1 yellow pine, ⅝ inch thick, dressed and beaded, in sections 3 feet wide by 8 feet 10 inches high.

ROOFING BOARDS. Made of No. 1 yellow pine, ⅝ inch thick, dressed and beaded on the under side. In sections 3 feet wide.

FRAMES—Good quality window and door frames. Doors and windows fitted and hung.

ROOFING—Fire-Chief Shingle Roll Slate Surfaced Roofing guaranteed to wear and hold its color for seventeen years. Furnished in red or green color. If no color is mentioned when ordering, we will furnish green.

PAINTING—Outside of church painted one coat of gray paint.

55C124—Simplex Sectional Church. Shpg. wt., abt. 22,500 lbs. Price..**$1,390.00**

55C124B—Simplex Sectional Church, without the partition between the auditorium and Sunday school room. Shipping weight, about 21,500 pounds. Price...**$1,367.00**

Accessories for Sectional Buildings

Useful Articles Which Can Be Furnished for Our Sectional Houses and Garages.

Door and Window Screens.

We can furnish Door and Window Screens, including the frames, with fourteen-mesh galvanized wire screen cloth attached. The frames are painted with high grade black paint.

Screen Doors are 2 feet 8 inches wide by 6 feet 8 inches high. Hinges, spring, screws and latch are included.

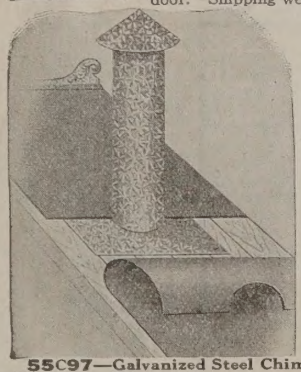
The Window Screens cover the lower sash; size, 2 feet 4 inches wide by 2 feet 6 inches high. Metal fasteners for attaching the screen to the windows are included.

Shipped from sectional building factory in SOUTHERN ILLINOIS.

55C100—Screen Door, complete with hinges, screws, latch and spring, as described. This is an extra strong and well made door. Shipping weight, 15 pounds.
Price, each.....**$5.50**

55C99—Window Screen for lower sash, complete with fasteners, as described. This is an extra strong and well made screen, furnished with fourteen-mesh galvanized wire. Shipping weight, 5 pounds.
Price, each.....**$1.20**

55C335—Full Length Screens, 2 feet 4⅛ inches by 4 feet 10 inches, furnished with fourteen-mesh galvanized screen wire. Shipping weight, 10 lbs. Price, each....**$1.60**



Galvanized Steel Chimneys.

One of these Galvanized Steel Chimneys is included with every ready made house, but sometimes an extra one is required in case more than one stove is used.

Our Galvanized Steel Chimneys are 6 inches in diameter by 30 inches high. They are made of 28-gauge sheet steel, heavily galvanized to prevent rust. A metal flange 16x24 inches is attached to the lower part and beveled so as to fit a roof of one-fourth pitch. Illustration shows how chimney is attached and how roofing is fitted around it. Shipped from sectional building factory in SOUTHERN ILLINOIS.

55C97—Galvanized Steel Chimney, complete as described. Shipping weight, 15 pounds. Price, each.....**$2.50**

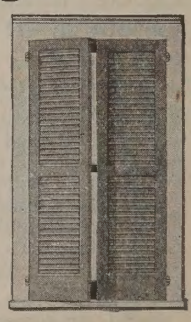
Window Blinds.

Window Blinds are fitted with patent hinges and latch and have roller slats. They are the proper size to fit into our standard windows for sectional buildings.

Window blinds add greatly to the appearance of a house and it is becoming the custom again to use them on modern residences. They are not only an attraction but an economy as well, for they protect the windows from injury during storms and shield the carpets or furniture from the direct rays of the sun, at the same time allowing free circulation of air.

Shipped from sectional building factory in SOUTHERN ILLINOIS.

55C98—Window Blinds, complete with hinges and latch, as described. Shipping weight, 17 pounds.
Price, per pair.....**$5.00**



Door and Window Shutters.

Our Door and Window Shutters are made of ⅝x3¼-inch No. 1 yellow pine, dressed one side, beaded on the other. They are simple in construction, strongly made and fitted with hinges and fasteners complete. This style of shutter is used for protecting the windows and glazed doors when the house is not in use.

The shutters come in pairs, accurately cut so as to fit our standard doors and windows, and are furnished in diamond design. Shipped from sectional building factory in SOUTHERN ILLINOIS.

55C96—Window Shutters, complete as described. Shipping weight, 10 pounds. Price, per pair.....**$3.00**

55C336—Colonial Shutters like on Mt. Vernon house, including hardware. Shipping weight, 15 pounds.
Price, per pair.....**$7.00**

55C95—Door Shutters, complete as described. Shipping weight, 15 pounds. Price, per pair.....**$3.50**

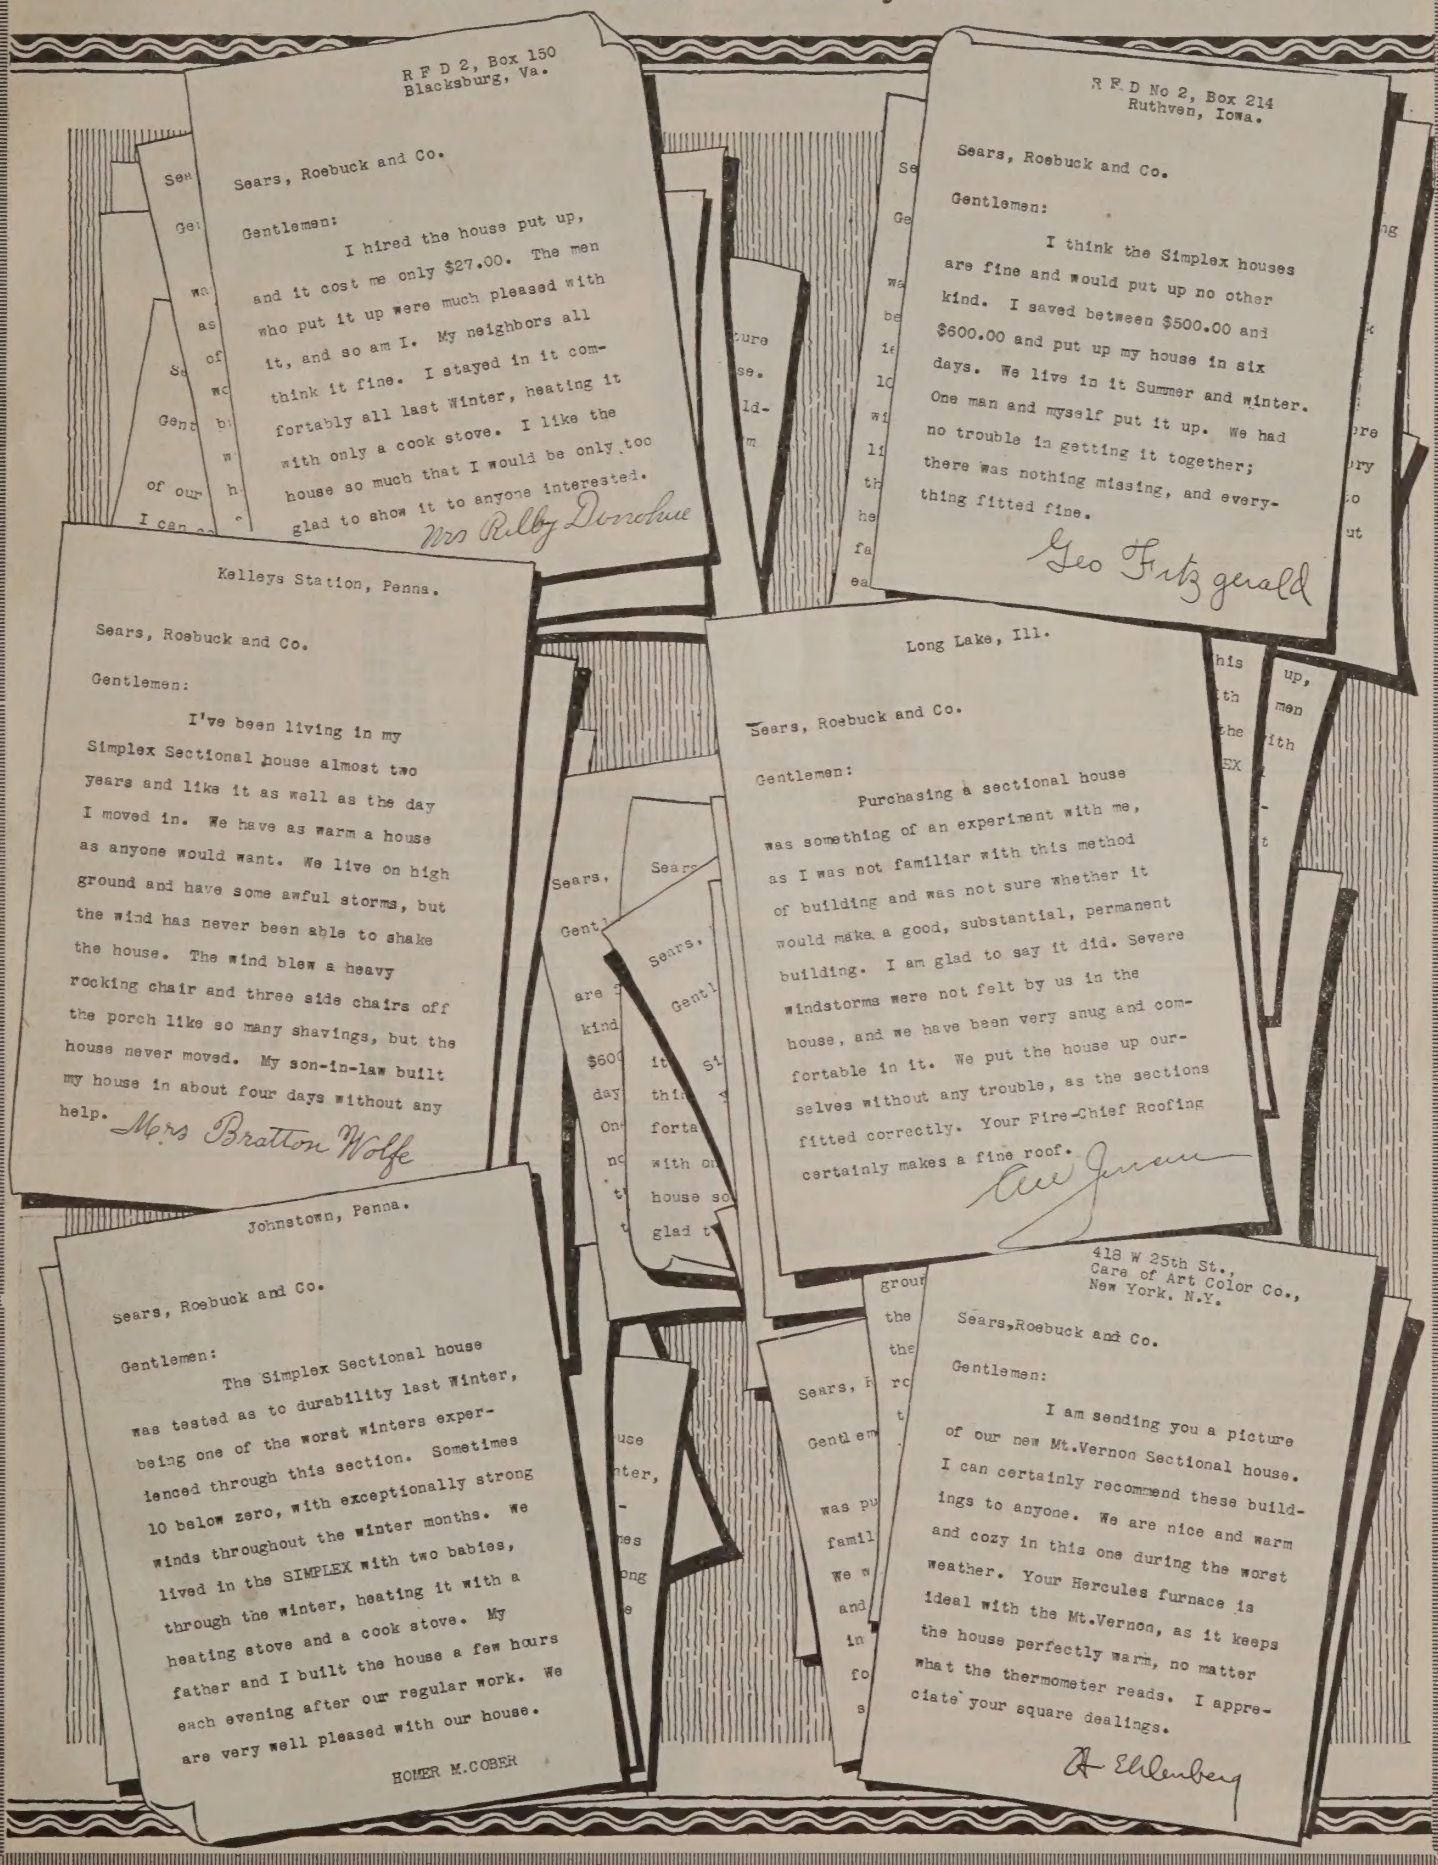
Simplex Sectional Buildings Are Strong, Easily Heated and Comfortable

Read These Letters Written by Owners



R F D 2, Box 150
Blacksburg, Va.

Sears, Roebuck and Co.

Gentlemen:

I hired the house put up, and it cost me only $27.00. The men who put it up were much pleased with it, and so am I. My neighbors all think it fine. I stayed in it comfortably all last Winter, heating it with only a cook stove. I like the house so much that I would be only too glad to show it to anyone interested.

Mrs Ruby Donohue

R F D No 2, Box 214
Ruthven, Iowa.

Sears, Roebuck and Co.

Gentlemen:

I think the Simplex houses are fine and would put up no other kind. I saved between $500.00 and $600.00 and put up my house in six days. We live in it Summer and winter. One man and myself put it up. We had no trouble in getting it together; there was nothing missing, and everything fitted fine.

Geo Fitzgerald

Kelleys Station, Penna.

Sears, Roebuck and Co.

Gentlemen:

I've been living in my Simplex Sectional house almost two years and like it as well as the day I moved in. We have as warm a house as anyone would want. We live on high ground and have some awful storms, but the wind has never been able to shake the house. The wind blew a heavy rocking chair and three side chairs off the porch like so many shavings, but the house never moved. My son-in-law built my house in about four days without any help.

Mrs Bratton Wolfe

Long Lake, Ill.

Sears, Roebuck and Co.

Gentlemen:

Purchasing a sectional house was something of an experiment with me, as I was not familiar with this method of building and was not sure whether it would make a good, substantial, permanent building. I am glad to say it did. Severe windstorms were not felt by us in the house, and we have been very snug and comfortable in it. We put the house up ourselves without any trouble, as the sections fitted correctly. Your Fire-Chief Roofing certainly makes a fine roof.

Johnstown, Penna.

Sears, Roebuck and Co.

Gentlemen:

The Simplex Sectional house was tested as to durability last Winter, being one of the worst winters experienced through this section. Sometimes 10 below zero, with exceptionally strong winds throughout the winter months. We lived in the SIMPLEX with two babies, through the winter, heating it with a heating stove and a cook stove. My father and I built the house a few hours each evening after our regular work. We are very well pleased with our house.

HOMER M.COBER

418 W 25th St.,
Care of Art Color Co.,
New York. N.Y.

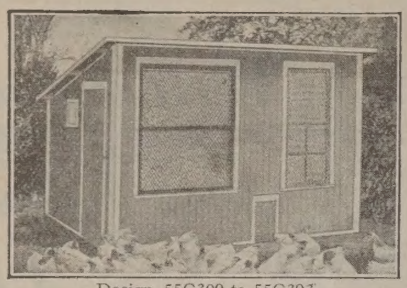
Sears,Roebuck and Co.

Gentlemen:

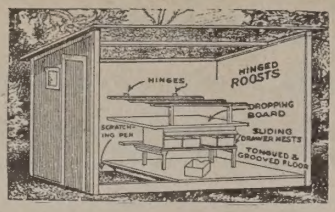
I am sending you a picture of our new Mt.Vernon Sectional house. I can certainly recommend these buildings to anyone. We are nice and warm and cozy in this one during the worst weather. Your Hercules furnace is ideal with the Mt.Vernon, as it keeps the house perfectly warm, no matter what the thermometer reads. I appreciate your square dealings.

A Ehlenberg

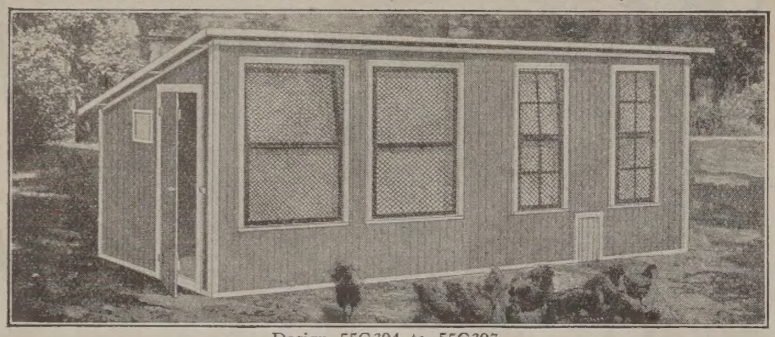
Portable Chicken Houses



Design 55C300 to 55C303.



INTERIOR VIEW
Showing type of roost, nest and complete Hennery Outfit which we furnish with our Poultry Houses.



Design 55C304 to 55C307.

Specifications for Simplex Portable Chicken Houses 55C300 to 55C307.

SIMPLEX Portable Chicken Houses are designed so that they are convenient, well lighted, ventilated and constructed of good, clean, bright, new and substantial material which you will recognize by referring to the specifications on this page. Do not confuse these buildings with lighter constructed portable poultry houses offered by other concerns.

OPENINGS—Glazed windows, outside measurement 1 foot 8½ inches wide and 3 feet 10 inches high, eight lights, 8x10 inches. Upper sash opens inward, being hinged to lower sash which slides upward, so that the whole window may be removed. Fresh air windows, 3 feet 5 inches wide by 3 feet 10 inches high, with folding canvas frames adjustable to any weather condition. All windows protected with galvanized wire netting. One entrance door fitted with hinges and latch, 2 feet 4 inches wide by 5 feet 6 inches high. Small entrance door in front for chickens and ventilator door in end as shown.

WALLS—Made in sections of dressed and matched ¾-inch thick vertical siding; 2x4 and 2x2-inch framing.

ROOF—Dressed and matched ⅝-inch thick roof boards in sections; 2½-ply Best-of-all Roofing with nails and cement. Guaranteed for 14 years.

FLOOR—Dressed and matched 13/16-inch flooring made in sections, supported by 2x4's across the house.

PAINTING—Outside of building painted gray with white trim.

All necessary hardware furnished.

Prices 55C300 to 55C307.

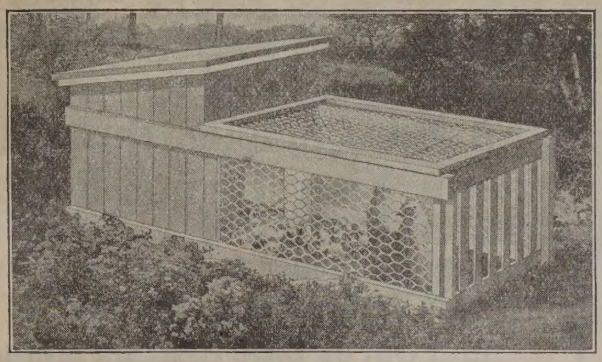
Simplex Portable Chicken House 55C318.

Portable Brood Coops



Specifications for 55C320.

SIZE—Dimensions over all, 4 feet 10 inches by 2 feet. The coop without runway is 24 inches wide by 22 inches deep and 24 inches high, with roof slanting to rear. The runway is 24 inches wide by 36 inches long, covered with 1-inch mesh galvanized wire netting.

OPENINGS—The coop has a small hinged door swinging outward to the runway. There are four small ventilating holes near the top. At the end of the runway is a slatted door with the slats far enough apart for the chicks to go through, while the door can be raised upward to let out the mother hen.

FLOOR—Yellow pine flooring ½ inch thick, dressed and matched, and painted with vermin exterminator liquid.

ROOF—Dressed and matched boards, made watertight with red rubber roof paint.

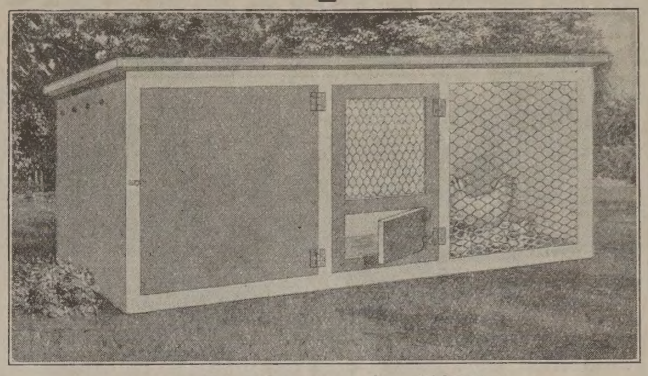
WALLS—Yellow pine matched boards, painted gray with white trim.

55C320—Simplex Portable Brood Coop, complete as described. Shipping weight, 40 pounds.

Price for each coop..... **$ 6.25**
Price for three coops..... **17.95**
Price for six coops..... **28.95**

Shipped from factory in SOUTHERN ILLINOIS.

NOTE—Save money by ordering several of these coops at once. They weigh only 40 pounds each when crated, so that the freight charges on three or four would be but little more than for one coop.



Specifications for 55C321.

SIZE—Dimensions over all, 4 feet 10 inches by 2 feet. Nest compartment is 22 inches wide by 24 inches deep and 24 inches high, with roof slanting to rear. Runway is 24 inches deep by 36 inches long with 1-inch mesh galvanized wire netting covering the open front.

OPENINGS—One small sliding door in partition between nest and runway. The open front has a hinged door 12 inches wide by 22 inches high, which gives access to inside of coop; in the bottom of this door is a small hinged opening, swinging outward. The solid wood front of the next compartment is hinged, allowing easy cleaning.

FLOOR—Yellow pine flooring ½ inch thick, dressed and matched, and painted with vermin exterminator liquid. Floor under nest compartment only.

ROOF—Dressed and matched boards ¾ inch thick, made watertight with red rubber roof paint.

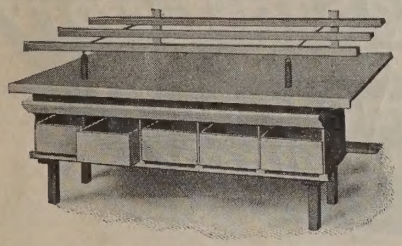
WALLS—Yellow pine boards painted gray with white trim.

55C321—Simplex Portable Brood Coop, complete as described. Shipping weight, 90 pounds.

Price for each coop..... **$ 6.95**
Price for three coops..... **20.00**
Price for six coops..... **38.95**

Shipped from factory in SOUTHERN ILLINOIS.

Portable Outfits and Hoppers



Simplex Portable Hennery Outfits 55C322 to 55C329

Combined Roosting and Nesting Outfit. Nest boxes, which are 12 inches wide, 16 inches long and 6 inches deep, slide in and out like a drawer, the hens entering at the rear. The long hinged board, attached to the front, keeps the nests dark and is raised when gathering eggs. The drop board covers the nests and may be removed, allowing easy cleaning. The wooden perches are 1½x1¼ inches. This hennery outfit is made ready for use by simply attaching the legs and roosts. Hennery outfit treated with vermin proof liquid. Shipped from factory in SOUTHERN ILLINOIS.

PRICES OF SIMPLEX PORTABLE HENNERY OUTFITS.

PAINTING—Outside of building primed with one coat of gray paint.

55C14—Simplex Portable Gable Roof Outhouse with floor and wooden seat. Shipping weight, about 720 pounds. Price..... **$45.00**

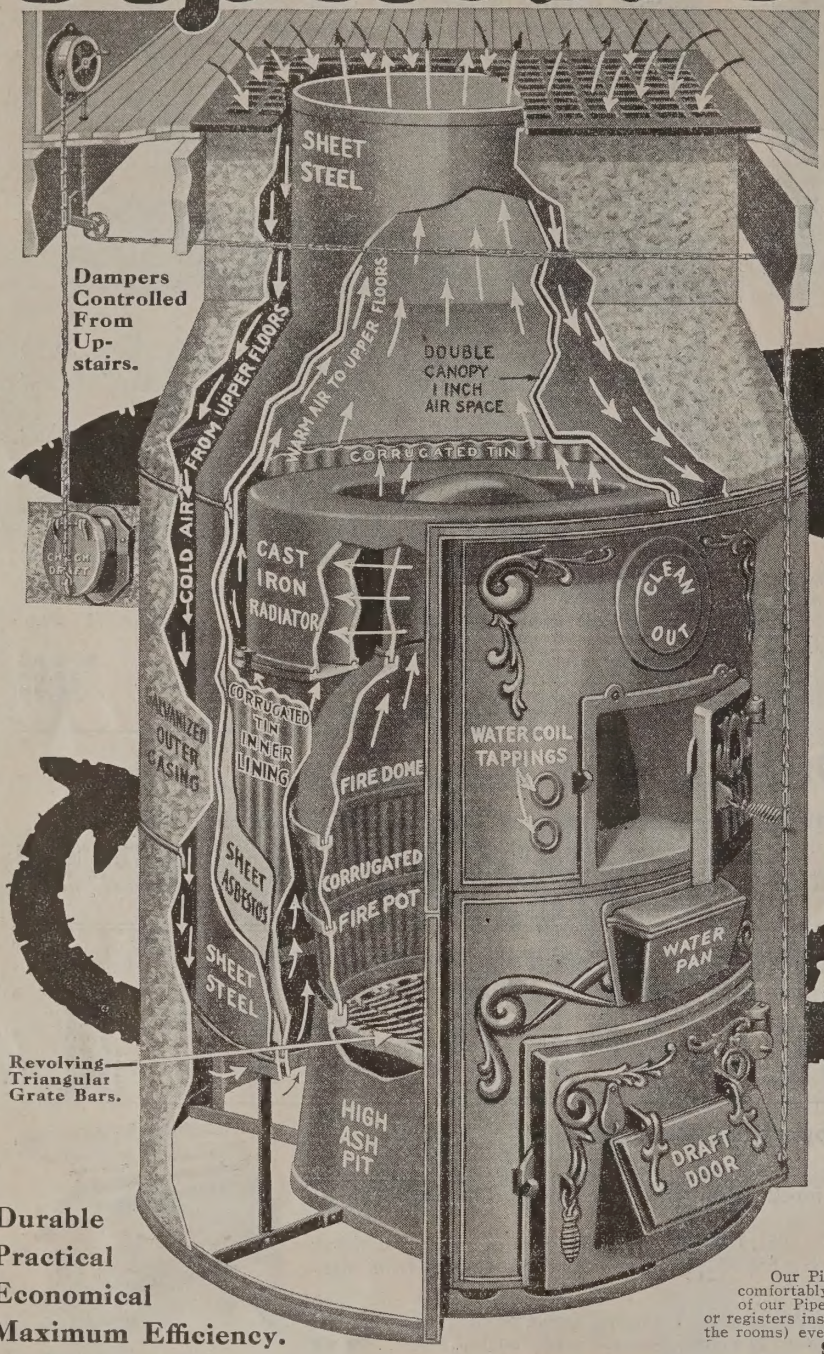
The same size building can be furnished with a single slope shed roof instead of a gable for $44.00.

Outhouse shipped from factory in SOUTHERN ILLINOIS.

Pipeless Furnaces

No More Smoke, Dust or Gas in Your Living Rooms

Complete Modern Heating System at Little More Than the Cost of Old and Out of Date Heating Methods



Over Twenty Thousand of Our Pipeless Furnaces Now Installed and Giving Satisfactory Service to Our Customers in All Parts of the Country

Durable Practical Economical Maximum Efficiency.

Our Hercules Pipeless Furnace illustrated on this page embodies the most advanced improvements in pipeless furnace design. Cold air is taken from upstairs, it enters the large register at the sides, drops down, and turns up under the inner or sub-casing near the base of the furnace. It then strikes the hot surface of the furnace and is carried up through the sub-casing and is discharged through the center of the large register above. Just observe that this furnace provides its own heat insulation. It is entirely encased in a jacket of cold air, which is in constant circulation and which absorbs every unit of heat which might otherwise escape through the furnace casing, and it carries this heat right back into the heating chamber and up into your living rooms upstairs. That is why you get the full benefit out of every shovelful of coal you put into this furnace. There is no heat wasted. The warm air rising out of the large register above circulates to all parts of the building, delivering heat to every room.

Simplest and Most Economical of All Heating Systems.

Our Pipeless Furnaces are the simplest of all systems of heating and, by reason of their extreme simplicity, they are without any question the most economical in fuel. The heat is delivered to your rooms almost instantaneously, without passing through any long system of pipes, so there is practically no heat wasted in the basement. Your basement will always be cool enough for vegetables, and for every shovelful of coal you put into this furnace you will get big returns in actual heat units in your rooms. This is the reason our Pipeless Furnaces have become so popular.

Keeps Entire House Comfortably Warmed.

Our Pipeless Furnaces not only keep the room in which the large register is placed comfortably warmed, but experience has proved that in any ordinary residence where one of our Pipeless Furnaces is installed (if the doors between adjoining rooms are left open, or registers installed in the ceiling, so as to allow a reasonable amount of circulation between the rooms) every room will be comfortably warmed.

Size to Order.

Figure up the total cubic contents of your building and select a furnace of corresponding capacity from the table on this page.

If you live in a real cold climate, or your house is unusually hard to heat; if you want to keep your house unusually warm, or if you will burn wood or soft coal, we would recommend ordering one size larger furnace. It is always better to have a furnace a little larger than is actually required. **The 18-inch fire pot furnace makes an excellent furnace for small houses, bungalows, etc., but is not recommended for houses having more than five rooms.**

If you prefer we will estimate the size furnace you require for your building. Write for one of our special heating information blanks, fill it out carefully and return it to us. Our engineers will figure the correct size furnace and we will quote a price, including all freight charges, to your station if you wish.

Prices of Hercules Pipeless Furnaces.

Prices are for furnace complete with register, casing, shaker handle, poker, check draft, chains, pulleys, damper chain plate and cement. **Shipped from factory in OHIO.**

Smoke pipe not included at above prices. When ordering, state amount of smoke pipe needed and we will include it with your order at our net catalog price.

Prices are subject to market changes.

Hot Water Coil for Hercules Furnace, $1.75 extra. If wanted with Gas Burner in addition to coal grate write for prices.

Fuel Economy Unsurpassed.

Here you have a furnace which positively cannot waste heat. The cold air coming down from upstairs surrounds the entire heating chamber and carries all stray heat units right back into the heating chamber, from which they are delivered up into your rooms. You will readily see what this means in fuel economy. We positively cannot point to a single heating device of any kind now on the market, barring none, that will deliver more actual heat units to your rooms per pound of coal consumed than our Hercules Pipeless Furnace illustrated here. It is really remarkable the heating results you can get with this furnace from a surprisingly small amount of fuel. The warm air rises through the center of the large register and circulates to all parts of the house. By placing combination registers in the ceiling the warm air will circulate to the bedrooms, bathroom, etc., on the second floor, and you will be able to maintain an even and comfortable warmth throughout every room in the house.

SEROCO HOUSE PAINT

Seroco Paint Is Made in Our Own Paint Factory.

We control every step in the process of making our paints. We test all raw materials in our laboratory for pureness and these ingredients are blended, ground and mixed under expert supervision. Every part of the process is subject to the most rigid inspection. Our guarantee of quality and service is very broad and binding.

Our Seroco Paint is made to fulfill two requirements—protection and appearance. It forms a beautiful, glossy surface that readily sheds water and protects and preserves the surface underneath from rot and decay.

Ready to Use—We make our paint with the one idea in mind of having it suitable for use by the home owner who is not used to painting. We prepare the paint in our factory ready to use. There is nothing for you to add and nothing to do but open the can, stir up the paint thoroughly and brush it on to the house. Our paint spreads easily and evenly and anyone without any previous experience can do a good job of painting with it. Send for our "How to Paint" Booklet 686RMB if you want detailed advice or instruction on painting.

Order by catalog number and state color wanted.

5-gallon can	(Shpg. wt., 80 lbs.)	**Per gallon, $2.15**
3-gallon can	(Shpg. wt., 50 lbs.)	**Per gallon, 2.20**
1-gallon can	(Shpg. wt., 19 lbs.)	**2.25**
½-gallon can	(Shpg. wt., 10 lbs.)	**1.21**
1-quart can	(Shpg. wt., 6 lbs.)	**.63**

NOTE—On painted surfaces in fairly good condition apply two coats of Seroco Ready Mixed House Paint just as you receive it. **On surfaces that have never been painted and on old porous surfaces badly in need of paint, three coats should be applied, the first coat thinned in proportion of about two quarts of pure raw linseed oil to each gallon of Ready Mixed Paint.** On new surfaces of pitchy lumber that have never been painted, you will need about one quart of turpentine and one quart of linseed oil for the first coat.

Many buildings have been badly neglected during the last few years, and as a result three coats of paint are necessary where two coats would have been sufficient if they had been painted when they first needed it. In ordering paint be sure to first examine your buildings carefully and order enough paint for the required number of coats. **One gallon of Seroco House Paint will cover about 250 square feet, two coats, or about 165 square feet, three coats.**

Rubberset Paint Brush.

Bristles are set in vulcanized rubber. High grade Chinese black bristles, metal bound. For use wherever a good brush is required.

30M30931

Width, In.	Length, In.	Shpg. Wt., Oz.	Price, Each
2½	2¼	8	**$0.53**
3	2½	9	**.63**
3½	2¾	10	**.81**
4	3	11	**1.02**
4½	3¼	12	**1.29**

Pure Linseed Oil and Turpentine.

The prices of linseed oil and turpentine are changing constantly, but, for your convenience, so that you may order your oil along with your paint, we are quoting the following prices which are based on the prevailing market price at the time this catalog is going to press. If prices have changed either higher or lower, when we receive your order, we will ship the oil and notify you regarding the difference in price.

30M3460—Pure Turpentine.

30M3464—Pure Raw Linseed Oil.

5-gallon can	(Shpg. wt., 40 lbs.)..Per gal.	**86c**
1-gallon can	(Shpg. wt., 11 lbs.)	**93c**
1-quart can	(Shpg. wt., 3 lbs.)	**29c**

Preservative Creosote Stain.

A Combined Wood Preserver and Beautifier.

We use an exceptionally large percentage of heavy Creosote Oil in our Creosote Shingle Stain, so that it not only beautifies but also **protects** and **preserves** your shingles. Creosote Oil is one of the best wood preservers known, so that a shingle stain containing the maximum of this excellent preservative is sure to give the very best service and satisfaction. One gallon of this Creosote Stain will cover approximately 75 to 80 square feet of shingles, two coats. When dipped, 2½ to 3 gallons will cover approximately 1,000 of the regulation 4x16-inch shingles. Two-thirds of the length of the shingle only need be dipped.

Preservative Creosote Shingle Stain is made only in the following colors, the only colors in which Creosote Stain can be successfully made.

NOTE—Only the brown can be used on hardwood.

For Color Samples See Following Page.

30M1181—Moss Green.
30M1185—Red.
30M1186—Bungalow Brown.

		Per Gal.
*50-gal. barrel	(Shpg. wt., 500 lbs.)	**78c**
*25-gal. half bbl.	(Shpg. wt., 250 lbs.)	**84c**
5-gal. can	(Shpg. wt., 50 lbs.)	**88c**
1-gal. can	(Shpg. wt., 15 lbs.)	**90c**

Special Stain for Old Shingles.

This Special Stain is made with double strength color for old shingles that have weathered dark. Our regular stains are intended for bright, new, clean shingles only. If you want a stain to be used on old weathered shingles, be sure to order the following numbers and allow 30 cents additional per gallon to the above shingle stain prices.

30M1191—Moss Green. **30M1195**—Red.
30M1196—Bungalow Brown.

★Barrels and half barrels shipped from our Paint Factory in Chicago, Ill.

Seroco Barn Paint.

An exceptionally high grade barn paint. We have put more real quality into our barn paint formula than might be considered necessary for a paint of this class. We use a big percentage of the purest linseed oil and it is a well known fact that the life of any paint is dependent largely on the strength of the oil film which it forms on the surface painted.

For barns, stables, sheds, warehouses and all outbuildings we consider this a first class paint that will give perfect satisfaction. It is not ground quite so fine as our house paints and does not contain expensive lead and zinc pigments which must be used in house paints for the more delicate colors.

One gallon of Seroco Weatherproof Mineral Barn Paint will cover approximately 250 square feet of surface, two good coats, and in many instances it will cover 300 square feet and over, two coats, depending upon the condition of the surface. All new wood should receive three coats for a good job.

For Color Samples See Following Page.

30M800—Oxide Red.
30M820—Dark Gray.
30M830—Yellow.
30M850—Maroon.

		Per Gal.
★50-gal. barrel	(Shpg. wt., 700 lbs.)	**$1.32**
★25-gal. half bbl.	(Shpg. wt., 350 lbs.)	**1.35**
5-gal. can	(Shpg. wt., 70 lbs.)	**1.37**
3-gal. can	(Shpg. wt., 45 lbs.)	**1.41**
1-gal. can	(Shpg. wt., 15 lbs.)	**1.43**

The difference in the cost per gallon in the various containers is due to the cost of putting up and handling as well as the difference in the cost of the containers.

Porch Floor Paint.

The paint on the floor of the ordinary porch receives more actual wear than paint used on almost any other surface. It is usually exposed to all the destructive weather. Rain beats upon it and snow and ice sometimes cover it for days. The entire family walks on it almost daily and it is swept and scrubbed regularly. Furniture and hammocks all do their share in wearing off a porch floor paint.

Realizing the severe tests to which a porch floor paint is usually subjected, we developed a formula for the manufacture of a paint that would answer every requirement demanded of a paint for this purpose.

Porch Floor Paint has the same covering capacity as Interior Floor Paint, shown below. Apply with a good paint brush.

For Color Samples See Following Page.

Furnished only in the following colors:

30M600—Gray.
30M610—Lead Color.
30M620—Drab.
30M630—Light Brown.
30M640—Moss Green.

		Price
1-qt. can.	(Shpg. wt., 4¼ lbs.)	**$0.63**
½-gal. can.	(Shpg. wt., 10 lbs.)	**1.20**
1-gal. can.	(Shpg. wt., 15 lbs.)	**2.25**

Interior Floor Paint.

Made to withstand hard wear and lots of it. You must have good quality in a floor paint, for the floor receives the hardest kind of wear. This paint dries quickly and has a good gloss. Contains a good lot of varnish.

New or old floors which have not been previously painted require three coats. One gallon will cover approximately 300 to 350 square feet, two coats, and from about 200 to 250 square feet, three coats. It will dry in a single night. Apply with a good paint brush.

HOW to PAINT
THIS BOOK WILL TELL YOU
HOW TO PAINT
Mr. Home Owner!
You can paint! You can do all your own decorating! You can save yourself money! Our "How to Paint" Book 686RMB will tell you all about it. Send for it. Postpaid on request.

Kalsomine.

Velvet Sanitary Kalsomine is furnished in a complete range of beautiful tints and colors. It dries with a smooth, velvety finish that will not rub off. It is used extensively; in fact, it is one of the most popular ways of decorating, because of its beauty and sanitary properties. Kalsomining a room is a very economical way of decorating it; the kalsomine is not at all expensive and it is so easy to apply that you can do the work yourself, making it possible, if desired, to redecorate your home each season. Complete directions for applying are given on each package. Kalsomine can be used for any room, and by using different harmonizing colors in the various rooms a very charming and artistic home will result. It can be used over paper or wood.

A stencil border or panel on the walls or ceiling of a kalsomined room produces a beautiful effect at very little cost. A more complete line of stencils is shown in our big General Catalog.

One package will cover the walls of the average 10x12-foot room.

The Popular Dull Finish

Waterproof and Washable. For Interior Use Only.

An ideal paint for interior walls. Produces the popular dull finish so much in demand now for interior decorating. It has all the properties of paint, except the high gloss, which has always been the objectionable feature of ordinary paint for interior use. It has a soft, velvety finish, and combines beauty with cleanliness and durability. It will not rub off and can be washed with soap and water without injury to the finish or color. A gloss paint sometimes has a tendency to bring out the defects on old surfaces. A flat finish paint never does this and, therefore, for refinishing old walls or woodwork it cannot be surpassed. It is easy to apply and anyone without any experience can turn out good work when using it. When painting large surfaces a large paint brush can be used with the best results.

It can be used as a base for enameling.

Flat Finish Paint is suitable for decorating any room in the home. The light, dainty shades may be used for the bedroom walls, with a narrow dainty stenciled border, and the darker shades are very good for living room or dining room decoration.

One gallon will cover about 200 square feet two coats.

Undercoat for Kalsomine.

A special size to be used on plastered walls before applying Kalsomine. Two pounds will finish an ordinary size room. It is very economical because it produces an extra hard, permanent surface which holds up the kalsomine, thus increasing the spreading capacity and making the color flow evenly. It prevents grease and stain spots from working through and killing the color of the kalsomine. Full directions on every package.

30M2736—Size (Undercoat for Kalsomine).
1-pound package..... (Shipping weight, 1¼ pounds)..... **35c**

Kalsominer's Wool Sponge.

Commercially known as sheep's wool sponge. Soft sponge, used by professional kalsominers and painters. Very handy for washing windows, woodwork, walls, etc. Shipping weight, 4 ounces.

Grass Sponge. This is a low priced sponge and not intended for professional use. For removing old kalsomine from walls and other household uses. Shipping weight, 4 ounces.
30M2624—Sponge. Price, each..... **23c**

Flat Finish Size, or First Coater.

Walls that have not been previously painted should be thoroughly sized before applying Seroco Flat Finish Paint with the following mixture: 1 quart of size to 1 quart of Flat Finish Paint, using the same color of Flat Finish Paint for the size coat as for the finishing coat. This amount will cover about 250 square feet.

30M2734—Size for use with Flat Finish Paint.

1-quart can..... (Shipping weight, 5 pounds)..... **$0.46**
1-gallon can..... (Shipping weight, 15 pounds)..... **1.52**

Seroco Gloss Enamel.

An especially high grade enamel offered in a variety of pleasing shades for interior use. We make this enamel in our own factory and have perfected it especially for the home owner and amateur painter. It is also used by many contractors for large jobs. Can be used any place where a strictly sanitary, glossy, porcelain like finish is desired on woodwork, walls or furniture. The variety of colors offered makes this enamel attractive to those interested in beautifying their homes. Try one color on the walls and another harmonizing color on the ceiling and woodwork. One gallon will cover approximately 200 square feet two coats. Apply with a good varnish brush.

1-gallon can..... (Shipping weight, 19 pounds)..... **2.97**

Chinese Gloss Lacquer.

(A Colored Varnish.)

Chinese Gloss Lacquer is a special Colored Varnish that makes old, scratched or marred furniture, woodwork or floors look like new with but one or two applications. It can be applied by any housewife, and the finished work will be satisfactory, rich and beautiful. Open the can, pour a little of the liquid into a saucer or cup and apply it with a flat varnish brush It will dry in twenty-four hours. It is put up ready to use.

All your dark painted woodwork can be given a bright, lustrous finish or can be made to represent mahogany, oak, walnut or various other woods, by applying one or two coats of our Chinese Gloss Lacquer of the shade desired.

It is not necessary to remove the original finish. If the woodwork is light, Chinese Gloss Lacquer can be used alone. If the woodwork is dark and a light finish is desired, apply one coat of undercoat, a ground color (listed below) and over this ground color apply whatever shade of Chinese Gloss Lacquer is desired. One gallon will cover 600 square feet one coat.

FOR COLOR SAMPLES SEE PRECEDING PAGE.

Porch Furniture Paint.

For Porch, Lawn, Breakfast Room, Sun Parlor and Kitchen Furniture.

Paint your porch furniture, lawn swings, breakfast room furniture and kitchen furniture with our Porch Furniture Paint and make your home radiate cheerfulness and beauty. Our Porch Furniture Paint has a very beautiful appearance, having an enamel like finish. This finish is obtained by using a large percentage of varnish, which also gives the paint a tough, pliable, weather resisting body which will stand up perfectly under the severe wear and weather to which porch and lawn furniture is usually subjected. The Tuscan Red and Park Green are bright, snappy colors and are especially recommended for use on lawn swings, settees, etc. The French Gray and Holland Blue are very attractive and smart colors for breakfast porch, sun parlor and kitchen furniture. Porch furniture painted either gray or blue, with pink cretonne chair coverings, table covers and porch pillars, will make a delightful porch or sun parlor. Gray is always a very pleasing neutral color to use on old kitchen chairs and tables. Apply with a good varnish brush.

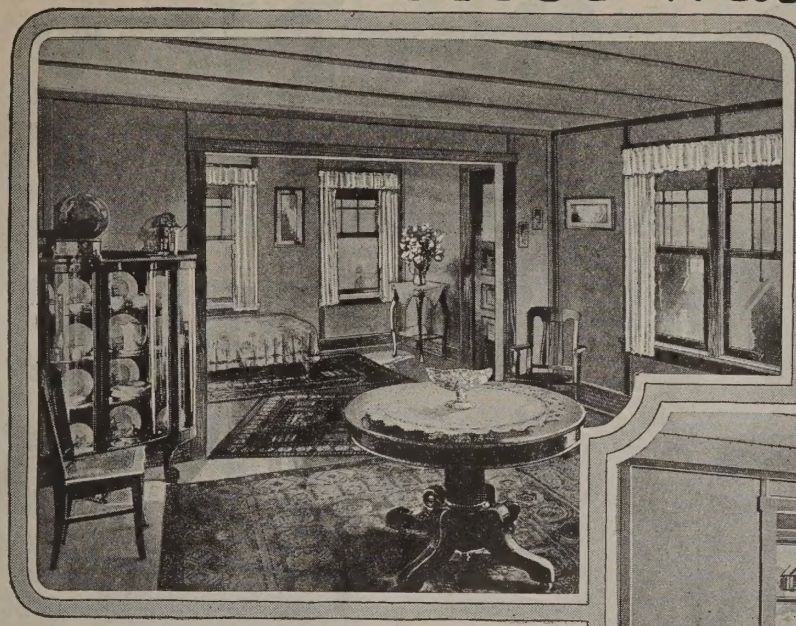
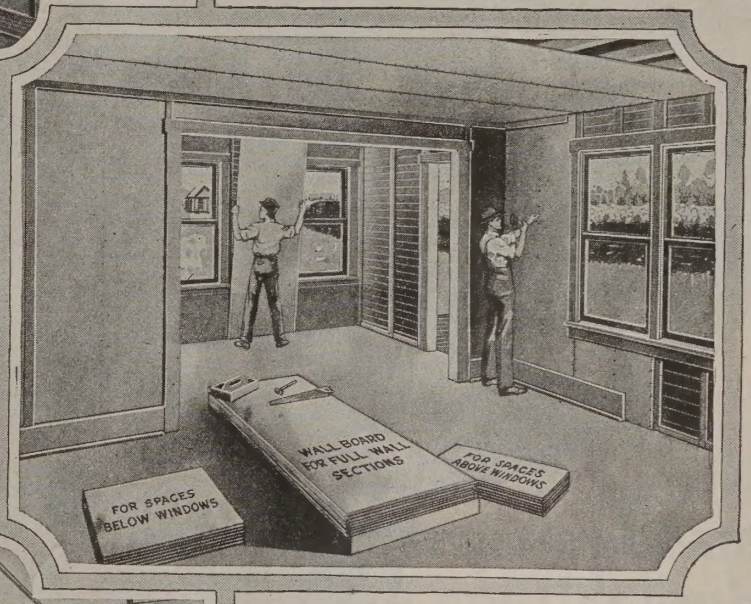
Peerless Wall Board



Our Sectional Buildings can be used with comfort during all seasons of the year by lining them with Peerless Wall Board. The living room illustrated at the left shows the attractive finish produced by this material. After the sheets are nailed to the furring strips and ceiling joists, panel strips are applied. The room is then ready to be painted, or it can be left in its natural color, unfinished, with pleasing effect, as the light brown shade makes a very attractive coloring for both ceiling and side wall.

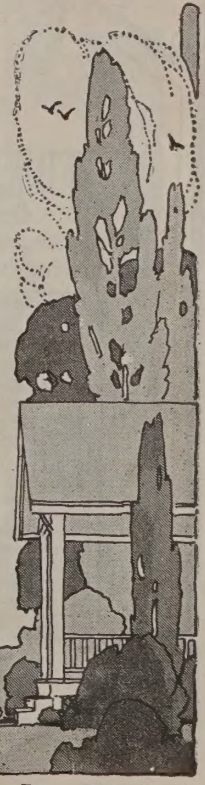


The illustration to the right shows how simple and easy it is to apply wall board. When ordered in connection with Sectional Buildings we furnish all pieces cut to fit for full wall sections, for spaces above and below windows and for ceiling lengths. You simply nail the sheets to the studding and joists with 4-penny wire nails. The room is then ready for painting. We recommend a dull or flat finish oil paint.

We furnish plain light brown finished wall board for our Sectional Buildings at the prices quoted extra in connection with the description of each building. If oak grained wall board is desired, prices will be quoted on request.

The illustration to the left shows the pleasing effect obtained by using oak grained wall board for the lower part of the room as a wainscot, the joints to be covered with wood panel strips. The upper part of the room may be covered with plain Peerless Wall Board. The baseboard, panel strips and door and window casings should be stained or varnished to match the wainscoting.

For the benefit of those who may wish to order Peerless Wall Board, either in plain or grained finish, for other purposes than for lining Sectional Buildings, we quote prices on regular size sheets as listed below. Wall Board shipped from factory in SOUTHERN OHIO.



PEERLESS WALL BOARD is made of three layers of heavy cardboard cemented together by two layers of asphalt, which helps make it dampproof and keeps rats and mice from gnawing through. We are selling it for less than **4 CENTS PER SQUARE FOOT.** It is used instead of plaster, and can be applied by anyone. Comes in three finishes—plain light brown, quarter sawed oak and Circassian walnut. Plain finish wall board **CAN BE PAINTED ANY COLOR** desired. Fine for basements or attics and for dividing large rooms into small ones.

Consider the time you save on any job and the ease with which the work is done when wall board is used instead of lath and plaster. The carpenter can put on the trim and the painter can apply the stain or varnish to it while the wall board is being put on—three operations going on at the same time **without any muss or dirt.** No waiting for plaster to dry and **no dampness** in the building after the work is done. You can put on this wall board right over the studding or apply it to old plaster if you wish. Can be sawed like wood and solidly nailed without danger of splitting. Wall board is furnished in sheets from 8 to 12 feet long, each sheet being 32 inches wide and about 3/16 inch thick. The quarter sawed oak and Circassian walnut finish wall boards need no paint at any time. We sell Joint Tape in all three finishes to cover the joints, but we recommend the wood panel strips for rooms where a fine effect is desired. Packed in wood crates, guaranteed to reach you in good condition. When ordering give lengths of sheets for side walls and ceilings.

Our New Lighting Fixture Catalog

Ask for It

Send for This Book Today

THE lighting is a most important feature of a well appointed home. Our new Lighting Fixture Catalog illustrates a comprehensive line of Lighting Fixtures, embodying the latest ideas in modern illumination. It also contains a complete selection of standard electrical house wiring materials, lighting glassware and portable lamps. It will pay you to send for this catalog. Quality should be considered when buying lighting fixtures. Quality is the foundation of our line, and our liberal guarantee protects you.

Our Lighting Fixture Catalog also lists:
Art Domes
Brackets
Chandeliers
Cleats
Clusters
Conduits
Desk Lamps
Domes
Drop Cords
Floor Lamps
Glassware
Insulating Joints

Have you been thinking of putting a new lighting fixture in your living room or dining room, something to replace the old one that's an eyesore to you? Or is the lighting of the bedroom bad, making it hard to see how to dress? Why not put that new fixture in right away?

Perhaps you have a house or an apartment to rent or sell. Why not make it more beautiful and valuable by installing attractive Lighting Fixtures? The increase in the rent or sale price will pay for the fixtures many times over.

Our electric fixtures are properly constructed and wired for use with either city current or any home lighting plant.

Our fixtures are shipped to you completely assembled, wired ready to hang, fitted with "NOTORCH" attachments, which enables you to install them without the use of a soldering torch or any tools other than a screwdriver.

Don't delay—write today for your copy of our new Lighting Fixture Catalog 416RMB. We will send it to you postpaid. Take advantage of our low prices and order your lighting fixtures at your earliest opportunity.

Our Lighting Fixture Catalog also lists:
Outlet Boxes
Plugs
Receptacles
Rubber Covered Wire
Shades
Sockets
Switches
Table Lamps
Tungsten Lamps

Our fixtures are approved by the Underwriters' Laboratories, Inc., under the direction of the National Board of Fire Underwriters, and each and every fixture bears their stamp of approval in the form of a serial numbered label.

Complete Modern Closet Outfit
With all pipes and fittings ready to install

Any Handy Man Can Easily Install It

You Can Do the Work Yourself and Make a Big Saving

This offer includes our Beautiful Sanitary Fairfield Closet Outfit, described in our Special Plumbing Catalog, with all necessary cast iron soil pipe, calking lead, oakum, galvanized supply pipe and fittings, etc.; in fact, everything necessary to complete the installation of this modern outfit in the average building, as specified in detail below.

Other Fixtures Can Be Added Any Time.

We have provided suitable connections, tees, etc., in this outfit so that you can place them in the piping system and you can easily add a bathtub, lavatory and kitchen sink at any future time.

Why not take advantage of this liberal offer and make this big improvement in your home now?

There is not a greater improvement that we know of that you can make for such a small investment.

Full plans and instructions sent with every outfit. Any man who can cut and thread ordinary iron pipe can easily install this outfit by following our simple plans and instructions.

Why Be Without This Great Comfort in Your Home?

A Great Comfort and Convenience.

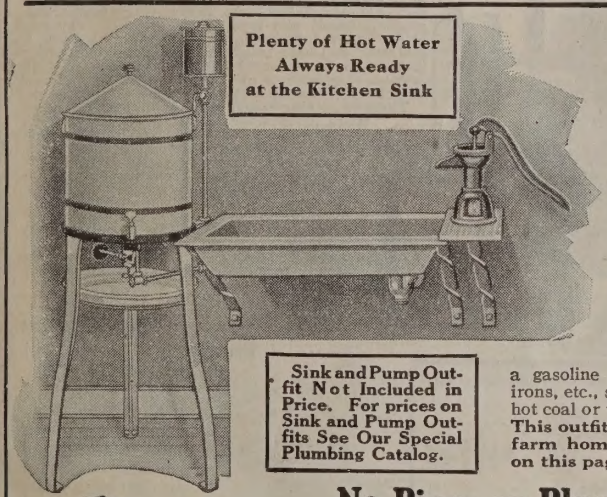
You know what a great comfort and convenience it will be to have this modern outfit installed, especially during the cold and blizzardy days of Winter, and the best part of it all is that every dollar that you invest in this outfit is invested for a permanent improvement, and when you wish to add other fixtures just remove the plugs from the tees and extend the connections.

Outfit includes 42H2000¼ Fairfield Closet Outfit, with washdown bowl, as described in our Special Plumbing Catalog, four lengths 4-inch standard single hub soil pipe, one length 4-inch standard double hub soil pipe, 20 pounds calking lead and 3 pounds oakum, for making up soil pipe joints, one 4-inch sanitary tee with one cast iron closet bend and gasket with tapped side openings with iron screw plugs. When it is desired to add bathtub and lavatory these plugs may be removed and pipes connected. One 4x1½-inch tapped tee with screw plug to be placed in soil pipe stack at first floor.

When it is desired to connect up sink just unscrew plug and connect pipe. Two 4-inch standard soil pipe rests, 25 feet ⅜-inch galvanized pipe to supply water to closet. One 5-inch copper roof flange to make watertight joint where soil pipe goes through roof. One 4x5-inch standard long increaser. Six ⅜-inch galvanized elbows and one ⅜-inch galvanized coupling for supply pipe. Outfit, as described, suitable for average two-story building where soil pipe can run straight from ground through roof. If your building does not permit this or if three-story, you will require some extra pipe and fittings. In that case write for our special estimate.

42H2024—Outfit complete, as described. Shipping weight, 350 pounds. Price..... **$43.90**

NOTE—Ordinances of various cities differ widely, some requiring more and some less pipe and fittings. In the above we have provided a good sanitary system, but it may not comply with the ordinances of your particular city. If you are required to follow special city ordinances it is better to send us a copy of these ordinances and get our special estimate before ordering.



Plenty of Hot Water Always Ready at the Kitchen Sink

Sink and Pump Outfit Not Included in Price. For prices on Sink and Pump Outfits See Our Special Plumbing Catalog.

Combination Portable Heater, Gasoline Stove and Bathtub
Three in One

The heater and bathtub are separate in this outfit, and they can be moved about independently. This is a big advantage, as it permits you to use the heater for heating water for washing dishes, cooking, etc., while the bathtub is not in use. Both the heater and tub are light and easily handled, and can be easily moved about from place to place. When not in use the tub can easily be lifted up and stood on end in some closet or corner where it will be out of the way, and the heater can be moved into the kitchen and placed alongside of the sink, as shown in the illustration at the left, and you will always have hot water for cooking, washing dishes, etc., by just opening the faucet on the tank. During the hot days in Summer you can remove the tank and use the stove part of heater as a gasoline stove for cooking, frying, heating irons, etc., so that you will not have to keep a hot coal or wood stove burning in your kitchen. **This outfit fulfills three big needs in every farm home as shown by the illustrations on this page.**

Complete Outfit, Bathtub and Heater,

$29.75

The heater with the water tank removed makes an excellent stove for heating irons, frying, cooking, etc.

No Pipes or Plumbing Work Necessary

It is not necessary to do any plumbing work or make any pipe connections of any kind to enjoy the benefits of this outfit. You are saved all this expense. The outfit is complete and ready to use when you get it. Except for the small amount of gasoline that it burns, the first cost is the only cost. Just connect a hose, which we furnish, to the outlet of the tub and let the water run outdoors when you are through bathing. To fill heater just remove cover and pour water in. Tank holds about 12 gallons, and you can heat sufficient water for bath in about 20 minutes. The bathtub is 5½ feet long and 28½ inches wide over all. Water tank of heater has two handles, so that it can be easily lifted off. Bathtub and water tank are made of 26-gauge galvanized sheet steel. Entire outfit is nicely painted and presents a very neat appearance. Bathtub has an oak rim nicely varnished and finished in the natural wood.

Just the Thing for the Country Home Which Has No Running Water.

Without a doubt this is an exceptionally useful combination for the Summer cottage or country home.

Shipping weight, entire outfit, 185 lbs.

42H3711—Price..... **$29.75**

Shipped from factory in IOWA.

Ever Ready Automatic Electric Water Supply System Requires Practically No Attention

"Ever Ready" is our own trade mark.

It Starts Itself — It Stops Itself
Night or Day It Never Forgets to Pump
When Water Is Needed

Why Be Without This Great Convenience?

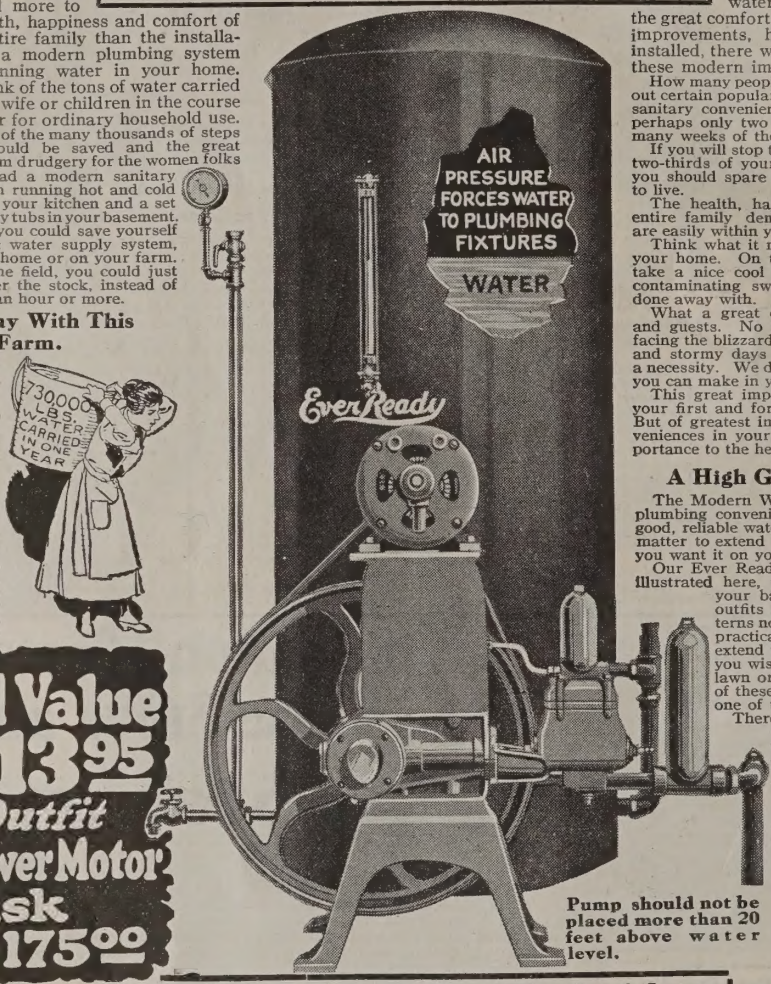
There is not a single investment we know of that will add more to the health, happiness and comfort of your entire family than the installation of a modern plumbing system with running water in your home. Just think of the tons of water carried by your wife or children in the course of a year for ordinary household use.

Think of the many thousands of steps which could be saved and the great relief from drudgery for the women folks if you had a modern sanitary sink with running hot and cold water in your kitchen and a set of laundry tubs in your basement.

What a tremendous amount of work you could save yourself by having a modern automatic electric water supply system, such as described on this page, in your home or on your farm. When tired out after coming in from the field, you could just open a faucet and fill the tank to water the stock, instead of having to pump water by hand for half an hour or more.

You Can Easily Do Away With This Drudgery on the Farm.

President Cook, of the Mississippi Normal College, of Hattiesburg, Miss., contends that possibly **nine-tenths of the drudgery on the farm consists in carrying water from the source of supply to the point of application and in the disposition of the water after use.** He points out that a bucket of water contains 2 gallons, weighs about 20 pounds, and when handled six times the total weight lifted is 120 pounds. He estimates that the use of water in cooking, bathing, scrubbing and weekly washing will raise the lift per day easily to a ton, and that **this will "take the elasticity out of a woman's step, the bloom out of her cheek and the enjoyment out of her life."** He mentions that this daily lift can be eliminated "if the farmer can be brought to see that the farm is also the heir to modern invention."



Pump should not be placed more than 20 feet above water level.

Here is Real Value

Our Price Only $113.95

for 53 Gallon Outfit

With 1/4 Horse Power Motor

Others Ask $150.00 to $175.00

Modern Plumbing Easily Within Your Means

President Cook is right! If those people now living on farms throughout the country where no modern plumbing fixtures or running water has been installed could fully appreciate the great comforts to be derived from these modern sanitary improvements, how moderate the cost and how easily installed, there would be few farm homes, indeed, without these modern improvements.

How many people there are who would not think of being without certain popular luxuries, but are still without these modern sanitary conveniences on the farm! These luxuries are used perhaps only two or three days during the week, and during many weeks of the year some of them may not be used at all.

If you will stop to think a moment you will see that practically two-thirds of your lifetime is spent in your home. Certainly you should spare no effort to make it an ideal place in which to live.

The health, happiness and comfort of yourself and your entire family demand these modern conveniences, and they are easily within your reach.

Think what it means to have a modern bathroom outfit in your home. On those hot sultry days in Summer you could take a nice cool shower bath. That old outhouse with its contaminating swarms of flies, odors and germs would be done away with.

What a great comfort for the old folks, invalids, women and guests. No trudging through the deep snow in Winter, facing the blizzard in below zero weather, or going out on rainy and stormy days and dark nights. Summer or Winter it is a necessity. We do not know of a more necessary improvement you can make in your home.

This great improvement in your home should surely have your first and foremost consideration. Have luxuries? Yes. But of greatest importance come these modern sanitary conveniences in your home. There is nothing of more vital importance to the health, happiness and comfort of all concerned.

A High Grade Outfit, Built for Service.

The Modern Water Supply System is the foundation of all plumbing conveniences in the home. After you once have a good, reliable water supply system installed, it is a very simple matter to extend the pipes and have running water wherever you want it on your premises.

Our Ever Ready Automatic Electric Water Supply System, illustrated here, will automatically supply running water to your bathroom, kitchen sink, laundry, etc. These outfits may be used for pumping from wells or cisterns not over 20 feet deep. It is a strictly high grade, practical outfit and is built for service. You can extend the piping to your barn for watering stock, if you wish, and have hydrants conveniently placed for lawn or garden sprinkling, fire protection, etc. All of these conveniences are yours as soon as you have one of these modern outfits installed in your home.

There is nothing complicated or difficult to understand about this outfit. It is easy to connect up. Any handy man can easily install this outfit by following our simple instructions.

A suction pipe is, of course, extended to your well, and discharge pipe from the pump is connected to the water supply pipe in your home. Aside from the occasional supplying of oil, it needs no attention. It starts and stops automatically and will always keep a liberal supply of water under pressure in the tank, and the moment you open a faucet anywhere on the piping system you will get a plentiful supply of running water.

Prices for Ever Ready Automatic Electric Water Supply System.

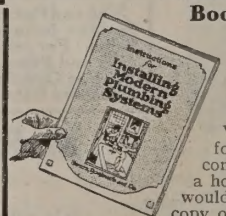
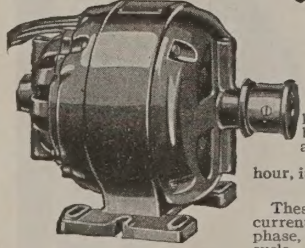
Write for Our Special Plumbing Instruction Book 7777R.M.B.



We publish a very interesting plumbing instruction book which contains much valuable information for anyone owning or contemplating building a home of his own. We would like to send you a copy of this book whether you wish to order plumbing supplies or not. Write for it today. Sent postpaid on request.

Write for our Special Catalog of Farm Electric Lighting Plants, 775R.M.B



The Electric Motor

The motor furnished with this outfit is a well known standard make of motor, which is one of the best on the market. Excellent materials are used and the workmanship is high grade throughout.

Figuring cost of current at 10 cents per kilowatt-hour, it will cost you only 3 cents to pump 180 gal. of water.

Important—Read This.

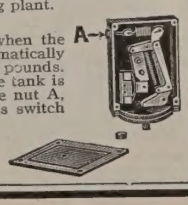
These outfits are furnished for four types of electric current only, as follows: No. 1—110-volt, A. C., single phase, 60-cycle. No. 2—115-volt, A. C., single phase, 60-cycle. No. 3—110-volt, D. C., and No. 4—32-volt, D. C. **When ordering be sure to state which is wanted.**

You can get this information from the people who supply you with electric current. We cannot furnish motors for current other than the four types stated above.

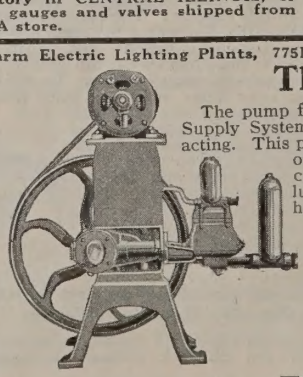
These outfits can be used with any ordinary 32-volt farm lighting plant.

The Automatic Switch.

The automatic switch automatically breaks the electric circuit when the tank has been pumped up to about 45 pounds pressure, and it automatically opens the circuit again when the pressure gets down to about 15 pounds. This starts the motor again, and the outfit keeps pumping until the tank is again pumped up to about 45 pounds pressure. By adjusting the nut A, the pressure at which the switch operates can be regulated. This switch is simple, positive acting and not likely to get out of order.



The Noiseless Pump



The pump furnished with our Ever Ready Electric Water Supply System is exceptionally well designed. It is double acting. This pump has no gears. It is practically noiseless in operation. Crank case is enclosed. Sliding crosshead main bearings and wrist pin are lubricated by the splash system. Priming trap holds prime after pump is once started.

Stroke of pump, 2 inches; bore, 1¼ inches. Capacity, 180 gallons per hour. Cylinder is brass lined. Piston rod is solid brass. Piston is leather packed. A spring tension idler pulley automatically keeps belt tight, so that pump always operates to best efficiency.

The entire pump and motor are nicely painted in an attractive color and the entire outfit presents a very pleasing appearance.

This pump will draw water from wells or cisterns not over 20 feet deep.

The Outfit

Complete outfit includes pump and motor with automatic switch, tank, water gauge, pressure gauge, relief valve, drain cock, shut-off cock, pipe connections and fittings, as shown. Suction pipe to well or supply pipe to plumbing fixtures not included. For suction pipe to well order ¾-inch galvanized pipe. For supply pipe to plumbing fixtures order ½-inch galvanized pipe.

Modern Bathroom Outfits

BATHTUB is 5 feet long, 30 inches wide over rim at top and 16½ inches deep, sufficient to prevent water from splashing over sides. Height from floor to top of tub, 22 inches. Made of cast iron, coated inside with white porcelain enamel, painted red outside and has 3-inch roll rim. Standard Fuller pattern bath cock, 1½-inch connected waste and overflow and two ½-inch offset supply pipes to floor, all of brass, nickel plated and polished.

LAVATORY is 18 inches from front to back, 21 inches wide and has 8-inch high back and roll or turnover rim 4 inches deep. Soap cup cast in top directly above overflow, 1¼-inch trap with outlet to wall, two compression faucets with china tops, one marked "hot," the other "cold," and two ⅜-inch supply pipes to wall. All trimmings of the latest design, made of brass, nicely nickel plated.

Dellwood Bathroom Outfit.

A very popular combination. Modern, of neat appearance and durable. Suitable for the finest residence. A good serviceable outfit at a moderate price. Why not enjoy this great comfort in your home now?

3. EASY PAYMENT PLAN

IF YOU own a building lot or land FREE FROM DEBT and have cash on hand to pay for labor and material which we do not furnish, we will ship Simplex Sectional Homes, plumbing, heating outfits and lighting fixtures on easy payment terms. We will also advance cash to pay for the freight charges on the shipment. A small payment each month makes you the owner of a good home in a few years.

Here Is What Would Be Required of You:

1. Show title to your lot or land.

2. Furnish cash to pay for labor and masonry material.

3. Simplex Sectional Homes purchased on Easy Payment Terms are to be lined with Peerless Wall Board, erected on a solid concrete, cement block, brick or stone foundation; put up in a permanent manner.

4. Send with order one-fourth of the amount of our material and freight; also 2½ per cent of the balance due. The 2½ per cent charge is to cover the expense of handling the transaction, such as examining title, drawing up papers and to compensate us for expenses we do not have in connection with our regular cash with order business. We, however, give you the benefit of our regular cash prices.

5. Duration of loan is five years, payable monthly. Make your monthly payments as large as you can afford, but not less than the equivalent of one per cent of loan monthly. You can send additional payments or pay up in full whenever convenient.

6. Pay interest monthly at the rate of 6 per cent per year. Your interest becomes less each time you make a payment.

D

(OVER)

The Famous ANGLE LAMP

These remarkable Oil Lamps differ entirely in construction from the ordinary old fashioned lamp, in which the burner is above the oil tank. In the Angle Lamp the burner projects from the side of the oil tank, the light burning in a big, round glass bowl instead of in an ordinary chimney. All the light comes directly down where it is wanted, instead of being cut off by the shadow of the oil tank. The Angle Lamps are made of steel in either antique brass finish or nickel plated finish. Some of the advantages of the Angle Lamp are:

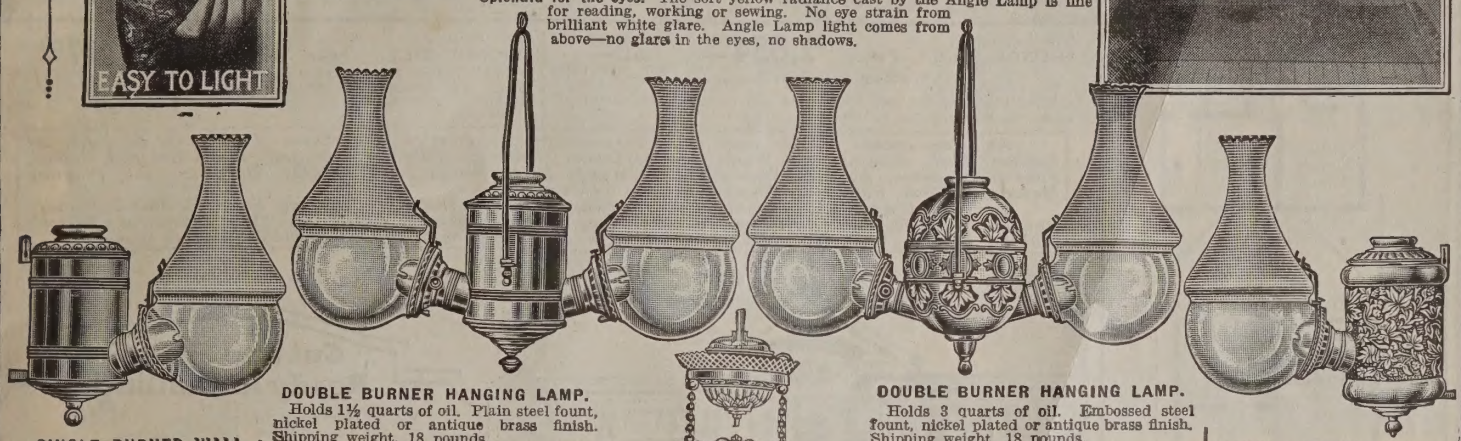
Saves Money. The flame of an Angle Lamp being in the bowl instead of a narrow chimney, burns less oil and more oxygen, enabling an Angle Lamp to burn fully twenty hours on a quart of oil, as compared to about ten hours for an ordinary Rochester burner. At the present price of oil the money saved on the oil bill will pay the entire cost of the Angle Lamp within a year.

Easy to light and easy to extinguish. To light the lamp just lift up the burner latch and light the wick. To extinguish the lamp it is not necessary to remove the glass, but just turn the wick back and it will automatically go out. No need to blow it out. The Angle Lamp is unaffected by drafts.

Easy to fill. To fill the Angle Lamp it is not necessary to take it down. Lift out the oil tank and fill it and the lamp goes on burning.

No smoky glass and no heat. The bowl being below, the flame cannot smoke the chimney and cut off the light. No washing of chimneys every day. Owing to the big bowl and funnel shape chimney, the heat is absorbed. You can work as close as you want to an Angle Lamp.

Splendid for the eyes. The soft yellow radiance cast by the Angle Lamp is fine for reading, working or sewing. No eye strain from brilliant white glare. Angle Lamp light comes from above—no glare in the eyes, no shadows.



SINGLE BURNER WALL LAMP.

"EVER-BRITE" Gasoline Table Lamp

Lights With a Match

$8.25 Complete

$9.25 Complete

The "Ever-Brite" Lamp is all that the name implies. It produces a light of unusually high candle power, which is of greater volume than that produced by twenty ordinary No. 2 flat wick kerosene lamps. Its consumption of fuel is very small, being only 4 pints of gasoline in twenty-four hours' continuous burning. In other words, you can burn this lamp three hours a night for a month on about 1½ gallons of gasoline. It is fitted with two mantles, and for this reason it casts no shadows, which is a very great advantage, as users of ordinary kerosene lamps will quickly realize.

The quality of light approaches sunlight, which makes it easy on the eyes and shows colors in their true values. The light is absolutely steady—no flicker or smoke, which makes reading and sewing under it a pleasure.

It is simple, convenient, safe, clean and economical. It lights almost instantly with an ordinary parlor match. Anyone can operate it.

There are no complicated parts to get out of order and no trouble. It requires practically no attention.

It requires filling only once a week, and a few strokes with a small hand pump every two or three days to keep up the air pressure.

Absolutely safe. The fuel has only one outlet—a tiny hole in the generator—**so there is absolutely no danger.** The lamp can be turned over and over and will burn safely in any position. **If filled by daylight, there is no chance of accident.**

The lamp gives off no smoke, soot or odor. It has no wick to trim, no chimney to clean or break. It cannot leak or become oily; it is absolutely airtight and clean as a dish to handle.

Built for lifelong service and everyday satisfaction. All exposed parts of the "Ever-Brite" Lamp, base and burner, are made of heavy brass, nickel plated. The standard is made of brass and is covered with heavy black wood, which adds to the appearance of the lamp and forms a cool handle for carrying. The height of the lamp is 22 inches and the diameter of the base, which contains the fount, is 8 inches. Capacity of fount, 2 quarts.

"EVER-BRITE" GASOLINE TABLE LAMP WITH WHITE SHADE.

This lamp is fitted with a white ribbed opal glass shade and is the ideal lamp for living room, dining room, bedroom and for general all around purposes. Complete with two mantles, air pump, wrench, cleaning pick, extra generator and extra gas tip.

35H840—Price, complete.....$8.25
Weight, packed, 11 pounds.

"EVER-BRITE" GASOLINE TABLE LAMP WITH GREEN SHADE.

This lamp is fitted with a green ribbed glass shade lined with white opal glass. It is the ideal lamp for the library and for reading, as it concentrates the light on the table or book. Complete with two mantles, air pump, wrench, cleaning pick, extra generator and extra gas tip. Weight, packed, 11 pounds.

35H842—Price, complete.....$9.25

Sold on Easy Payments

What "HONOR BILT" Means.

"HONOR BILT" homes are not portable or sectional. "HONOR BILT" houses have 2x4-inch studding, thick sheathing and clear cypress siding, making double walls. They also have double floors and 1⅛-inch cypress outside window and door casing. They are **extra** high grade, **extra** substantial and very carefully planned. Study the illustrations at the right. See how "HONOR BILT" houses are better than ordinary frame houses. Read the twelve reasons why you should buy an "HONOR BILT" Modern Home if you want a PERMANENT, SUBSTANTIAL DWELLING at the lowest possible price.

If you do NOT want a permanent house as high grade and substantial as "HONOR BILT" Modern Homes are designed to be, then you will be interested in our SIMPLEX SECTIONAL HOUSES, illustrated and described throughout this book. Simplex Sectional Houses and "HONOR BILT" Modern Homes are not at all the same. They are two separate and distinct methods of construction. This page describes high grade "HONOR BILT" Modern Homes. On pages 6 and 7 you will find descriptions of Simplex Sectional Buildings.

Save 40 Per Cent.

The illustrations to the right show better than words can tell exactly how the HONOR BILT SYSTEM makes it easy for you to SAVE 40 PER CENT on the cost of carpenter labor in building your new home.

An actual test completed August 2, 1921, proves our "HONOR BILT" SYSTEM SAVES 40 PER CENT IN CARPENTER LABOR. Affidavit, photographs and full details certifying to the truthfulness of this saving are shown in our book of "HONOR BILT" Modern Homes illustrated below.

In addition to the items shown at the right, we also furnish ready to nail in place all of the porch material, window and door trim, all studding, all rafters; in fact, every piece of material that we have found by experience can be cut more economically by power driven machinery in our factory than it can be cut by hand on the job.

Read the next page, which is reprinted from our Book of "HONOR BILT" Modern Homes.

IF INTERESTED IN "HONOR BILT" HOMES

SEND POST CARD FOR THIS BOOK.

Going to build a high grade, permanent home? Ask for a copy of our Book of "HONOR BILT" Modern Homes 596RMB. It shows photographs of a house built the ordinary way and one built the "HONOR BILT" way. These pictures show how the "HONOR BILT" house was completed in 231½ hours less time than the same house built in the usual way. It shows over 100 house plans suitable for every section of the country, at prices ranging from about $700.00 to around $6,000.00. Several designs, beautifully illustrated in colors, with interior views.

Our customers claim we saved them from $500.00 to $1,000.00 on a single house. We manufacture the materials ourselves and ship direct from our own mills and warehouses.

If the house you want is not in our Book of Simplex Sectional Houses, you will surely find it in the Book of "Honor Bilt" Modern Homes. "Honor Bilt" homes are not portable or sectional—the material is furnished Already Cut or Not Cut, as you desire. The construction is extra substantial. We furnish 2x4-inch studdings placed 14⅜ in. apart; 2x8-inch joists 14⅜ inches apart; high grade wood sheathing, extra heavy building paper between sheathing and siding, three coats of paint for the outside. Prices range from $700.00 for a four-room house, to $6,000.00 for a large ten-room residence. You want our Book of Modern Homes if you are going to build a larger and more permanent dwelling than one of our Simplex Sectional Buildings.

Write for names of people who have built this bungalow.
